

800 KILLED WHEN RESERVOIR BURSTS

AUSTIN, Pa., Sept. 30.—Austin, a town of 3200 residents in the northern part of the state, was swept out of existence today and more than 800 of its people were killed by a flood which followed the breaking of the Bayless Pulp and Paper Company's dam, a mile and a half north of the town. Almost 500,000,000 gallons of water rushed over the place in a wall ten feet high, wrecking every structure in its path. Fear that the towns of Costello and Wharton, also in the path of the flood, had been destroyed, is expressed tonight. Reports that Costello was wiped out and 350 persons were killed there were prevalent, but the destruction of all telephone and telegraph wires leading into the town makes confirmation impossible. It was learned that the flood caused heavy loss of life and property in Costello. Costello had about 500 inhabitants. Wharton, a smaller town, was also reported to have sustained heavy damage. In Austin the bursting of scores of natural gas mains as the buildings were swept away added fire to the general horror of the flood, and hundreds of those imprisoned in the wreckage were burned to death.

The contents of the dam, which was filled to overflowing by the heavy rains of two weeks, swept through a natural gorge in which Austin and Costello were situated. While many residents of Austin escaped to the hills, the warning given by the blasts of the Bayless mills whistles was too brief for hundreds of others.

HARRIMAN EMPLOYEES DROP TOOLS AT ORDER OF NEW FEDERATION

Trains Running on Schedule and Officials Declare Service Will Not be Interrupted---Unions Say Twenty to Thirty Thousand Men Have Struck Managers Minimize the Walkout

CHICAGO, Sept. 30.—The threatened strike of the shopmen on the Harriman lines to enforce recognition of the newly organized federation became a reality today. The number of men that quit the fifteen states affected was estimated at between 20,000 and 30,000 by the union men, but Julius Kruttschnitt, vice-president of the Harriman lines, tonight said the number was much smaller. Reports from most of the points indicated that the men walked out without demonstrations and no rioting was reported. Traffic was continued without interruption and the railroad heads say that the shopmen's strike, even if extended, would not interfere with transportation.

The response to the strike order was general throughout the Harriman lines in the South. The men had received notices from the international presidents of the five crafts directly involved, and when the hour came the men laid down their tools and left. At New Orleans, where the strike actually had extended from a strike of the Illinois Central clerks, and the men have been out several days, two men received jail sentences for violation of a Federal injunction restraining them from interfering with the company's property.

In the Far West, it is said by railroad officials, only a small percentage of workmen responded to the strike call. Vice-President Kruttschnitt issued this statement:

FROM KRUTTSCHNITT

"At many of the intermediate points of the Union and Southern Pacific, shop forces were laid off to reduce working time and effect a reduction of expenses. At other points no men at all went out, and at some points only one or two. At the general shops, as far as heard from, the situation was as follows: general shops, 20 percent; at Sacramento, 25 percent; at Oakland, 10 percent."

"Train schedules on all lines are normal and the maintenance of regular schedules will in no manner be interrupted."

The men involved are divided into the following groups, according to the union leaders: Machinists, 1,000; boiler-makers, 3,000; blacksmiths, 2,000; carmen, 1,000; clerks, 1,000; miscellaneous workers, 1,000.

TOO RADICAL

W. L. Park, vice-president and general manager of the Illinois Central, issued a circular to employees of the road tonight, characterizing the demands of the men as radical, relating the story of the negotiations and charging that the contracts between the men and the unions had not been negotiated by the necessary thirty days' notice. He added:

"It is well known that the international officers of at least some of the crafts supported our position and bitterly opposed violating their contracts by consenting to call a strike on the Illinois Central. The conservative seemed to be in the minority, however, and that is one of the reasons why the men are not so successful in their efforts to force a walk-out of labor in the history of this country. The shopmen at Memphis and New Orleans quit their work in defiance of the instructions of the same grand officers responsible for calling the strike."

"The Illinois Central has not sought this controversy and has no quarrel with organized labor as such, but it will use all its resources at its command to retain such control of the management as will enable it to continue the exercise of the public functions for which it was created and which subsequent events have shown it could not have continued to exercise, but the management consented to enter negotiations with the organization which is primarily responsible for this trouble."

1500 CLAIMED AT LOS ANGELES

LOS ANGELES, Sept. 30.—Mustering the whole strength of the army of strikers at mass meetings late today, leaders of the organized shop craftsmen who walked out of the Southern Pacific and Salt Lake railroad shops today, declared that the strikers numbered 1500 union men.

J. O. Leary, organizer of the Blacksmith International Union, and James J. Jones, president of the sixth district federation of Harriman employees, declared that 1250 quit work at the Southern Pacific shops and 250 at the shops of the Salt Lake.

Tonight's estimate of the number of strikers was about 300 less than the number announced by the union leaders directly after the strike order went into effect this morning. But there is still a discrepancy of 500 between the figures given out by the union chiefs and those made public tonight by officials of the railroads involved.

Official aides of Sept. 30, H. V. Platt of the Southern Pacific asserted that there were only 1,067 men at work in the shops yesterday and that nearly

REMARRIES SECOND WIFE AFTER ENDING TERM AS BIGAMIST

BAKERSFIELD, Sept. 30.—Thomas Hughes, at one time special officer of the Los Angeles district attorney in white slave cases and formerly manager of the Los Angeles detective agency at Portland, Oregon, was married here last night to Cora Beck, a stenographer, recently of Taft.

And thereby hangs a tale. Hughes only a week ago completed fifteen months' service in San Quentin prison for bigamy. His first wife was Clara Kupper, whom he left in the north when he came to Los Angeles. He fell in love with the pretty stenographer in the south and married her despite the fact he had not secured legal separation from his northern spouse. The latter, learning of Hughes' bigamous marriage, came to Los Angeles, had him arrested, and he was duly convicted and sentenced. Meanwhile the Beck girl remained staunch and heartless and was waiting his release from prison. Hughes, by good behavior, shortened his term three months and as soon as possible came to Bakersfield to join his second wife, whom he decided to marry a second time. The ceremony was performed in a local newspaper office, a scribbler being called in to help get the county clerk out after the courthouse was closed and to secure a minister. Rev. W. H. Reedy of the First Presbyterian church officiated.

SEVENTY-FIVE OBEY ORDER IN FRESNO SHOPS

Men Go Quietly to Their Homes and No Disorder Is Looked for.

TORPEDOES SET OFF AFTER MIDNIGHT

Strikers Hold Mass Meeting and Resolve to Stay Away From Yards.

INSANE FROM FAST OF THIRTY DAYS IN SEEKING HEALTH

BAKERSFIELD, Sept. 26.—Fred E. Burchell, the Associated Press operator in this city, who fasted for thirty days in the hopes of curing a disease of the stomach, is at the point of death. He has failed to gain rapidly as expected and his condition is feared. Burchell fasted for nearly forty days by his fast and has dropped off considerably in weight since resuming his diet. Night before last he was temporarily insane, and all day yesterday and today has been so delirious that several physicians have been called in.

Leaders' orders were generally obeyed at the railroad shops and stock yards today. The men were moving about as usual, but they were not working. The men declared they would stay at home or seek employment elsewhere and the railroad would be notified. The men were not working at the shops and stock yards today. The men were not working at the shops and stock yards today. The men were not working at the shops and stock yards today.

CAR REPAIRER ASSAULTED AT BAKERSFIELD

BAKERSFIELD, Sept. 30.—William S. Gillock, a car repairer, who refused to go on a strike today, was assaulted tonight in a restaurant by a crowd of strikers.

Witnesses say Gillock provoked the assault by making remarks as to the character of the strikers. He was treated by Dr. Zirkler, but was not dangerously injured. The strikers made no attempt to conceal their identity and are well known.

YOUNG CONVICT DIES FOLLOWING PRISON BATTLE

Expires as Result of Being Beaten Over Head With Bed Slat.

QUARREL IN CELL

Prisoner Who Caused Tragedy Will Claim Self Defense.

SACRAMENTO, Sept. 30.—For the second time in less than two weeks a fight between prisoners in Folsom State penitentiary ended in a death. When Homer Stolcup, aged 21, sent from Alameda county two years ago on a charge of attempted murder and jail break, died at noon today from the effects of a blow on the head dealt Thursday night by Westley Frazier, aged 23, who had been in the prison only two months, having been sent up from Los Angeles on the first conviction under the law enacted by the recent legislature against men living on the earnings of immoral women.

A quarrel thought to have originated in discussion over the case of Frazier's incarceration at the state prison ended in Stolcup's picking up a mop handle, which was lying in the cell and swinging it about Frazier's head. The latter pulled a slat from his bed and struck Stolcup across the right side of the head.

Stolcup appeared not to be badly injured and Frazier as well as the other two men in the cell, William Rossi and Constantine Lidy, looked on and watched the slat fly through the air. The guards were called and later Dr. Simmons, the prison druggist, who administered a headcase powder. Friday morning his condition appeared to be worse, the injured man was removed to the hospital, where he died shortly after noon today.

Dr. C. B. Jones, who accompanied Corporal Gormley to the state prison, today made an autopsy which showed the doctor's skull to be very thin. A brain hemorrhage resulting from concussion was the cause of death. The inquest held this afternoon, Frazier pleaded self defense.

ITALY IS LANDING TROOPS IN TURKEY

Rumored Destruction of Ottoman Fleet in Engagement Off Prevesa Unconfirmed; Tripoli Bombarded.

Direct news from Tripoli is lacking. That the Italian forces have landed there is unquestioned, but there is doubt as to whether Turkey offered armed opposition. A Constantinople dispatch says that the Turkish guns sank two boats with contingents of soldiers aboard at Tripoli.

According to advices received by the Porte, Italy has effected a landing near Prevesa in European Turkey. The reserves of the Vilayet at Janina are mobilized.

An official announcement also comes from Constantinople that Greece is mobilizing her army.

The Italian government declares its determination to maintain the territorial status quo in the Balkans, explaining that its naval operations along the coast of European Turkey are merely a measure of safety for the security of Italy's military expedition.

The position of the Turkish squadron, which is supposed to be on its way from Beirut to Constantinople, is unknown, though reports say that it should reach the Mardanelles Sunday. An Athens dispatch says that an Italian squadron shelled Turkish warships off Gomitza.

PARIS, Sept. 30.—The Martin's correspondent wires that a rumor is in circulation at the Porte that the entire Ottoman fleet except one cruiser has been destroyed. Officials at the office of the minister of the marine are unable to confirm or deny the news.

ROME, Sept. 30.—It is officially announced that the Pisa is ashore. MALTA, Sept. 30.—It is reported here that the Italian warships began the bombardment of Tripoli at 2 o'clock this afternoon. A reliable private dispatch from Tripoli says that the Italian bombardment began yesterday at sunset and a bombardment was declared in force today. There is apprehension of a rising among the Arabs. All Europeans are safe. The British fleet is expected here tomorrow.

CONSTANTINOPLE, Sept. 30.—The Porte has received a dispatch that Italian forces under the protection of three cruisers and four torpedo boat destroyers began a landing at 3 o'clock this afternoon near Prevesa, out of range of the guns of the fortress. The reserves of the Vilayet of Janina, in which Prevesa is located, are mobilized.

CONSTANTINOPLE, Sept. 30.—It is officially announced that Greece is mobilizing troops.

Small Town Wiped Out by Awful Flood

Johnstown Disaster of 1889 Recalled by Destruction of Austin, Pennsylvania Last Night—Fire Adds to Horror—State Aid to the Desolate Survivors

AUSTIN, Pa., Sept. 30.—The catastrophe paralleled in many respects the destruction by flood of Johnstown, Pa., in 1889, in which more than 2,800 lives were lost. The extent of the loss of the destruction of property cannot be known for several days. The property loss surely will be several millions of dollars. Within an hour of the first general knowledge of the calamity, special trains bearing physicians, nurses and food supplies were on the way to the scene. Hundreds of automobiles bearing rescuers also tolled over the mountain roads to lend aid. The food supply of the town was destroyed and immediate aid to survivors was urgent. Hundreds of those who escaped were seriously injured in the collapse of their homes and the panic of the rush for safety. Temporary hospitals were fitted up in nearby farm houses and improvised structures fashioned from the wreckage. The Red Cross also made preparations for immediate aid to survivors. The intense heat of the fire sweeping from the natural gas mains made it impossible for survivors to visit the scene of destruction for many hours. Looters were among the first on the ground and Governor Tamm, dispatched a large force of state police to the town to protect the victims.

"It was a wonderful sight," said Harry Davis, a Buffalo and Susquehanna locomotive engineer. "There was nothing to indicate that the dam was about to give way and some one had just remarked about its strength."

The survivors are in a frenzy. There is no organization, the town being dazed by the force of the calamity, which came without a moment's warning.

Burgess Michael Murn has not been located and it is feared he has been drowned.

Hundreds of men, women and children are searching through the ruins of the village for their families and friends.

The only light is the glare of the hundreds of houses which caught fire from broken gas pipes almost before the flood passed.

Chaos reigned from the moment the mighty wall of water tore through the town and there will be no relief until help comes from surrounding towns. Meanwhile, many bodies lie in the wake of the flood.

The dam was built two years ago. It was 250 feet long, spanning the little valley formed by Freeman Run and rising to the height of forty-nine feet. It was of concrete, thirty-two feet wide at the base and said to be constructed after the most approved plans of modern engineering. The basin behind it had never been filled with water until this week and today it was noticed that water was running over the top of the structure. Many persons went over from the town, a mile and a half away, to see the unusual sight, and it was while they were watching the overflowing water that the break occurred.

(Continued on Page 4)

MANY WORKMEN STAY IN SHOPS

AN FRANCISCO, Sept. 30.—Comments from the shops of the Harriman system indicate tonight that the strike order affecting the federated shop employees was more generally obeyed in the East than on the Pacific coast. In the district in the jurisdiction of E. E. Calvin, vice president and general manager of the Southern Pacific Company, approximately 10,000 men are employed in the shops, and a statement issued at five o'clock tonight from the office of the general manager said that a fraction less than 50 per cent of these men obeyed the strike order.

Calvin's jurisdiction extends to Ash-

POLICE CHIEF GETS OUT HIS FIRST MONTHLY DETAIL FOR MEN

"Beats" in Downtown Section Changed; Three Men to Meet Espee Trains.

"Bell Hop" at Headquarters Goes to Santa Fe During Dark Hours.

Chief of Police Jones yesterday announced his first monthly detail since becoming the head of the department. This detail went into effect at midnight and several important changes are noted. In the business section, the "beats" have been arranged so that the patrolmen will walk from the court house park to the Southern Pacific tracks, making three men who are instructed to meet all incoming trains. This change has made it necessary to have the officer stationed in police headquarters meet all night trains on the Santa Fe. The patrolman having the "beat" south of Tulare street will also meet the Santa Fe trains after 10 o'clock at night. During October, Harry Knight will answer all calls from the police station. Relief duty will be performed by Henry McCall.

E. A. Forbes, R. A. Rutherford and S. A. Caldwell, the most recent acquisitions to the force, remain on duty during the dark hours for another month. The detail, in full, for October follows:

No. 1, J. L. Enos: Tulare street north to Fresno and west to Southern Pacific railroad, from G to E, 10 a. m. to 4 p. m.; 4 p. m. to 8 p. m., Fresno to Kern and G to E. (Dinner, 1 to 2.) Calls up at 45 past.

No. 2, B. G. Davis: Kern to Fresno and G to E, 6 a. m. to 10 a. m. Tulare

to Kern and G to E, 10 a. m. to 4 p. m. Calls up at 15 past.

No. 3, J. L. Broad: Tulare to Kern and G to E, 8 a. m. to 2 a. m. (Supper 12:30 to 1:30.) Calls up at 30 past.

No. 4, E. A. Forbes: Tulare to Fresno and G to E, 6 p. m. to 4 a. m. (Supper 11 to 12.) Calls up on the hour.

No. 5, E. B. Bradley: Tulare to Kern and G to E, 4 p. m. to 2 a. m. (Supper 9:45 to 10:45.) Calls up at 45 past.

No. 6, R. A. Rutherford: West of Southern Pacific railroad, except territory covered by other details, 4 p. m. to 2 a. m. (Supper, 7 to 8.) Calls 15

No. 7, J. Hardenbrook: Mariposa to Tulare and H to K, 6 p. m. to 4 a. m. Saturdays, J and Tulare crossing from 6 p. m. to 8 p. m. (Supper 11 to 12.) Calls up on the hour.

No. 8, S. A. Caldwell: Tulare to Kern and Southern Pacific railroad to Santa Fe, 8 p. m. to 6 a. m. Saturdays, J and Tulare crossing, 8 p. m. to 10 p. m. (Supper 12 to 1 a. m.) Meet Santa Fe trains after 10 p. m. Calls up at 45 past.

No. 9, J. D. Morris: Mariposa to Fresno and H to K, 8 p. m. to 4 a. m. Fresno to Tulare and H to K from 4 p. m. to 8 a. m. Saturdays, J and Mariposa street crossing, 8 p. m. to 10 p. m. (Supper 12 to 1 a. m.) Calls up at 30 past.

No. 10, W. M. Pickens: Fresno to Tulare and H to K, 4 p. m. to 2 a. m. Saturdays, J and Mariposa street crossing, 4 to 9 p. m. (Dinner, 9 to 10 p. m.) Calls up 30 past.

No. 11, C. E. McKee: Mariposa to Ventura and H to K, 4 p. m. to 2 a. m. North of Tulare and east of Southern Pacific railroad, 8 p. m. to 2 a. m. Saturdays, J and Mariposa street crossing, from 4 to 8 p. m. (Supper, 8 to 9 p. m.) Calls up 15 past.

No. 12, J. L. Cronkrite: All territory between Southern Pacific railroad and Santa Fe south of Kern street, 8 p. m. to 4 a. m. (Supper, 11 to 12.) Calls up at 40 past the hour.

No. 13, William Maher: Mariposa to Ventura and H to K, 8 a. m. to 6 p. m. Saturdays, J and Tulare street crossing, 1 p. m. to 6 p. m. (Dinner, 12 to 1 p. m.) Calls up on the hour.

No. 14, H. C. Gentry: Mariposa to Stanislaus and H to K, 6 a. m. to 1 p. m. Saturdays, J and Mariposa street crossing, 12 to 4 p. m. (Dinner, 11 a. m. to 12 m.) Calls up 30 past.

No. 15, W. H. Knight: Headquarters, 8 p. m. to 6 a. m. Santa Fe trains and all night calls. (Supper, 12:15 to 1:15 a. m.)

No. 16, H. R. McCall: Relief detail.

No. 17, C. L. Farnham: Detective duty.

No. 18, J. G. Goehring: Detective duty.

No. 19, F. E. Dore: Clerk headquarters, 8 a. m. to 6 p. m.

No. 20, P. P. Triun: Clerk headquarters, 6 p. m. to 8 a. m.

No. 21, T. P. Coyle: Police sergeant, 6 p. m. to 4 a. m.

No. 22, H. Russell: Court bailiff.

EDWARD JONES, Chief.

County Health Officer Burks announced yesterday that he will begin tomorrow the enforcement of the state law demanding the vaccination of all children in the country schools, as ordered by the state board of health, and as has been done in the city schools. The doctor will take his first school inspection ride Squaw Valley-wards.

"It will take me," says he, "a month or six weeks to collect reports from all the county schools. Every pupil attending school in the county must have with the teacher a certificate to show that he or she has been vaccinated within the last seven years, as one of the three certificates which the state law has adopted and he passed on and approved by the county health officer."

"So you see," puts in the doctor, "I have about six weeks of good hard riding and tedious work to collect these certificates and inspect the schools throughout the county. If the teachers in the country schools will instruct their pupils to bring in certificates of vaccination, if they have them, and have them ready for me with a list of the pupils attending the school, it will help very much to accelerate this tedious work."

Dr. Burks reports incidentally that there is typhoid fever southwest of Fowler, besides diphtheria beyond and in the vicinity of Sanger—in fact, up to Friday evening seven cases in that neighborhood.

"The doctor made a visit to Firebaugh to look up the report of smallpox originating there. I looked the town over, made diligent search and inquiries but found no smallpox in the town," says he. Moreover, he had the assurance of the doctor at Firebaugh that there has been no case of smallpox in the town.

There are six cases of smallpox in detention at the county pesthouse, all sent from the city.

DOVER TO DRILL IN KRAMER FIELD

BAKERSFIELD, Sept. 26.—The Dover oil company, Bakersfield-San Francisco corporation, is making plans to drill a well on its property in the Kramer district. It is intended to drill the well to great depth and ascertain just how much oil there lies beneath the surface. The geological survey reports in the hands of the two companies and they expect to find a good well. A six horse team is hauling their supplies from Bakersfield.

THE UNWARY MARCH OF BRONCHITIS, a deep seated Cough is corrected by Dr. Pierce's Golden Medical Discovery.

In those serious conditions of the blood which give rise to Consumption, in severe lingering Coughs, and Weakness, which threaten the life, the Golden Medical Discovery is a most effective remedy.

As a blood-cleanser, strength-restorer, and feeble builder, nothing like it is known to medical science. The "Discovery" far surpasses any compound as a blood-builder for the reduced vitality of the blood, and in all lingering Bronchitis and Throat affections, and in every disease that can be reached through the blood, it never fails to benefit or cure. The "Discovery" is a medicine and its ingredients are printed on the bottle wrapper.

Dr. Pierce's Pleasant Pellets regulate and invigorate stomach, liver and bowels. Sugar-coated, they granules, easy to take as candy.

SCHOOL TAXES ARE HIGH THIS YEAR IN FRESNO COUNTY

District Special Rates Range From 8 Cents to \$1.80 on \$100 Valuation.

These Demands Are Made Necessary By Growth of Department.

The special rates figured out by the auditor's office for the various districts in the county confirm the forecasts that have been made that the school taxes this year will be unusually high. These rates for special purposes range according to districts from 8 cents on the \$100 to \$1.80, which is in addition to the 27 cents for school purposes fixed by the supervisors in the general county tax rate of \$1.56.

These special rates are not determined by the supervisors in casting up the general county tax levy, but are set imposed by the districts for the various purposes and needs indicated, namely, the rate for interest and redemption of old and new bonds under the new tax system; the high school rate and tuition fees and the redemption of district bonds voted for some particular purpose.

"The school taxes in Fresno county are admittedly high, but that is due in part to the expansion and growth of the county school system and the need for enlarged facilities with growing population," said Superintendent Lindsay. "The high school districts are growing and demand larger school houses and more and better equipment. Fresno district has made a special demand for \$25,000, therefor bonded with \$20,000, secured with \$15,000 and Kingsburg with \$12,000."

"Last year we figured on an allowance of 37 cents per child, based on school census, but under the new law basing allowances on average daily attendance, there has been made necessary a large increase in the number of teachers and the cost difference for teachers' salaries is \$8 more. To make up the difference in cost per child, I was forced to ask for a general school tax of 27 cents, 5 cents more than last year, and I asked only for the minimum allowed under the law. The law, moreover, forbids carrying over any deficit in funds. It was, therefore, determined by many means of computation how much revenue will come to the county schools out of state taxes under the new tax system. I am not under the impression that the total cost per child under the daily average attendance system will not go up to \$14."

"The special rates in the school districts should not be associated with the 27 cents general school tax. These special taxes are voluntarily imposed and are principally for larger school houses and improved grounds and equipment showing with the new districts that the county school department is growing fast."

The special district school taxes figured out by the auditor are these: The high school rates and the special revenue to be raised under the law in the districts named are shown in the following tabulation:

Clovis	\$ 5,500	.42
Coalinga	9,000	.12
Des Plaines	13,000	.16
Fowler	5,500	.49
Fresno	32,000	.28
Kerman	7,000	.44
Kingsburg	12,000	1.05
Laton	1,500	.12
Mariposa	20,000	.58
Sanger	7,000	.45
Selma	15,000	.45
Washington	4,000	.26

The special school rate in Fresno city district is 70 cents, made up as follows:

General	\$200,000 past bonds	.62
High school	\$45,000 special bonds	.20
High school		.20
Total rate		1.02

SCHILL DECLARES WAR AGAINST MEALY-BUG

Nuisance in Infested Trees in City Must Be Abated in 30 Days.

The county horticultural commissioner says that no mealy bug on orange and lemon trees in groves and back yards in the city must be exterminated. Notices will be sent out reading as follows:

You are hereby notified that the orange trees growing on your premises are infested with mealy bugs, which are infected with an infectious disease commonly known as the mealy bug, a pest injurious to citrus fruits and trees.

Said infested trees constitute a public nuisance and you are hereby directed to abate said nuisance within thirty days from receipt of this notice.

For failure in this, it becomes the duty of the County Horticultural Commissioner to cause said nuisance to be abated under section 2322-a of the Political Code of the State of California and the expense thereof becomes a lien against the said property.

Commissioner Schill says an inspection has been made by him of the citrus trees growing in the city and there have been 15 trees found infested with the mealy bug. Experiments for the extermination of the bug having been proven failures, the above notice will be served on the owners of infested trees for their destruction.

Report is again made to the supervisors that inspection has been made of the citrus trees and for the mealy bug, but in no instance has the presence of the pest been noted in this county.

MAY LECTURE HERE ON USES OF VINE

Suggestion was made yesterday that George C. Rossmann, the United States pomologist, in charge of viticultural experiments, who has been in Fresno for some days, speak here in the near future on the uses of the vine.

He declared the uses of the vine are put in this district are but a very few of which they are capable, and he believes the lecture might be of some value to the many who make a business of vine raising.

The matter was taken up with the Chamber of Commerce.

These Stirring commercial events--Fashion Shows, Fair Weeks & such things, serve well to make known the superior advantages of this store....People may doubt what they read or forget what they hear, but WHAT THEY SEE, THEY KNOW & they remember.....We welcome the carnival....

These Are The Days Stocks Are At Their Best Secure Your Suit or Dress or Coat Now

No Lower Prices Than Ours Will Be Found in California And Prices Will Be No Lower On First Choice

Already, manufacturers of woollens and wholesale tailors are announcing that certain cloths or styles that have caught popular fancy have been entirely sold out, and no more obtainable this season.

Special Suits at 19.75

Two splendid assortments of this season's tailored suits for women and misses, both fancy mixtures in popular grays and tans and plain colors.... Plainly tailored coats and coats trimmed with patch pockets and fancy ball buttons. Skirts are side gored and panelled front and back.

We especially recommend these for business or school wear.

As they combine elegance, simplicity and economy.

Long Broad Cloth Coats

Black only, special at 15.75 These are handsome dress coats, of excellent smooth black broadcloth, full length and lined all the way down with Skinner's satin.... All sizes for women and misses, 15.75

Extra Size Long Coats

Full length, semi-fitted black broadcloth, single breasted, fully lined with Skinner's satin,

New Polo Cloth Coats

Costs only \$15 here

Just think of buying one of these grand coats for only \$15!... Reversible Polo Cloth.... These big rough coats with huge collars and revers are quite the latest thing.... Browns, tans, blues and grays to choose from.

Misses' New School Coats

Sizes 14 to 18, only 11.75

Excellent New Serges

Serges will more than "hold their own" this season for popularity—and as for practicability and all-round utility they never were outdone.

This store will "hold its own" for value giving.... Among the new ones are sterling qualities at 50¢, 60¢, 75¢, 80¢, \$1, 1.25, 1.50, 1.75 and \$2

Put In A REAL Heating Plant Do Away With Unsatisfactory Stoves

If you use an American Ideal Radiator you will never have to bother with putting up stoves and taking them down. The rooms are evenly heated and any or all of them can be made warm and pleasant. Less fuel is needed and the rooms are more healthful than when heated in the old way. We want you to come in and see these radiators and let us show you how you can make your home more pleasant in a very small outlay. Plenty of heat day and night with an American Ideal Radiator.

CLOVIS OPPOSES STATE HIGHWAY ROUTE BY WAY OF KERNAN

Commerce Chamber Official Protests Against Recommendation.

Fresno Chamber of Commerce Action Is Scored in Communication.

Editor Republican:—The Clovis Chamber of Commerce protests in the strongest manner against the decision of the Fresno Chamber of Commerce Wednesday evening recommending that the state highway go to the west side of the valley.

Had they endorsed the Clovis route, as well giving the state commission a chance to choose on the merits of the two routes, feeling would not run so high. But the absolute discrimination against Clovis, made in the interest of large private holdings of real estate has aroused the indignation of a large community.

Why should the state highway, paid for out of the people's money, make this long detour from a direct route? The people are opposed to trusts and monopolies, and they will fight this decision for the promotion of private interests.

Clovis people ask a direct route from Fresno to Madera, paralleling the Southern Pacific railroad on the east and crossing the river at Herndon. Clovis has a direct road west to Herndon and this will be developed into a fine highway, thus giving travelers easy access to Clovis, the gateway to all San Joaquin river resorts and to the mountains as well.

Clovis territory stands on its merits, as being of interest to the whole state and to the traveling public. It com-

prises over half the most area of Fresno county.

It is the main center of the continent.

It contains the largest part of the county's wealth and population, outside of Fresno. The best of vineyards, the great waterfalls and the best pack-houses are all in Clovis district. The country, from town to foothills, is thickly settled with people on small and fertile holdings. All the great game and fishing resorts of the mountains and the rivers are reached by way of Clovis. The great dam at Big Creek, that stupendous work of the power company, is a day's ride from Clovis.

The situation results in Clovis and Shaver and Big Creek are but a few hours' away by automobile, while Fresno's Valley and the Yosemite are nearer the world by the Clovis-Shaver route. The annual output of the county, amounting to \$2,000,000, in copper, tungsten, hay, grain, grapes, and livestock is \$2,000,000, to say nothing of the vast shipments of green fruit, dried fruits, melons, poultry and eggs. Every foot of a ride through the Clovis country is a scenic ride. Clovis Chamber of Commerce insists that, as Clovis is the gateway to San Joaquin resorts, who must have access to the state highway. The people will approve a direct route from that highway and Clovis can readily put herself in touch with it. They demand, therefore, that the endorsement of the Kernan route be reconsidered or, that the Clovis route be also endorsed. We only ask a fair deal.

T. J. McILVINE, President.

Clovis, September 28, 1911.

SUNDAY SERVICES IN THE CHURCHES

Swedish Mission—P and S streets, A. Nelson, pastor. Services: Sunday school, 10 a. m. Preaching, 11 a. m. and 7:30 p. m. At morning service communion and in the evening the new choir will sing. All Scandinavians are welcome.

First Christian—Corner N and Mariposa streets. Sunday school, 9:45 a. m. Preaching services at 11 a. m. and 7:30 p. m. conducted by the Rev. Dan Stewart.

Our Savior's Lutheran—J. Johansen, pastor. English services in the church on Elm avenue at 10:15 a. m. The Rev. J. W. Thurn, pastor of Christ of Latter Day Saints, at Union hall, 1159 I street. Sunday school at 10. Sacrament service at 11 o'clock.

St. James' Episcopal—Corner Fresno and N streets. Sunday school, 9:45 a. m. morning service and communion at 11 a. m. Evening services at 7:30 p. m. Rev. R. W. Rimes will officiate at the services and deliver the sermon. All strangers in the city are cordially invited to attend the services. All seats free. The early morning communion will be administered as usual.

Caldwell Presbyterian Church—Corner N and Tulare streets. Rev. Duncan Wallace, pastor. Sunday school at 9:45 a. m. Morning service at 11 o'clock. At this service the Lord's Supper will be celebrated and every member of the church is requested to be present. Junior Endeavor at 3 p. m. Entertainment at 4 p. m. Seniors at 6:30. Evening service at 7:30, subject of sermon, "The Christ that Saves and Keeps."

ON VISIT TO CITY; CALLED BY DEATH

While on a visit here, with his brothers, Herman T. W. Ruschhaupt, a prominent rancher of Dinuba, was called by death. The remains will be shipped this morning to Dinuba for burial. No services will be held here. Death occurred yesterday morning at the home of A. C. Ruschhaupt, 1288 J street. Another brother, K. W. Ruschhaupt, also of this city, survives. The deceased was a native of Germany and at 32 years of age had been a resident of California for fifteen years.

HAS GIRL'S WATCH; MUST FACE A JURY

Dan Dalley must answer to the Superior Court for the theft of a gold watch from Miss Bertha Brown of this city. Yesterday Dalley's preliminary examination was held in the police court and Justice Briggs fixed the defendant's bail at \$1,000. In default of the sum, Dalley was taken back to jail. The accused is a waiter in a local restaurant. Two days after the alleged theft, Dalley is said to have shown Miss Brown's watch to a couple of waiters. This led to his arrest.

WORTH SEEING

The new lines of shoes and footwear on sale at the New Shoe Store, 116 A street, are attracting much attention and are worth looking at. Everything new and fresh, right from the Eastern factories. All new styles in new leather.

Our Collection of Millinery Is Very Extensive, Smart Exclusive Models Priced all the Way up to \$90.00

THE millinery that we show should create a great deal of admiration, for they have been designed and constructed by milliners who were quite adept in inaugurating new ideas and who have that indescribable knack of knowing just where to put this feather there and that feather here, and a braid there and a band here, and all in all we think that we can show you millinery this season more becoming and far more tasteful than we have ever shown before. We have a new head to our millinery department, a milliner who has had extensive experience, and we are quite sure that we offer hats this year that will meet with your approval, not only from a standpoint of style, but from the standpoint of price, for our main object is to offer you splendid millinery at moderate prices.

Smartly Fashioned Hats at

\$7.50, \$10, \$12.50, \$15, \$20

Our hats at these prices deserve particular mention because of their individuality and good style.

Our collection in this price range is indeed quite comprehensive and includes the very smartest approved styles and effects.

This season the soft, smartly tailored effects are greatly favored for street wear with tailored suits.

Some of the most dressy hats, in fact, are also of the soft velvet shapes.

We should be pleased to have you call and see this extensive collection.

It is an easy matter to describe a hat—how it is made and what it is trimmed with, but the artistic touches that express the skill of the designer can not be described—this can be conveyed only by seeing them.

Women's Suits From \$15.00

and all the Way up to \$125

Our collection of suits this season is no doubt the most extensive in the history of this store.

It ranges from \$15.00 to \$125. It includes a range of materials that in our estimation is perhaps as complete as can be found in some of the very large city stores.

Plain blue serges at \$17.50, \$25, \$30, \$35—fancy trimmed blue serges from \$28.75 up to \$55.

Fine mannish tweeds in the rough effects at \$27.50 and up to \$35—pretty fancy mixtures as low as \$15.

Then the 3 piece suits as high as \$125.

Big Collection of Coats

From \$12.50 up

We are showing a great many coats priced as low as \$12.50. These are the full length coats so much admired in the East, and creating quite a sensation out here. They are finely tailored, made from splendid materials and stylish to a marked degree. We doubt very much whether we have ever shown smarter looking coats than those we show this year at these low prices and all during this week these coats will be featured, and we would suggest that if they meet with your approval that you select one now.

Very Extensive Line of Black Coats

Black coats will be very popular this season for street, afternoon and evening.

The plain black strictly tailored coats as usual will be used—these range in price from \$22.50 to \$35.00.

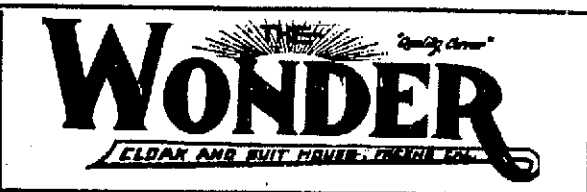

Then there are some a little more fancy, perhaps with velvet reverses, large velvet lapels and collars lined with contrasting linings.

Then for the more dressy occasion are the black velvet coats. In these we have several stunning models. Also the reversible coats, satin on one side, cloth on the other, which may be worn on either side.

Plaid Silk Waists Priced \$6.95 Others up to \$25.00

We are showing plaid silk waists at as low a price as \$6.95; waists that are rich in color combinations that you will admire; waists that are approved of because they are smart, up-to-date, and very dressy.

Then there are many others. Some of the dainty white ground with delicate designs and shadings at \$8.75. Also a very large selection of plain and hand embroidered linen waists.

EASTON CHURCH TO HAVE SONG SERVICE

The Easton M. E. church will have a song service tonight in place of the regular preaching service. Rev. R. H. Coombs, the pastor, is attending the annual conference of the Southern California district of the Methodist church, being held in Los Angeles. The singing is a part of the program tonight.

Dear Mildred:
Mrs. Williams wished me to say that the visitors' private booth proved such a great success during Fashion Show week she has decided to make it a regular thing, so hereafter when you want to jump up, make use of the visitors' booth. You will be perfectly welcome at the Unique Hair Dressing Parlors, 104 E. Elderly Block. Lovingly,
BLANCHIE.

Financing the Farmer

The farmer's business often needs a little extra financial backing if it is to grow and prosper.

"That is one reason why he should have a strong and willing bank behind him."

It is an important function of this bank to give temporary assistance to farmers who seek it of us, and who have demonstrated their ability to repay obligations when due.

The best way to establish a credit here is to carry an account with us, and we cordially invite not only the farmer but every one who wants to gain ground financially to do so.

1915 MARIPOSA STREET

A Car Load of Peerless Stoves and Ranges

Has just been unloaded into our warehouse.

The PEERLESS has been handled exclusively by us for the past six years and the demand has become so great from the recommendation of their many satisfied users that we are now buying them by the car load.

They are substantially built of heavy hard rolled blue steel plate, are asbestos lined, handsomely nickel-plated, require little fuel and look perfectly. Can any more be asked?

Stoves start at \$19.50—Ranges at \$24.00.

Fisher-Glassford Hardware Co.
1932 TULARE ST.

THE DANDRUFF GERM

And the Guinea Pig

When Drs. Lassar and Bishop made a roundup by visiting scenes of dandruff and cascadia, which they afterwards rubbed on a guinea pig, they were contributing to science more than they knew. The application of the salve caused the pig to lose its hair and become bald.

This was merely one of the preliminary steps which made possible the discovery of Neobee's Herpicide. After establishing beyond question the existence of the dandruff germ, a remedy was needed to kill this parasite.

There was nothing which would do this until Neobee's Herpicide was placed upon the market. Being the first recognized remedy for dandruff, it has long been called the "original remedy." Herpicide kills the germ, prevents scaling hair and stops itching of the scalp. Don't take a substitute; you can always get the genuine article. Herpicide is for sale at drug stores. Applications may be obtained at good barber shops.

One dollar size bottles are guaranteed. Send 10c in postage or silver for sample and booklet to The Herpicide Co., Dept. R., Detroit, Mich. San Joaquin Drug Co., Special Agents.

AMENDMENTS

In ten days, the people of California will be called on to vote on twenty-three constitutional amendments, a few of which have been very fully discussed, and the rest of which have been discussed scarcely at all. The Republican has printed one article, analyzing the general scope and relations of the amendments. Today it presents a statement of the amendments separately, in the order they appear on the ballot, with an explanation of the exact effect of each amendment and the principal arguments in regard to it. A little later, the sample ballot will be printed, in all its unadorned simplicity, and alongside it this explanation of the meaning of the amendments, so that the voters can study the two together. More detailed discussions of important individual amendments will also be printed, to the end that the voters may have all available information on which to base an intelligent judgment.

The amendments, in order, are as follows:

1. (Senate No. 2) WEIGHTS AND MEASURES.

Transfers control of weights and measures from local to state authority.

ARGUMENTS. Local authorities have exercised their present right of control, and never effectively. If local control could be made effective, it would be far more expensive than unified state control.

Vote—Senate, 36 to 0; Assembly, 56 to 0.

2. (Senate No. 5) COUNTY CHARTERS.

Permits counties to frame charters as cities now do. Requires supervisors to be elective, but permits other officers to be made elective or appointive and their compensation to be fixed in the charter.

ARGUMENTS. (1) Gives counties home rule. (2) Does away with the present "county government act," which receives no responsible consideration either at home or in Sacramento. (3) Permits counties, if they desire, to try the short ballot, commission government, or other modern devices already tested in cities.

Vote—Senate, 23 to 2; Assembly, 59 to 5.

3. (Senate No. 6) DIVIDED SESSION.

Provides for a first short session of the legislature, only for the introduction of bills; then for a recess of at least thirty days; and then for a main session, for consideration and action, but not introduction.

ARGUMENTS. Provides opportunity for mature consideration of legislation by the electors, by the people, and in the newspapers. Objections are that it would be inconvenient to the legislature, thereby making it harder to get good men to run, and that the mature consideration which theoretically might be given would not actually be given.

Vote—Senate, 36 to 2; Assembly, 56 to 22.

4. (Senate No. 8) WOMEN SUFFRAGE.

Omits the word "male" from the qualifications for voting.

ARGUMENTS. Too familiar to need explanation.

Vote—Senate 55 to 5; Assembly 65 to 12.

5. (Senate No. 17) LOGGING RAILROADS.

Provides that logging railroads may condemn rights of way the same as other railroads, but must become common carriers if they do.

ARGUMENTS. Will enable owners of timber land, surrounded by other owners desiring to monopolize, to get out their timber; but if they do they must haul for all other persons as well as themselves. Said to be necessary to meet a practical situation, especially in Humboldt county.

Vote—Senate 31 to 0; Assembly 61 to 6.

6. (Senate No. 20) CITY CHARTERS.

Clarifies procedure for freeholders' charters; requires council to submit amendments on sufficient petition; extends time for preparation of new charter from 90 to 120 days; permits charter to be submitted to legislature at extra as well as regular session; and permits borough-system charters.

ARGUMENTS. An obviously important clarification and extension of the existing rules of charter procedure. The only argument advanced against it is that the procedure is so detailed that it might be easy to some minor objection to invalidate the whole action. This objection applies as well to the present procedure. The proposed procedure is no more complete in details, and is in all other respects better.

Vote—Senate 28 to 1; Assembly 65 to 0.

7. (Senate No. 22) INITIATIVE AND REFERENDUM.

Provides that on a 5 or 8 per cent petition in the state, or on a 15 per cent petition in cities, measures may be submitted to the people, or to the legislature, for enactment; or measures passed by the legislature may be referred to the people for ratification or rejection.

ARGUMENTS. Too familiar to need explanation.

Vote—Senate 33 to 1; Assembly 72 to 6.

8. (Senate No. 23) Recall.

Provides that on a 12 per cent petition in the state, or a 25 per cent petition in cities, the question of the removal of any elective officer may be submitted to the people. At the same election the names of candidates may be submitted, and if a majority of all the voters vote to recall the officer, then the candidate receiving the highest vote shall be elected in his place.

ARGUMENTS. The only objection

raised to this amendment is the failure to make elected judges an exception to its general provision regarding elective officials. Arguments on both sides of this objection too familiar to need explanation.

Vote—Senate, 36 to 4; Assembly, 70 to 10.

9. (Senate No. 26) LEGAL TECHNICALITIES.

Prevents reversal of criminal cases for technical errors unless upon an examination of the entire cause, including the evidence, the court shall be of the opinion that the error complained of has resulted in a miscarriage of justice.

ARGUMENTS. A very important amendment absolutely revolutionizing our process of appeal in criminal cases. It will make our courts, courts of justice, instead of umpires in a legal game of wits.

Vote—Senate 34 to 0; Assembly 55 to 0.

10. (Senate No. 32) EMPLOYERS' LIABILITY.

Extends the authority of the legislature in the matter of liability laws so that it may create and enforce a liability on the part of all employers to compensate their employees for any injury incurred in the course of employment, irrespective of the fault of either party, and may provide for the settlement of disputes under this section by an industrial accident board.

ARGUMENTS. All European countries already have laws, and many American states are now passing laws, tending to put the money part of the human injury in an extremely just way. The property risk now is on the business itself—to be equalized by insurance and indirectly charged to the consumer just as other risks are. An optional law to this effect was passed by the last legislature. The only argument offered to this amendment is that if the legislature should go in one step the full way permitted by it, without any limitations or safeguards of the rights of the employer, it might be going too far. There is no reason to suppose that any legislature could go to the extreme of making it so that when powers are conferred on a legislature they should be liberal, leaving to the legislative judgment (tempered by the referendum) how far to exercise them. A very important and meritorious amendment.

Vote—Senate 27 to 0; Assembly (not at hand).

11. (Senate No. 45) CIVIL SERVICE TENURE.

Makes certain that the constitutionality of state or local civil service reform laws will not be affected by the general constitutional provision fixing terms of office at four years.

ARGUMENTS. If we are to have the merit system at all, with the intermediate tenure "during good behavior" of clerical and other subordinate employees, this is an obviously necessary protection against the invalidation of such laws.

Vote—Senate 35 to 0; Assembly 55 to 7.

12. (Senate No. 47) RAILROAD COMMISSION.

Extends authority of the legislature to confer powers on the railroad commission, especially the power to regulate service as well as rates, and to enlarge its jurisdiction to include other public service corporations, as well as railroads.

ARGUMENTS. The first of a series of three very important amendments (the others are bills Nos. 16 and 23) to make the railroad commission what its founders intended it to be, and to utilize it for the general control of public utilities, will require a separate article for full discussion.

Vote—Senate 39 to 1; Assembly 58 to 1.

13. (Senate No. 48) CITY OFFICIALS.

Gives city charters greater control of police judges, boards of education and other municipal officers, etc.

ARGUMENTS. Necessary to validate recent amendments to San Francisco charter. Unobjectionable from any standpoint.

Vote—Senate 33 to 0; Assembly 63 to 0.

14. (Senate No. 49) PUBLIC UTILITIES.

Extends power of municipalities over public utilities.

ARGUMENTS. Clarifies general powers of city; makes necessary provisions in connection with the Los Angeles Owens River aqueduct; and repeals present provision permitting leasing of streets without city's consent. The first test this last provision might be construed as giving value to a utility franchise, which could be included in the capital on which they may earn money. An improbable construction of an otherwise excellent and needed amendment.

Vote—Senate 28 to 0; Assembly 54 to 0.

15. (Assembly No. 2) TEXT BOOKS.

Makes explicit the present prohibition of frequent changes of text books.

ARGUMENTS. An obviously proper amendment, necessary to protect the spirit of the existing law against possible reversal by the courts.

Vote—Senate 25 to 0; Assembly 51 to 0.

16. (Assembly No. 6) RAILROAD COMMISSION.

Increases membership from three to five and term from four to six years; two to go out of office each year; makes members appointive; and increases jurisdiction to include service and facilities.

ARGUMENTS. The second of the three important railroad commission amendments, to be discussed separately.

Vote—Senate 23 to 0; Assembly 63 to 0.

17. (Assembly No. 25) MAJORITY VOTE.

Makes certain the constitutionality of the "majority vote" provisions of the charters of San Francisco, Berkeley, Los Angeles, and any cities which may adopt such charters.

ARGUMENTS. An obviously needed and meritorious amendment.

Vote—Senate 33 to 0; Assembly 61 to 0.

18. (Assembly No. 28) JUSTICE COURTS.

Permits legislature to supplant present system of justices of the peace by some other form of inferior courts, and abolishes the fee system.

ARGUMENTS. It is planned, if this amendment passes, to introduce a bill providing for a county justice court, of trained judges, sitting successively in the various townships. Fresno county's justice courts now cost the

county \$12,000 a year, as against \$5,000 for the Superior court. Less money under the new system, would give far better service.

Vote—Senate 25 to 0; Assembly 61 to 0.

19. (Assembly No. 28) RAILROAD PASSES.

Provides that railroads may give passes to officers and employees of the railroad commission and to peace officers.

ARGUMENTS. The constitution now gives passes to the railroad commissioners, whose duties include a large amount of travel over the railroads under their charge. This amendment makes it clear that the permission applies also to their secretary and attorney, who must often travel with them. The objection has been raised to the "peace officer" provision, that it would enable any politician, or anybody to get a pass, by simply getting himself appointed a deputy constable without pay. If the amendment were self-enacting, this objection would be fatal. As the question will still be subject to regulation by legislation, no such extreme latitude is ever likely to be allowed. It is not in any case a very important amendment.

Vote—Senate 33 to 0; Assembly 62 to 0.

20. (Assembly No. 33) CLERK SUPREME COURT.

Makes the office of clerk of the Supreme Court appointive.

ARGUMENTS. The first measure to shorten the California state ballot. To elect the clerk of the Supreme Court by the vote of the whole people is ridiculous. He should be appointed by the court. This amendment is favored by the present clerk, and by the court.

Vote—Senate 25 to 1; Assembly 61 to 3.

21. (Assembly No. 26) COURTS OF APPEAL.

Makes judges of district courts of appeal subject to impeachment the same as other judges.

ARGUMENTS. Simply remedies an accidental omission in the section of the constitution by which these courts were established.

Vote—Senate 27 to 0; Assembly 60 to 0.

22. (Assembly No. 48) TAX EXEMPTION.

Exempts from taxation \$1000 of the property of veterans of any war, or their dependent relatives.

ARGUMENTS. There is no excuse for submitting this amendment except a good-natured desire to do a favor to the old soldiers. The same good nature will probably pass it, though it is pernicious in principle. Practically, it will not make much difference.

Vote—Senate 27 to 0; Assembly 60 to 0.

23. (Assembly No. 50) RAILROAD COMMISSION.

Reverses Fresno Rate Case; requires permission of commission before any rates are raised; makes long and short haul rule same as inter-state commerce law; and gives commission authority over excursion tickets, refunds, etc.

ARGUMENTS. The last of the three important railroad commission amendments (bills Nos. 12, 16 and 23) to be separately discussed. They constitute one group, and it is important to pass all three.

Vote—Senate 39 to 0; Assembly 57 to 0.

REEDLEY OBJECTS TO STATE ROAD ROUTING

Petition to Recall County Board Is Out; Hughes Sends in Resignation.

The town people of Reedley want the recall on the county commissioners on the state highway, and have signed a petition to be presented to the supervisors tomorrow asking for the revocation or removal of the members of the commission appointed by the board. J. E. Hughes having learned that such a petition is out, forestalled the filing of the petition and as one of the commissioners sent in his resignation to the supervisors yesterday.

The people of Reedley were before the supervisors last week asking for a state highway route which should skirt along the orange belt on the east side from Sutter, around Reedley, the Wahioke and Mount Campbell territory to the Tulare county line. This particular deflection was inspired by the supervisors in the suggested second or alternative routing of the state highway, and at the southern end was mapped out a turn south of Fowler along the Reedley road passing the town on the outskirts and heading for Dinuba on the county line.

The county commissioners reported in favor of a route paralleling the railroad on the theory that the state commission will only chose the direct and most feasible line. Commissioners Shadashus, Dickinson and Dickinson strongly urged this route for the reason stated. Commissioner Hughes voted so also, but he afterwards explained he was talked into the belief of a railroad parallel direct line or no state highway through the valley.

The supervisors recommended the parallel line as one route and a second alternative route, skirting the edge of the Reedley valley and including Reedley, Sutter, Fowler, along the railroad and deflection south of Fowler.

The Reedley people fear, it is said, that the commissioners may influence the state board to continue the southern routing via Selma and Kingsburg and leave Reedley altogether out of the routing.

George J. Roeding, the fifth county commissioner, has not participated in any of the deliberations over the state highway.

FOURTEEN MINERS NOT YET RELEASED

FAIRBANKS, Alaska, Sept. 29.—City Wireless.—The fourteen miners who have been imprisoned in the Shublik placer gold mine on Dunas Creek since last Wednesday, are alive, well and cheerful, but will be kept in their dungeons at least three days longer. Last night at midnight the drill sunk from the surface broke through into the drift in which the men are confined, and food, drink, underclothing, matches, candles, tobacco and newspapers were lowered through the six inch hole to the captives.

The supervisors recommended the parallel line as one route and a second alternative route, skirting the edge of the Reedley valley and including Reedley, Sutter, Fowler, along the railroad and deflection south of Fowler.

The Reedley people fear, it is said, that the commissioners may influence the state board to continue the southern routing via Selma and Kingsburg and leave Reedley altogether out of the routing.

George J. Roeding, the fifth county commissioner, has not participated in any of the deliberations over the state highway.

WASHINGTON AND LINCOLN AS OPPONENTS OF BLOODY WAR

In this holy work of insisting upon arbitration, surely we may expect the aid and women of St. Andrews, of all Universities and other educational institutions, of all the churches and of all the professions to unite and take a prominent part. I quoted the words of Washington at the beginning of this article. Let me close by quoting the words of Lincoln. When a young man, employed upon a trading boat, he made a voyage of some weeks' duration upon the Mississippi. He visited a slave market, where men, women and children were not slaughtered, as formerly in war, but were separated and sold from the auction block. His companion tells that after standing for some time Lincoln turned and walked silently away. Lifting his clenched hand, his first words were, "I'll ever get a renegade out of this accursed thing." Many years passed, during which he never failed to stand forth as the bitter foe of slavery and the champion of the slave. This was true in the paramount issue. It was true to his resolve throughout life, and in the course of events his time came at last. This poor, young, tolling boatman became President of the United States, and was privileged with a stroke of his pen to emancipate the slaves last remaining in the civilized world, four millions in number. He kept the faith, and gave the lesson for all of us in our day, who have still with us war in all its enormity, many of us more or less ignorant of the cause, and as it does, let us hit accursed war hard until we drive it from the civilized world, as he did slavery. Andrew Carnegie in closing address as rector of St. Andrews University.

POLICEMEN ASKED TO USE BUTTONS ON THEIR COATS

Military Training of Chief Jones Leads to Order to His Officers.

Carrying out his military training, Chief of Police Jones yesterday notified the police officers of the city that while on duty and in uniform, they must have all the buttons on their coats buttoned. In the past, the officers have sometimes walked their beats with one or more buttons in use out from this time on they will have to abide by the police command and keep all buttons on their coats in use. This rule will not be enforced in the summer time and the patrolmen will be permitted to patrol their beats with only the top button buttoned.

Chief Jones, in ordering the officers to follow the military idea, called their attention to rule 23 in the police manual.

The police chief also requested the officers to closely read rules 56 and 57 of the police manual. These rules prohibit all patrolmen from making assertions or remarks about their brother officers. These rules will be strictly enforced by Chief Jones so that there will be harmony among the peace officers. Any officer disobeying the rules is subject to dismissal.

150 MEN HIRED TO GUARD BRIDGES IN THIS DISTRICT

STOCKTON, Sept. 30.—It is reported tonight that the Southern Pacific officials have employed 150 men to serve as watchmen and that they will be stationed at railroad bridges within this district. The local headquarters is receiving bulletins from various points hourly and the officials are optimistic. Two out of twenty-six men affected walked out today at the local shops.

PERSIAN REBEL AGAIN DEFEATED

TEHRAN, Sept. 30.—In a second battle Salar M. Fawzi, brother of the deposed shah, has lost two hundred killed and wounded and 400 guns. A detachment of one thousand of the best cavalry in the government forces is in pursuit.

THE LOCKWOOD System of Painless Dentistry

LECTURE No. 5.

I am going to tell you of my qualifications as a dentist. I graduated in 1892 from the New York College of Dentistry. The LEADING dental college in the world, and recognized as such in the East and Europe. In my class when I attended this school were students from South America, from Cuba, from the Central American countries of the globe. In the different classes nearly every state in the United States was represented. Its standard today as in 1892 is the highest of any dental educational institution in America. Its educational requirements for admission were then and are now, higher than any like institution in the United States. Its diploma signifies that its possessor is a THOROUGHLY QUALIFIED DENTIST. After graduating I was associated for some time with dentists that were recognized leaders—from them I absorbed some valuable knowledge on dentistry. After this for 17 years I have enjoyed a large and lucrative practice. A person seeking my advice on any matter pertaining to dentistry will have the judgment of a dentist WHO KNOWS what he is talking about.

I DON'T have to GUESS whether this way or that is the proper thing to do, I KNOW, because I have passed the experimental stage. Remember, with MY SYSTEM of dentistry WITHOUT PAIN, I FILL, CROWN, REMOVE A NERVE, do ALL the various kinds of bridgework, EXTRACT, in fact perform ALL operations in modern dentistry ABSOLUTELY WITHOUT PAIN. Also bear in mind that the medicinal agents that I employ to subdue ALL sensation (in the tooth) contain NOTHING that is in the slightest degree injurious to the weakest constitution, besides, being applied locally to the tooth, it cannot enter the general system. My prices are reasonable; no more than any capable dentist would charge.

A. T. LOCKWOOD, D. D. S.

WOMAN TAKES POISON BY MISTAKE, IS SAVED

Mrs. Jacobs of Vendome Hotel Drinks Corrosive Sublimite in Water.

HANFORD, Sept. 30.—Mrs. K. E. Jacobs, for many years proprietress of the Vendome hotel in this city, had a narrow escape from death by poisoning last evening. She overworked during fair week and feeling in a run down condition she thought she would take a dose of medicine. She took a bottle of medicine, however, instead of taking the medicine, she poured out a teaspoonful of corrosive sublimate, contained in a glass of water as the directions for her medicine dictated, she drank nearly all of the mixture before the burning in her throat informed her that she had made a mistake. She called her son-in-law, Dr. Weiler, who was visiting in the house and he, after administering an emetic and first aid, called Dr. W. B. Charles into immediate consultation. The two physicians worked over the patient for several hours and the result was that she was considered practically, though not surely out of danger today. The many friends of the popular hostess were very apprehensive last night.

BAND CONCERT IN PARK.
PORTERVILLE, Sept. 30.—Tomorrow at Luther Burbank park the Porterville band will give the first of a series of Sunday afternoon concerts. Considerable work has been done on the park this summer and it is now said to rank with the best of its kind in this state.

VISALIA NEWS NOTES

VISALIA, Sept. 30.—Thomas H. East, one of the old timers of this section and well known all over the valley, has been taken to the Fallbrook Home in Los Angeles, where he will remain while recovering from the effects of injuries sustained in a runaway over a year ago. Mr. East has been helped ever since the accident, but is now recovering somewhat and it was decided to move him South, where it is thought he will soon recover altogether. Mr. East has spent the greater part of his life in Escham Valley.

A suit to recover on a seventeen head of cattle or their equivalent in money, \$1200, has been brought by Edward Patterson of Tulare in the Superior Court against W. A. Eden. It is claimed that the defendant has possession of the cattle and is holding them unlawfully.

A petition for letters of administration in the estate of Eddie H. Smith, has been filed by George W. Smith, a brother. The estate is small, consisting of real and personal property valued at \$160.

The Visalia Tennis club has purchased lots and will soon construct a cement court. The club has been formed with a large number of enthusiastic members and the sport will probably attract considerable attention this coming spring.

SET STEEL POWER POLES.
PORTERVILLE, Sept. 30.—Work is to be started shortly upon the replacing of all the power wire poles on Sunday, with steel poles. Officials of the company state that these towers will be placed just within the property line and hereafter the addition of wires to the string will not necessitate the pruning or disturbing of any of the shade trees. As these trees have cost time and money to the property owners this announcement has been greeted with extreme satisfaction.

HENEY AT HANFORD.
HANFORD, Sept. 30.—Francis J. Heney stopped today on his way through to Tulare, where he spoke tonight and attended the Kings county fair. He appeared in an auto before the grand stand with Marshal Stinson of Los Angeles, B. Grant Taylor of San Francisco, clerk of the supreme court, A. W. Taylor of Hanford, and H. E. Wright of Hanford. He was loudly cheered but did not speak.

PERSONALS IN NEWS FROM THE TOWNS OF CENTRAL CALIFORNIA

HANFORD

HANFORD, Sept. 30.—E. P. Dewey and son, Stephen of Sanger, are here visiting the former's brother, F. V. Dewey, for a few days.

Rev. R. C. Wann of Lemoore returned yesterday from Oakdale, where he has been for a few days.

Professor Omer Abbott, principal of the Coalinga high school, is here today.

Miss Orr and Miss L. Dawson, connected with the local school department, went to Fresno this morning.

ment, went to Hanford last evening to spend Saturday and Sunday.

James Dearn, an official of the Caribou Oil Company, was an arrival this morning and will remain here for several days visiting the property.

Miss Jean Archibald, who is studying music in Fresno, returned on the late train last night and will spend Sunday with W. H. Christman and family.

W. R. Hamilton and Ralph Arnold spent yesterday in Coalinga and the Kettleman Hills.

William Schell, formerly head driller on the Bohemian well in the South field, left last night for New York, from which place he will take a steamer for South America. Schell has accepted a position in the oil fields of Colombia.

Rudolph H. and Robert R. Pollak were arrivals this morning on the 9:30 train from San Francisco. The Pollaks are interested in the Canadian-Coalinga Oil Company and are here to visit the well that was drilled into the oil sands in the South field last week.

SANGER RED MEN PROVE JOLLY HOSTS

SANGER, Sept. 30.—The Red Men entertainment last evening in the Sanger hall, was a jolly one. The program represented some of the best local talent to be had and the banquet was one of the best ever prepared in Sanger. Young's concert orchestra opened the meeting with a selection and was followed by the program as follows:

Instrumental solo.....Johnny Hooper.
Address.....Miss Atkinson.
U. S. Book, Editor of the Sanger News Selection.....Orchestra.
Address....."Paternalism".....Rev. Allen.
Instrumental solo.....Miss Davis.
Address.....Attorney Howett.
Selection.....Orchestra.

After the program the large crowd was seated at the banquet tables. The Sanger tribe was invited, but no members of that lodge were present. After the program over a dozen applications for membership were received.

The Sanger Telephone Company has uninterrupted communication to Hume now that the Hume-Bennett Lumber Company's line. Formerly it was necessary to make transfers, but now it is not. The company will start a line to Bobtown next week.

Orlo Hayward of Sanger went to Fresno today on business.

Attorney Howett of Sanger, who has been in Fresno about a week, returned yesterday.

CONTINUED UNSETTLED WEATHER IS FORECAST

Possibility of Rainfall Continues, According to Forecaster.

Continued unsettled weather was the menu passed out yesterday by local Forecaster Bennett, and he advised that growers go slow about unstacking crops, as there is a possibility of a rain blowing up. After a warm day yesterday, the wind blew up after midnight and the weather turned perceptibly cooler. Unsettled conditions were reported from all over northern California yesterday.

SANGER MANDAMUS CASE POSTPONED

Judge Church Intimates City Clerk's Contention Is Not an Argument.

Judge Church postponed yesterday until Wednesday morning the hearing on the application of W. F. Hanke for mandamus to compel the city clerk of Sanger to certify as legally sufficient the petition to a committee for an election of the saloon licensing proposition. The postponement was at the request of the town authorities through the city attorney that he has not had time in three days to verify the election return figures set out in the petition. Judge Church granting the request for the continuance stated that the certification of the city clerk that no election for governor has been held since the incorporation of Sanger is no argument that there has been no election in the territory now covered by the city. The petitioner asserts that he has on his petition signatures in number greater by 25 per cent than the law requires as covering an incorporated town site.

MIDWAY UNION IS TO START UP WORK

BAKERSFIELD, Sept. 30.—The Midway Union Oil Company is making ready to start on its No. 1 well on section 28, 22-21-4. Work was stopped at 2,800 feet owing to lack of funds and an assessment has remedied this difficulty. The Midway Union property is not far distant from the Standard gas field and a good well is looked for at 3,000 feet.

The Midway Southern Oil Company, operating on section 4, 11-23, is drilling No. 2 well with a rotary and is down about 1,700 feet; a rotary is being used for No. 1 well which is now down nearly 1,000 feet.

The Elora Oil Company on section 32, 12-22 is using a rotary in No. 2 well. No. 1 well, recently brought in, is making about 500 or 600 barrels a day.

The Midway Oil Company, operating on section 30, 12-22, is down 600 feet with No. 1 well.

The Kern Trading & Oil Company is buying trouble checking the heavy gas pressure in No. 22 well, in order that the well may be completed properly. It looks at times as though they would gain control when another gas well, No. 23, will be started. No. 25 is a short distance away on the boundary line of sections 31 and 32, 12-22.

If they ache and are sore and tender, S. B. Corn Paint will set them right, only at Smith Bros.

BOY IS INJURED IN COASTING HILL

PORTERVILLE, Sept. 30.—James Mathis, 15-year-old son of E. C. Mathis, an orange grower of Globe district, was found unconscious at the foot of the Globe hill on the Springfield road this morning, suffering from a possible concussion of the brain, the result of being thrown from his bicycle with which he was coasting the hill on his way to Porterville.

Mathis was found by J. E. McCutcheon, also Globe rancher, who was driving home. McCutcheon took the lad to his home and a physician was summoned. He was still unconscious when Dr. S. A. Barber arrived from Porterville. When Mathis recovered consciousness an hour later, it was only to relapse into a delirium.

YOUNG MEN FIGHT; BOTH ARE JAILED

Because they refused to stop fighting after they had been warned by Patrolman Hardinbrook, James Smith, aged 27, and D. Burton, aged 19, were arrested last night by Sergeant Coyne and Patrolman Hardinbrook and charged with disturbing the peace.

The young men engaged in a fist fight in the alley between H and I streets on Tulare street. They were later released on an order from Justice of the Peace Smith.

CALLS CONFERENCE OF HEALTH OFFICERS

State Board Asks That Doctors Attending Be Given Railroad Fare.

The supervisors and also the city trustees have been officially notified by Secretary W. E. Snow of the state board of health that the board has called for the 23rd to the 27th of October at Santa Barbara the second annual conference of state, county and municipal health officers. The health officers of every county and incorporated city or town in the state has been invited to attend. The special purpose of the notification is stated to be to recommend to the proper authorities in view of the small compensation paid to health officers and the benefit to their communities resulting from these conferences on uniform methods of health administration that the traveling expenses of the officers be paid by county or city. Last year this was done for about one-half of the health officers attending.

CERTIFICATES ARE GRANTED TEACHERS

The county board of education in session yesterday commenced work in preparing the questions for the first grammar grade examinations this term to be held on the 20th inst. The board also granted certificates to teach on credentials to the following named teachers:

G. N. Steyer, Jean Wilson, and Lulu H. Plake, high school.

Birdie Appleby, Marguerite Smith, Mrs. Lee R. Long, Mrs. L. Poff and Maritza Ledyard, grammar grade.

CONSTITUTIONAL AMENDMENTS

XII. (A) Employers' Liability; (B) Majority Vote; (C) Justice Courts.

(By FRANKLIN HICHBORN.)

The question of employers' liability and workmen's compensation is commanding the attention which its importance warrants. Congress has recently passed radical measures to take the burden of the risk of injury of the workman, where, largely through court decisions, it has been placed. The aim is, not to shift this burden to the employer, but to make the risk of accident part of the cost of production, precisely as the fire risk has been made part of the cost of production.

Not only is Congress wrestling with the problem, but the legislatures of many States—all under the serious handicap of adverse court decisions, which tax the ingenuity of legislators to overcome—have, within the last few years, taken the subject up.

The California Republicans in their 1910 state platform, pledged their legislative nominees to the passage of "an employers liability act which shall put on the industry the charges of its risks to human life and limb along the lines recommended by Theodore Roosevelt."

The legislature attempted the passage of such a law, and did put an act on the statute books in compliance with this pledge. But from the beginning difficulties were encountered because of adverse court rulings, although it is held that the California law, because of elective, instead of compulsory provisions, will meet the court tests. But that nothing in the

state constitution could hold against such legislation, a constitutional amendment authorizing such a law has been submitted to the people. The proposed amendment is known as Senate Constitutional Amendment 32 and reads as follows:

"The legislature may by appropriate legislation create and enforce a liability on the part of all employers to compensate their employees for any injury incurred by the said employees in the course of their employment, irrespective of the fault of either party. The legislature may provide for the settlement of any disputes arising under the legislation contemplated by this section, by arbitration, or by an industrial accident board, by the courts, or by either any or all of these agencies, anything in this constitution to the contrary notwithstanding."

The ratification of this amendment by the people will remove all question as to whether an employers' liability, or rather workmen's compensation act, can stand the state constitutional test. There remains the test of the federal constitution but that is beyond the reach of California voters. They can, however, authorize in their state constitution a workmen's compensation law, this they will do if they ratify Senate Constitutional Amendment 32.

In the senate, not a vote was cast against this amendment. Twenty-seven senators voted for it. In the assembly the vote was 54 for the amendment and three votes against it. The three negative votes were those of Cull, Chandler and Cogswell.

B.—THE MAJORITY VOTE.

Senate Constitutional Amendment No. 25 is intended to bring the state constitution up to the advances which have been made in the scheme of municipal government in California during the last decade.

Many cities—San Francisco, Santa Cruz, Vallejo, Modesto, for example—have adopted what is known as the Berkeley municipal election plan.

Under the Berkeley plan candidates for municipal office are named by petition or nominated by "sponsors," on a strictly non-partisan basis. If at the first, or primary election, the candidate receives a majority of the votes cast, then he is declared elected. If no candidate for a given office receives a majority vote, then the two candidates for each position to be filled who have received the highest vote become candidates at a second or final election, all other candidates being dropped.

The plan has worked out very satisfactorily, but there is some doubt as to how it might fare with the courts.

The ratification of the amendment will, however, remove all doubt on this score, for it provides specifically that cities or counties may by their charters require more than a plurality vote for the election of their officers.

There was no opposition to the amendment, either in the senate where thirty-three votes were cast for it, nor in the assembly where sixty-one members voted for it and none against.

C.—JUSTICE COURTS.

Assembly Constitutional Amendment

No. 26 authorizes the legislature to determine the number of justices of the peace, to be elected in the various townships and municipalities.

At present the number of justices are fixed by constitutional provision. The result has not been satisfactory. In some counties the justice courts are a heavier burden upon the taxpayers than the superior. The abuse of the fee system by justices has been one of the scandals of the state.

The proposed change in the constitution does away with the east-west division that a given number of justices must be elected in each township, leaving the legislature to make such provision as may be found necessary. The ratification of the amendment will legislate no man out of office. It will merely give the legislature power to increase the efficiency of the justice courts by granting it authority to make such changes in the justice courts in the several counties as may be found desirable.

The amendment was adopted by the senate by a vote of 28 to 0.

In the assembly, however, five members—Brown, Cunningham, Foster, Griffiths and Mulhally—voted against it. Fifty-seven assemblymen voted for it, however, and the amendment was submitted to the people.

DUMB FOR 7 YEARS, NEWS OF TRAGEDY RESTORES SPEECH

ALAMEDA, Cal., Sept. 30.—Speech returned to Mrs. Henry Baro, a helpess paralytic, for the first time in seven years yesterday, when she was told of the tragic death of her two daughters, Miss Minnie Roberts and Mrs. Adelle Gaudin, who were killed by an electric train Wednesday night. Trembling violently from the shock of the tragic news, the 50-year-old woman came from her bed where her daughter had placed her only a few moments before her death, and in a voice weak with emotion, asked for the details of the tragedy.

With their mother lying between life and death, the funeral of the two victims of the train accident was held this afternoon.

GERMAN BANK CLOSES.

BERLIN, Sept. 30.—There was a heavy break in the market today and the Goettinger Bank suspended. The directors express belief that the bank will be able to pay its depositors the \$750,000 due them. They say that the suspension was due to the difficult position of the money market. The bank's capital is \$500,000.

CONVICTS TO TEND STATE GAME FARM

SACRAMENTO, Sept. 30.—The game farm of the state fish and game commission will be an adjunct of the state penitentiary at Folsom, according to Commissioner Frank Newbern. The commission has secured grants a twenty-five year lease on land adjoining the prison and is confident of a good yielding to the state, as convicts will not only care for the birds, but raise vegetables with which to feed them.

OPPENHEIMER TO BE HEARD IN OCTOBER

Former Death Sentence to Be Adjudicated Before Recent Crime Is Tried.

SACRAMENTO, Sept. 30.—According to information coming from the attorney general's office, it is likely that the appeal case of Jack Oppenheimer, the convict in Folsom prison, who recently killed Francisco Gullala, will come up before the Supreme Court of the United States at the October term. This is the case by which it will be determined whether Oppenheimer shall bring for attempting to break prison. He has already been sentenced to hang by the lower courts, on provisions of the state law which places a penalty of death on prisoners who attempt to escape from state prisons. Oppenheimer has appealed to the Supreme Court on the ground that the law is unconstitutional. Attorney General Webb will most likely appear before the Supreme Court in Washington to argue the case. Then it will be submitted for decision. It is not thought that the decision will be rendered before December at the earliest.

Pending the outcome of this decision an attempt will be made to prosecute Oppenheimer for his latest crime.

FRUIT PICKERS

Tally tags carried in stock at the Fresno Republican Job Printing office.

SAVE YOUR HAIR; SAGE TEA WILL DO IT

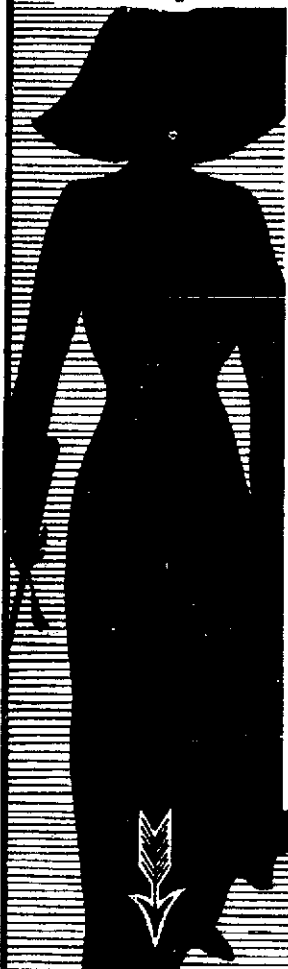

Dandruff, Itching Scalp and Falling Hair Quickly Stopped.

There is one place where baldheaded men shine, and that is in the front row seats of the theatre. If these baldheaded people had used Wyeth's Sage and Sulphur Hair Remedy in their earlier days they would not be so conspicuous now. This preparation does not plant new hair, but it does strengthen weak, dying hair, and not only brightens dull, parched hair, but gradually restores the color to faded or gray hair. It is a clean, wholesome hair dressing, which can be used daily with perfect safety.

Wyeth's Sage and Sulphur is sold under guarantee that the money will be refunded if it fails to do exactly as represented.

This preparation is offered to the public at fifty cents a bottle, and is recommended and sold by all druggists. Special Agent, Monroe Drug Co., 2002 Mariposa St.

Begin October 2nd To Prepare For A Good Position

There are dozens of good positions, not only in Fresno but in the smaller towns which we are requested to recommend students for. They want Heald's graduates because these young persons are fully equipped with the education to handle positions successfully. They apply at Heald's Fresno College because they prefer to get persons from the vicinity in which the work is. Young men and women who secure their instructions at the Fresno Heald's obtain positions in their own towns.

Classes are reorganized on the second of October and you should enter then, or as soon as possible thereafter. You will be among those who enter at this time and can take up the work with them.

There are Heald's colleges all over the state and the course of study is the same in all of them. If you enter at Fresno and should wish to transfer, you may do so without losing a day and without having to lose credits or make up work. You begin where you left off.

The school for you to enter is the one at Fresno because it is nearest your home and you will be among persons you know. In addition to that you will be able to obtain a position in or near your home town.

Enter now and be able to accept a position that will open a career of advancement for you. Be able to accept a position of this kind in the spring.

CLOTHING PROCLAMATION

Copyright 1911
The House of
Kuppenheimer
Chicago

Our complete stock of fall clothing has arrived, and is now ready for your inspection. There is a decided change this fall in cut, color and weave, a pleasing surprise in store for you, a little different to break the monotony, a change that you will welcome.

The new colors are brown, blue mixed, reddish browns, gay clays and blue serges. The browns predominate. We have them in every shade. The weaves come in honey comb, diagonals, fancy serges, worsteds and many other new ones for you to choose from.

The style this fall is two and three button models, semi-form fitting coats, high cut vest and peg or conservative cut pants. Kuppenheimer's suits are made on graceful lines that give shapeliness and flexibility to the figure, making a stylish and attractive garment. A bit different from the ordinary class of cloths.

Whether your taste runs towards the latest kinks or the more conservative style you will find exactly what you want here. We have a \$60,000 stock of clothing, all new and nobby, so you will be sure to get satisfied. The fabric is the best that can be had for the money, virgin pure wool, guaranteed not to fade. Every Kuppenheimer suit is hand finished, sewed with silk, reinforced seams throughout, best of trimmings obtainable. Each suit is cut by an expert cutter, so you can rest assured that you will get a perfect fit. In addition to this we have right here in the store two skilled tailors who do all our refitting to a perfection.

You Get a Tailor Fit at Half the Tailor's Price

The foregoing are the reasons why you should prefer a Kuppenheimer suit.

Stout Suits

We have a big assortment of every color; sizes from 38 to 50. No additional charge for extra sizes. Prices from \$12.50 to \$30. Alterations free.

Don't Worry
About the
Price

Slim Suits

The tall slim fellow who is looking for a suit, extra long coat with peg pants, at a price to fit his purse, will find the article right here. Our prices—\$12.50 to \$30.00

Supposing your friend is dressed like a Prince and paid a big price for it, one of our \$20.00 Kuppenheimer suits will put you in his class and you will be \$15.00 better off.

KUPPENHEIMER SUITS \$18.00 TO \$35.00—OTHER GOOD MAKES \$10.50 TO \$20.00

A few minutes of inspection of our stock will convince you of this fact. We have the largest assortment of men's clothing in San Joaquin Valley at prices from \$10.00 to \$40.00.

SOCIETY

Miss Geneva Ellis, of Alameda, one of the complimented guests at the Alexander reception on Saturday.

With the Fashion Show a thing of the past (though perhaps one to claim an important place in memory) and Penell Day over, a short breathing space will be allowed until another plunge into gaiety is made, when the annual County Fair will be on, with its interesting exhibits, and exciting horse races. Society is rousing itself, and clubdom is coming to life again after a summer's lapse into the background. The week's calendar is full of interesting events, besides club meetings, several receptions, weddings, "tea-fights," and a luncheon to conclude the week's festivities.

One of Fresno's most interesting visitors over the week-end is Miss Pamela Gearhart, of Pasadena, who is the house guest of her particular friend, Mrs. Evelyn Glenn Johnson, their friendship having been sealed at college when they both became members of the Gamma Phi Beta sorority. Miss Gearhart is undoubtedly a genius in the art of handling water colors, getting as much character and depth onto paper as is generally thought only possible through the medium of oils. She is a pupil of the far-famed Charles H. Woodbury, so prominent in New York art circles, and is a devotee of the "scrub" method of painting.

She is enroute from San Francisco, where she recently showed some of her pictures, and yesterday afternoon Mrs. Johnson asked a few friends in to admire the beautiful studies which she has with her. The studies have been chosen mostly in the southern country near Laguna, and up north in Tahoe, Humboldt county, and near Bolinas.

One of her most powerful is a glimpse of southern California foothills at the close of a warm day, the brown road with its borders of sun-burnt verdure stretching away to a single purple hill, half concealed with low hanging sea mist, and a yellowish sky brown with desert clouds from the inland.

An exceptionally lovely glimpse into the woodland is taken from a meadow near the Angora. Taken in Tahoe county. Others showed shadows of fir trees, a scene on the road to the Mission Capistrano, a bit of shade under the oaks, and a splendid glimpse of a rough sea, with a slough of angry foam.

Speaking of the rapid and wide growth of Los Angeles, Miss Gearhart spoke with great discouragement.

OH! THOSE GRAY HAIRS

Mr. BETHE HARRIS' 4-DAY HAIR COLOR is the only entirely successful and satisfactory preparation to STOP GRAY HAIR, simply and safely. Contains no lead, sulphur, or other harmful ingredients. Sold for twenty years, used and recommended by satisfied thousands. If "Bette" hair color has disappointed you, by this, it never fails. \$1.00. All druggists and

In regard to the "greater city" from an artist's standpoint.

"Oh, yes," she said, "I remember picking out one lovely bit of landscape, and the severe criticism to take my notes on it, and then when I went out to work it up, the graders had taken off the top of the hill!" Another pathetic instance was told in the selection of another composition ground, when she found to her amazement several days later that it had all been fenced off with chicken wire. "And chicken wire is simply horrible to climb!" The announcement that Miss Gearhart may come to Fresno later in the year, and give a real exhibition of her pictures should be received with much pleasure.

On Thursday night will be the opening of Mrs. W. D. Miller's Thursday Night Class for this season, being the beginning of the thirteenth year which the congenial group of Shakespeare enthusiasts have studied under their efficient instructor. Never before has the outlook been brighter than on this year's schedule of study which contains some original investigations in the work.

Mrs. Miller will talk on Thursday night on "Arnold Bennett's Mental Efficiency," and the succeeding meetings will be devoted to the study of Henrik Ibsen and the reading of his "Little Eyolf," "Hedda Gabler," "The Doll's House," "Peer Gynt," and "Brand," the latter two being considered the most important. Gerhart Hauptmann is to receive part of the time later in the year, "Hannele" and "The Sunken Bell" having been chosen. In conjunction with these two writers and their works will be taken up the subject of Teutonic mythology. Shakespeare is not to be neglected, by this class, which first started as a Shakespeare class, and so the canons are to be enjoyed. Dante's "New Life" and Mrs. Browning's "Sonnets from the Portuguese" precede the final work of the year which will be contained in the study of Euripides.

Mrs. W. S. Badger of San Francisco, is the guest of friends in Fresno, for some time, and will spend the day with Mrs. A. M. Miles and her daughter, Miss Ida Miles.

Mrs. Basset and son, Marcus Basset of Buffalo, New York, are spending the winter with the former's mother, Mrs. N. A. Craddock at the Casa Blanca vineyard.

On Tuesday night is scheduled another High School party, the hosts on this occasion being the Senior Class of the Normal, and the complemented guests, the Junior Class of the recently organized institution. All of the students of the school and also the faculty will be present.

The members of the Girls' Glee Club of the High School proved themselves most capable entertainers last night, when they complimented the members of the Boys' Glee Club and the High School orchestra.

The evening was devoted to the enjoyment of the vocal choruses, and some progressive games. Refreshments were served at the latter part of the evening.

Mrs. William McLaine of Bakersfield is the guest of her mother, Mrs. Stanton L. Carter, for a few days.

Miss Sallie Corner of Hanford is visiting Miss Minnie Marshall for a short while.

Mrs. A. J. Samuel returns to her home in Alameda, after a brief visit with her sister-in-law, Mrs. J. E. Edwards. Ford Samuel left yesterday for Modesto, where he will join a house party before returning to Alameda.

An announcement which will be of interest to the musical set, is that Mr. R. G. Burton has succeeded in booking an engagement of Miss Lillian Nordica for Wednesday evening, October 18th. Miss Nordica's last engagement in Fresno was necessarily cancelled, as her private car was burned in Los Angeles, and the celebrated diva suffered from the exposure, to which she was subjected, on account of the fire.

Quite the largest and one of the most important affairs of the coming week is the reception which will be presided over by Mrs. H. H. Alexander, at her spacious home on Fortieth, complimenting several interesting out of town guests, among them being Mrs. S. H. Quinby of Newcastle, who was so charmingly feted on her visit to Fresno last season. Mrs. Harry Green of Berkeley, and the hostess' niece, Miss Geneva Ellis of Alameda.

About two hundred invitations have been extended, and a delightful opportunity will be offered to great old as well as the new friends, after so long a cessation of things strenuous in a social way.

Mrs. H. H. Alexander, who will be the hostess at a large reception on Saturday.

In the receiving line with Mrs. Alexander will be Mrs. S. H. Quinby, of Newcastle; Mrs. A. E. Clark, Mrs. J. N. Bodick, Mrs. J. S. Jones, Mrs. H. V. Rudy, Mrs. George L. Warlow, Miss Geneva Ellis, of Alameda, Mrs. T. M. Hayden, Mrs. J. M. Collier and Mrs. Harry Green, of Berkeley. In the dining room Miss Prada Alexander, her young daughter of the house, will be assisted by Misses Jenny Wilson, Marjorie Harris, Edith Hayden, George Clark, Eva Clark, Mary Osburn and Pearl Swanton.

Mrs. Edward A. Elliott has issued invitations for a luncheon on next Saturday to be given in honor of her niece, Miss Mabel Bacon, who is her house guest for several weeks. The hospitality of the English home is being anticipated, and the event is being anticipated with more than usual pleasure.

John D. Byrne of San Francisco, is a Fresno visitor for several days. Mr. Byrne is prominent in the social circles of San Francisco, and is a popular member of the Ned Greenway skating club.

Among the most interesting news among the younger set is that Miss Edith Hayden is to join Dr. and Mrs. Harry J. Craycroft and Miss Edith Shaver in their trip abroad. The party will sail from New York on the 15th of October, and from England Miss Hayden will precede them to Germany, where she will continue her college course. Dr. Craycroft is to devote part of his time studying with medical authorities in England, and later they will go to Germany, where he will continue his research. Mrs. Craycroft and Miss Shaver are planning many interesting side trips.

Two weddings which are scheduled for this week are creating no little interest, the first one being that of Miss Inez Jewett and Elwyn Little, of Los Angeles, which occurs on Tuesday night at the home of the bride's sister, Mrs. Scott McKay, on Clark street.

Miss Jewett has chosen for her maid of honor, Miss Marjorie Little, the groom's sister, and a member of the Pi Beta Phi sorority, of which Miss Jewett also is a member. J. R. Whittemore, a college chum from Stanford, is to support the groom as best man and the Rev. A. D. Smith will tie the nuptial knot. Little Misses Eloise Webster and Helen Lois McKay, the nieces of Miss Jewett, will make dainty ribbon bearers.

Among the out of town guests will be Mrs. George E. Little of Los Angeles, Miss Jaqueline Little, Miss E. V. Hadley, all of Los Angeles, and Miss Della Thompson, a "Pi Phi" sorority sister from Stanford, and Mr. and Mrs. Geo. D. Jorvel, who have recently returned from an extensive eastern tour.

On Saturday evening, at the First Presbyterian church, will be solemnized the nuptials of Miss Edith Ingels, and A. Rae Condit, of Kansas City, Rev. Thomas Boyd officiating. The chosen attendants are Miss Charlotte Smith, of Stanford, who will serve as the first bridesmaid, and the groom's brother will act in the capacity of best man. A pretty sentiment is being observed in the choice of this date, as it is also the wedding anniversary of both the mother and grandmother of the dainty bride.

Mrs. P. Talent and Edgar Epler of Hanford have been the guests of Mr. and Mrs. George L. Warlow over the end of the week, enjoying the finale of the Fashion Show, and the governor's reception at the Hughes.

Mrs. Montgomery Thomas is to entertain the active members of the Fresno Musical Club on Thursday afternoon, at her pretty home on L street, from 2 until 5 o'clock. An interest is to be taken in the work for the coming season and probably the hostess, who is exceedingly talented, will add to the pleasures of the afternoon with some vocal numbers. Several new active members have been received into the club membership, Mrs. W. E. Durfee, Miss Ruth Ford, and Miss Julia Harris, the latter being the only active member who has passed the examinations, admitted her to membership as both a pianist and vocalist.

The first Home Day of the club is set for October 14th, and Miss Julia Harris, and Miss Martha Harris will have complete charge of the program, which will consist of instrumental and vocal numbers.

The first artist concert of the club occurs some time in November, when David Bingham will appear before the club for the second engagement since the club's organization several years ago.

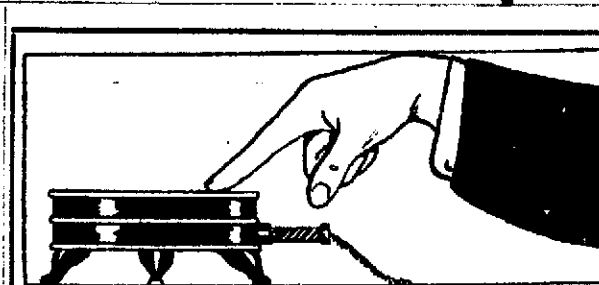

One of the interesting items of news which Dan Cupid has had up his sleeve is the engagement of Miss Zoe Redden and Jesse H. Blattenberger. The bride to be is the oldest daughter of Mr. and Mrs. S. E. Redden, who live northwest of Fresno, in Arizona Colony. Miss Redden is decidedly popular in musical circles, besides being quite a finished pianist, having an unusually sweet voice. Mr. Blattenberger came here about a year ago from Pittsburgh, Pa., where he was very prominent in social as well as business circles. Since coming to Fresno he has made many friends, who are congratulating him upon his rare good fortune.

Miss Zoe Redden, whose engagement is announced.

The wedding will take place some time near the first of the year, at St. James' Episcopal church.

George Hodgkin is down from Berkeley for a short while, spending the time with his mother, Mrs. W. H. Hodgkin, at the San Ricardo Vineyard. Since returning from England this fall (Continued on Page Nine.)

The Heat is Applied Direct

Not a Bit is Wasted

THERE is one feature about the electric that makes it a particular favorite in warm weather. That is that none of the heat is wasted. It all goes into whatever is being cooked, the heat being applied in the most direct manner.

The electric stove is one of the most convenient household articles that was ever invented. It can be used on the table to keep things warm or it can be used to cook with. It is invaluable in cooking light meals that must be prepared quickly.

Real Estate and Building

PUT CONTRACT FOR GRAFF BUILDING UPON FILE

Building Will Be Finished in 70 Days; Is to Cost \$22,214.

Gundelfinger Planning to Build Fine Home in Near Future.

Permits for First 9 Months of 1911 Valued at \$790,808

Building permits issued for the first nine months of 1911 total \$790,808, according to figures given from the city engineer's office yesterday. It permits for the remaining three months are issued in the same proportion as for the balance of the year past, the total value of building permits for the year will just exceed \$1,000,000. It is expected, however, that the figures will be far in excess of the amount, owing to the fact that construction is to be started on two or three large buildings here before the first of the year.

The total number of permits issued for the year is 539. Of this number, according to the city engineer, 370 were for new buildings and 169 for alterations. The majority of the permits for new buildings were for houses for people of this city. The value of the permits issued for new buildings is \$650,476, while the value of the permits issued for alterations is \$140,332.

The first month was not as large as August in the value of the permits, although the number is much greater. The following table shows the building permits of the city engineer:

Month	Value of permits issued for year to date	Number of permits issued for year to date
August	\$125,000	125
September	\$125,000	125
October	\$125,000	125

WARDEN WOULD TAG ALL HIDES OF DEER

Small Feathered Game
Birds Reported to Be
Plentiful in County.

County Game Warden R. E. L. Cobb is out with a new proposition that every hunter be compelled by law to tag and label every deer hide to show whether it was that of a buck or doe. He says he is going to urge it upon the state commission.

The warden was in town yesterday and says in his quarterly report to the supervisors on game and fish matters in the county:

"I have been in both ranges of mountains in this county, and I find the deer law very lame. As it now stands, it is very hard for an officer to find out whether a buck or a doe has been killed, when you meet a man and he hasn't hide or head to show, and there is now law to make the hunter keep hide or head. I expect to take this matter up with the State Fish and Game Commission to see if we can't have a law passed so that when a deer is killed there shall be a tag for the hunter to turn in with the hide when he returns from a hunting trip. By doing so we could keep a record of all deer killed, this tag to be given out when he buys his hunting license."

Warden Cobb says fishing is very poor in the mountains. Mountain quail are increasing very fast, owing to the closed season for four years, and grouse have increased wonderfully. The valley quail are plentiful this year, but will be very small by the 15th of October, the opening day, as there has

been a second hatch this year. Ducks are plentiful in some localities, but no northern ducks are coming in yet. W. H. Childreth was fined \$10 by Justice Beall at Clovis for selling salmon without a license.

MUSICAL PROGRAM AT ST. JOHN'S TODAY

St. John's choir with Miss Catherine Ballin as director and W. Y. Spence as organist will render the following program Sunday at 10:30 a. m.

Asperges Me Rosewig
Kyrie Stearns
Gloria Stearns
Credo Stearns
Offertory, Ave Maria Selected
Miss Catherine Ballin
Sanctus Stearns
Benedictus Stearns
Miss Marguerite Ballin and Choir
Agnus Dei Leonard
Postlude Organ

BODY OF DRILLER FOUND ON PLAINS

BAKERSFIELD, Sept. 30.—Edward Jennings, an oil driller of McKittrick, lost his life on the plains north of McKittrick. A body of a man said to be that of Jennings, who was also known as Tim Tootan, was come upon by A. Adams of the Kern Petroleum Company. The man had apparently been dead more than a month and all evidences go to show that the remains are those of Jennings. A country-wide search was instituted for him at the time of his disappearance, but the search had failed, and only J. P. Durroll, secretary of the Bakersfield Eagles, had kept up the hunt by writing to all places to which Jennings might have gone had he been alive. Jennings had a brother, John, in Hanford. He was born in Camp Verde, Ariz.

FINAL BAND CONCERT TO BE GIVEN TONIGHT

Excellent Program Arranged; Opening March By Clarence Barton.

The final band concert of the 1911 season will be given at the courthouse tonight. Because of this fact an unusually good program has been prepared, providing for both classical and popular music. The program is a review of the summer. The pieces, with two exceptions, are those which were received with most favor. There are two new numbers, one of which has never before been played here. This is a grand selection, "Les Huguenots."

The opening march, "Fashion Show," is the latest composition of Clarence Barton and is particularly appropriate at this time.

The program for tonight is as follows:

March—"Fashion Show" Barton
Overture—"H. Guarany" Tomes
Sextet from "Lucia" Danzelli
Performed by Messrs. Burns, Leonard, Barton, Jackson, Stout and Bancroft.

(a) Gavotte, "Entia Act" Gillette
(b) Venetian Love Song from "A Day in Venice" Nevin
Grand selection, "Les Huguenots" Meyerbeer
Descriptive, "The Musicians' Strike" Fahlbach

PART II.
Patrol, "American" Menahan
Overture—"Serenade" Rossini
Suite, "Ballet Egyptian" Lortzing
Popular medley, "Hits from Repertoire" Lampe
Lull, "The Forge in the Forest" Michaels

WIREMEN'S TROUBLE IS NOT YET SETTLED

Deadlock Will Probably Be Unbroken for Several Weeks at Least.

The trouble between the local union of inside wiremen and the San Joaquin Light and Power Company has not yet been settled, and from present indications it will not be settled, at least for several weeks.

Following the discharging of its inside wiremen, several non-union men were brought in here and put to work. Efforts to get them to stop have been unavailing on the part of union officials, although it was said that where they are working on buildings under construction, all other union men employed on other work on these buildings have been called off.

No attempts have been made in the last week to confer with power com-

pany officials, and it is probable that no further attempts will be made to confer with them.

The union men declare that if the power company begins an active fight against the inside wiremen, the line-men will walk out. The power company has a large number of line-men in its employ, but they have thus far taken no part in the trouble with the inside wiremen.

FIVE COUPLES ARE LICENSED TO MARRY

Seventy-seven Permits Issued During the Thirty Days in September.

Seventy-seven licenses to marry were issued in the county for the thirty days in the month of September. Couples licensed yesterday were the following named:

Antonio Piccolo, aged 31, and Louise A. Boni, aged 32, natives of Italy and city residents.

J. W. Sullinger, native of California, aged 23, and Florence M. Badger, native of Illinois, aged 23, city residents.

Hert Rucke, native of England, aged 25, resident of Lindsay, and Myrtle Clayton, native of California, aged 23, city resident.

Gabriel M. Douglass, aged 48, and Ruth Warren, aged 49, residents of Lemon Cove, Tulare county and natives of Indiana.

Frank R. Arnold, native of Iowa, aged 23, and Hazel L. Lynch, native of Pennsylvania, aged 18, city residents.

FRESNO FAIR.

It Begins

TUESDAY

.... October 3rd

The biggest and the best fair ever held in Fresno will open on Tuesday. It will be the great fair of the San Joaquin Valley, one that will have many entirely new features, and all the things usually seen will be on a grander scale than ever before attempted. \$60,000 is being judiciously spent to make this fair the greatest ever and the high class of the attractions secured more than assures this.

As Entertaining As A Circus
As Instructive As A School

See exciting races and horses that are expected to make new records.
See exhibits of products, machinery, live stock, poultry, recent inventions and many other things.

Free!

Scores of free entertainments, new and novel, have been provided.

WILL YOU BE THERE?

TWENTY

E-M-F
THIRTY

The records of the office of the Secretary of State at Sacramento show a total registration of 15,905 automobiles from September 1, 1910, to September 1, 1911. There were more than 140 different makes, an average of about 115 each, had all sold in equal numbers, but such was not the case, for one out sold all the others. That car was the E-M-F "30," which sales reached 1514, leading its nearest competitor (with more than a dozen different models), by 429. Now in the face of this fact, who will deny that the E-M-F "30" is today the most popular car in the State of California? And why is it so? Because it is more for the money and has given more and better service with less trouble and expense than any other car, and is backed by the best guarantee of any car in America, the guarantee of the old reliable Studebaker Co.

There were more E-M-F "30" and Flanders "20" sold in California during the 12 months than any other 2 makes combined. You might find a few persons who would make an error in purchasing a car, but not 2164 out of 15,905.

We give you the best car at the best price and give you the most satisfactory service after you have purchased your car.

SHIPPED AS SAILOR TO BE WITH LOVER

Romance of the Orient Ended
in Possible Death
at Singapore.

Robbing a weather worn sail against a pier in the Bush store, South Beach, was the big British freighter India, well known to the Far East. In addition to a cargo that made her not heavy in the water, she brought in a love story of the Malay peninsula. It is a story with a possible tragic ending. The narrative was told by John T. Tickle, the chief engineer, who is a serious minded man, despite his name.

In Malacca, where David Yang, 16 years old, daughter of Minapha, the first officer, also lived. All the time she was in the ship, she was in the Malay peninsula. The girl and the young man were betrothed, and so after a time Minapha took his daughter to

Singapore, where All was busy laying on the next day upon which the pair were to start life together. When the India was loading at Singapore, Captain John Fisher gave orders to a shipping master to permit 25 men to the engine room force. Among those who decided to make the voyage to New York and return was All. He explained that he wanted to add to his savings and also to see something of the world. The new crew came on board with the India lay in the harbor, and there were some days before she would be ready to sail. The crew had not been at work long before Chief Engineer Tickle's attention was attracted to a tall slender native whose chief occupation seemed to be keeping out of the way. As he watched the new hand he said he became convinced that the result was a woman. Strange to say, it was a truly world-wide feminine action that betrayed her sex. He noticed her turban as though he certain it was on straight. When confronted by the engineer she began to cry and protest in her native tongue that she wanted to follow All around the world. The woman was being detained for a decision in her case, when she broke away, and, running to the open doors of the furnace tried to throw herself upon the bed of glowing coals. Some of the men caught her in time, and she was repeated at the first opportunity, and the crew of the straggling girl fled the vessel. She was not quieted when Mahomed All appeared, but with arms outstretched she appealed to

him time and again as the crew forced her up the slender iron ladders to the deck. One of the white officers watched her while waiting for the ending of the boat which would take her ashore. When the vigilance was relaxed, she ran across the deck, shouting to All. As the natives started after her she climbed the rail and jumped overboard. Without a word Mahomed All ran to the rail and as she times up jumped after her. There were a number of screams about, and those in the freighter are not certain whether both were drowned or whether they were picked up. The incident so excited the crew that it was thought best to stop another when the vessel got to Colombo. —New York Times.

CATCH CONVICT BY AUTO

SAN FRANCISCO, Sept. 30.—(Continued) A half dozen rifle bullets that ripped through the air above him, J. Fitzallen, a military prisoner at the Presidio, made an exciting dash for liberty yesterday and was only recaptured when his guard impressed a passing automobile into service and ran down his charge. The chase covered a dozen city blocks beyond the First Avenue gate of the reservation, through which Fitzallen bolted. Fitzallen is doing time for two attempts to take informal leave of the United States army.

Star Theater. New show every day.

FINDS MONKEY IN A HOTEL BED

Patron of Waldorf-Astoria
Astonished By Discovery
in His Room.

Dingli, a white-faced, long-tailed monkey, which was taken to the Waldorf-Astoria by two young women, said to be the daughters of a prominent naval officer, caused much excitement in the hotel. When the women arrived, they asked H. L. Stewart, assistant manager, to have the animal placed in the basement, insisting the monkey was so well trained it would be no trouble. A porter took charge of Dingli, ran a rope through the animal's collar, and tied the monkey to a trunk handle. His owners sent down two chambermaids to make Dingli comfortable. The monkey did not seem to mind his retreat much in the day, but was heard scuttling around the basement after dark. An employee went to assure the management the monkey was tied safely, and afterward Dingli was forgotten.

D. L. Guthrie, of Cleveland, Ohio, after listening to the music on the roof of the hotel, went to his room on the ninth floor. Guthrie says he turned on the light and began to undress. Now and then he thought he heard dog breathing. He looked about and decided the sound came from the adjoining room. Then he sat down and wrote several letters. When his train of thought was interrupted by the sound of the door breathing, it seemed too near to be in the next room, and he even went into the hall to see if his neighbor had left his door open. It was shut. When he returned to the room, there was silence, and he fancied the breathing must have been caused by a draught.

Guthrie took a bath, then approached the bed, and looked for his pajamas. When he reached for them, they wriggled. He turned on the light at the head of the bed and saw the pajamas heaved and fell. Guthrie thought a cat had stolen into the room. When he pulled at the end of the pajamas, the monkey fell to the floor and scuttled off to the bathroom.

"Send a boy up to my room," telephoned Guthrie to the office. "There's a monkey which got to the bed before I got a chance."

Two clerks hastened upstairs, and the guest said: "I guess you will have to give me another room. That monkey can have this one."

Guthrie's belongings were removed. Guthrie explained he did not mind much, since he had discovered the monkey before he went to sleep. "There are things more pleasant," he said, "than awakening and finding a white-faced monkey staring at you." It was found Dingli had bitten through his tattered and scampered to the first room he could find with a transome open. Dingli was carried downstairs and shut in a closet the porter took care to fasten securely. One of the owners was told of the escape of the monkey. "Oh the poor dear only left the basement because it was damp and perhaps nobody had been down to speak to him," she said.—From the New York Press.

WHEAT SHIPMENTS TO ORIENT LARGE

SEATTLE, Wash., Sept. 30.—All available cargo space on the entire fleet of the Nippon Yusen Kaisha has been booked for the next four months and the greatest movement of flour to the Orient in the history of the Pacific northwest will soon be underway. Recent floods in China have destroyed crops of all kinds.

MONTEREY CARMEN STRIKE

MONTEREY, Mexico, Sept. 30.—The Monterey street car system is completely tied up today by a strike of employees, who claim they have been forced to pay for damage to cars and have been thrown under suspicion by the arrest of four of their number on charges of stealing car tickets. The men have appealed to Mayor Martinez, exhibiting company receipts for the tickets.

RECOMMEND PAROLE

SACRAMENTO, Sept. 30.—The state board of prison directors has recommended to Governor Johnson that States I. J. Worden be paroled on condition that he will go at once to Japan, to be taken care of there by his brother. Worden was originally sentenced to be hanged for his part in wrecking a Southern Pacific train on July 11, 1901, during the great railroad strike, killing four men.

LUXURY IN CHEAP FOOD.

"I've given up the cheap table d'hote," announced the man with the well fed look. "That's all very well for the beginner, the amateur, but I've about decided that a good restaurant will do me for dinner when I can afford it. No more the 45 cent place for me, even if it is out of the ordinary, but after dinner I like to go hunting for my coffee and sweets to the places on Washington street with their almond pastes and semi-liquid desserts, to the robust German coffee house and to the lighter delights of the French and Italian shops where the fancy cakes equal the best of the uptown product and retail at prices that are absurd."

"There is a little pretty cook's down in 'The Band' for example, where they pay 35 cents a pound for coffee by the bag and sell it for three cents a cup. You can't get cream, to spoil the taste—if you want cream they don't want you—but with real coffee and the finest cakes, I make a most excellent dinner. Last night I had two suppers of coffee—large cups and a heaping plate of fancy cakes, and the bill was 21 cents, with no tip to the waiter. Small prices, but the man dropped \$5,000 in the summer Italian opera scheme without thinking, so he must make a profit."—From the New York Sun.

ON ONE CONDITION.

"Would you marry a woman who knows nothing whatever about cooking?" "Would?" "Brave man! How?" "I'd do it on one condition." "And that is?" "That she has money enough to pay my board at a first-class hotel."—From the Cleveland Plain Dealer.

A vast amount of ill health is due to impaired digestion. When the stomach fails to perform its function properly the whole system becomes deranged. A few doses of Chamberlain's Tablets is all you need. They will strengthen your digestion, invigorate your blood and regularize your bowels, without doing away with your mischievous feeling due to faulty digestion. Try it. Many others have been permanently cured—why not you? For sale by all dealers.

S. B. CATARRH CURE

Cures catarrh, asthma, etc., at Smith Bros.

INDIAN WOMAN WED TO HUSBAND NO. 14

PORTLAND, Sept. 30.—A record for matrimonial engagements that outdistances that of the most married theatrical star was held before United States District Attorney Evans yesterday, when Nellie Lane, an Indian woman of the Siletz tribe, introduced Moses, a rotund and comely member of the same tribe, as her fourteenth husband. The information was furnished voluntarily with evident pride, while Nellie was being questioned as a prospective witness before the Federal grand jury investigating the sale of liquor to Indians. Moses smilingly admitted that he was a mere beginner in the matrimonial field, having been married but four times. What became of the preceding thirteen husbands was not revealed.

THE 1911 DAIRY LAW

A copy of that portion of the new 1911 Dairy Law applying to dairies, with a synopsis of each section by J. J. Edwards, will be mailed to you free by THE WOODWARD CO., Fresno, Calif.

Fathers:

Teach your boys and girls the value of money. Let each child have its own savings account, and cultivate an interest in seeing it grow.

There is no better way to lay the foundation for lives of thrift. A good start and an early one will have a great influence on the child's future.

This Flanders "20" Is the Car That Laid Out the Glidden Route

It Is the Lightest and Lowest Priced Car That Ever Performed the Feat—and It Did It Better—Made Better Time and Finished in Better Condition.

Not Only Beat All Previous Pathfinding Records But Also All Records for the Route—the Dixie Trail—1,490 Miles In 10 Days.

WHEN MR. S. M. BUTLER, Chairman of the Contest Board of the American Automobile Association, first saw the Flanders "20" with which driver "Bill" Soules had been instructed to report at A. A. A. Headquarters in New York to lay out the route for the Glidden Tour to Jacksonville, Florida, he exclaimed:

"THERE MUST BE SOME MISTAKE! Surely you do not expect this little car to carry four passengers and cover the route in the time at our disposal? You see there are only 38 days between now and the date the tour must start, and maps, booklets and other data must be gotten out. We can't allow more than sixteen days of that for the pathfinding."

"WHY, WHAT DID YOU EXPECT, MR. BUTLER?" asked Driver Soules, who feared he had misunderstood his instructions—and Soules never does that.

"WHY I EXPECTED an E-M-F '30'—the old war horse that has laid out so many routes. I surely did not expect a smaller car and I am surprised that W. E. Flanders, Manager of the Studebaker automobile business would risk his and their reputation with the 2,800 dealers of the Studebaker Corporation in such an important event on so light a car. What will a 20 horse-power car do on the slippery clay roads of North Carolina and the sand trails of Florida? Why?"

"WHAT WILL SHE DO?" asked Soules—now thoroughly on his mettle—"I'll tell you what she'll do, Mr. Butler: She'll make the \$5,000 cars that have laid out former Glidden Tours look like thirty cents—plugged."

"WHAT WILL SHE DO?"—you say you can only allow sixteen days; that's an average of eighty-five miles per day. We—this little three speed car and me—will take your official party over that route on the tour schedule—that's ten days—and we will give them as comfortable a ride as they ever had—and we won't be late for supper once."

"WHY, THE E-M-F '30' TOOK 38 DAYS to cover the 2,800 miles from Detroit to Denver and return when pathfinding for the 1909 Glidden," said the chairman. "And that was a great performance." "That's true, Mr. Butler, but we make wonderfully good cars nowadays. That's just what we are going to prove to you."

"YOU'RE ALL RIGHT, SOULES," exclaimed the Chairman enthusiastically now. "You have the right spirit and it is very evident you believe in your Flanders '20'. Go to it—and if you do the trick, hanged if I won't buy one—I begin to like the looks of her. She certainly is a trim looking little rig."

DRIVER SOULES WAS PLEASED—but he took issue with the chairman on one point. She isn't so 'little,' Mr. Chairman—she has 102 inch wheel base; will carry five just as easily as four, and we'll show you there's the biggest 20 horse-power under that bonnet you ever saw in a car."

WELL, TO MAKE A LONG STORY SHORT, she did it and she did it magnificently. Each succeeding day when Pathfinder Westgard wired the head office the surprise of Chairman Butler and his associates became greater.

ON SEPTEMBER 11th Mr. Bruce, Manager of the A. A. A. Touring Bureau wrote in part as follows: "We have today received a telegram from Mr. A. J. Westgard, our special representative, saying the Flanders car made the trip yesterday from Gettysburg to Staunton, a distance of 178 miles—a splendid performance considering that the road detail is being taken all the way for map making * * * will not you arrange to have the Flanders '20' continue after finishing the Glidden route, and come up from Jacksonville thru Savannah to Charlotte, connecting North and South by the Shenandoah Valley, Charlotte, Columbus, Augusta and Savannah." We wired, "Glad to do it, or to continue the route to Panama or the Pacific Coast—it's all the same to the sturdy Flanders car."

NOW THIS IS ONLY ONE of several great feats the new three speed Flanders "20" has performed during these past few weeks. We set out to show that in this three speed, four-door model we have a car that has not a superior in the world—and not an equal outside of our own E-M-F "30," the staying qualities, speed and hill climbing ability of which is so well known that it no longer needs demonstrating.

JUST LISTEN TO THIS: Flanders "20" has won every event she has entered—has more reliability runs, more hill climbs to her credit than any other car this season. Not a day passes but she adds one or two more victories to her credit—one or two more trophies to her collection.

Flanders "20" Wins

1. IOWA'S LITTLE GLIDDEN: Flanders "20" made three perfect road scores out of a possible three. Going some!

2. TWIN CITIES TO HELENA, MONTANA: 1300 miles over prairie trails and mountain passes—road—bad deep in places. \$4,000 cars succumbed to the difficulties. Flanders "20" won 1st and 2nd—all the prizes there were.

3. DEAD HORSE HILL: At Worcester, Mass. This is America's Greatest Annual Hill Climbing Contest. Flanders "20" won first, clipping 47 seconds off previous record and making her nearest competitor look like an also-ran.

4. ST. LOUIS TO KANSAS CITY Reliability Run: Flanders "20" won 1st with score of 999 out of possible 1,000. Other cars penalized 150 to 999 points—and out.

5. BUFFALO ENDURANCE RUN: A test devised to eliminate all if possible. Proved to be four days of mud plugging—that's nuts for Flanders "20." Won first—of course.

6. NEWPORT HILL CLIMB: This was not a sanctioned meet but is the biggest event of the year in Indiana—worst hill in the state. An owner entered his own car—and he not only won in his class, but made a clean sweep of seven straight events in larger car classes. A 30 horse power Knox beat her time 2 seconds—hooray!

7. DES MOINES, IOWA—Speed Event: Two special racing cars came to town—fine framework for a record. Dealer took stock car off the showroom floor—and cleaned them up—1st easily.

8. SEATTLE TO HAZELTON, B. C.: This was not a contest—for the very good reason that no other car has ever dared attempt the trip for gold medal offered two years ago. Flanders "20" went after it—through the wilderness. Brought it back, of course. This will long stand as a record of endurance for motor cars of any power or price.

9. PATHFINDER FOR GLIDDEN TOUR—first official car over the "Dixie Trail"—New York to Jacksonville, 1,490 miles in 10 days—average 149 miles a day. Chairman Butler of the A. A. A. says the cleanest job ever done in laying out a Glidden Route—a wonderful car.

WITHIN EIGHT WEEKS SHE HAS WON NINE important events—enumerated in the panel. In one she made three perfect road scores out of a possible three; in another, Minneapolis to Helena Reliability Run, she won first and second—all the prizes there were. And at Worcester, Mass., she won America's premier hill climbing event, chipping 47 seconds off the previous record and beating the time of several cars of four and five times her price.

IF YOU FOLLOWED THE NEWS you have doubtless been struck by the consistent performance of this car in all reliability events. To say that Flanders "20" is entered in a reliability event is to say Flanders "20" has won First—and most likely Second and Third also. Always first thru.

THAT'S WONDERFUL WHEN YOU CONSIDER that in these events, while entered only in her own class, her merit scores at the end make those of cars in the higher priced classes look cheap indeed.

TAKE THE TWIN CITY RUN—Minneapolis to Helena, Montana, over prairie trails and mountain passes, in which such cars as Packard, Stoddard-Dayton, Abbott-Detroit, Simplex, Maxwell, Cole, Krit, Hupmobile and other cars failed to finish with perfect scores, and two out of three Flanders "20's" did.

IS PRICE ANY INDICATION of the road ability, the staying qualities, the reliability and the capacity for standing hard knocks?—surely not in view of these splendid victories of this "20" horse-power \$400 car.

NO, IT CERTAINLY IS NOT—we have never claimed that the E-M-F "30" was a better car than the three speed Flanders "20." The thirty is a little larger—ten inches longer wheel base, will go faster—say 55 miles per hour as against the 47 that any Flanders Touring car will go; but it won't—and no car made will—climb a hill better; it won't—and no car made will—stand rougher usage or perform so well month in month out with so little care or attention or expense.

FLANDERS "20" IS MADE OF SAME high grade steels—the best the science of metallurgy knows how to produce—by the same careful methods and in the largest plant in the world devoted to the making of one model. We make every part—from pig iron and the raw steel bar to the finished car. And we guarantee every car for a year, giving the buyer a bond signed by General Manager Walter E. Flanders himself.

FLANDERS "20" IS YOUR CAR—it is the ideal car for the man who does not feel he can afford, or who does not care to put more than \$1,000 into an automobile—whether it be the one car he and his family shall use for all purposes, or an auxiliary car for the rich man who wishes to save his big, expensive, more cumbersome touring car or limousine.

DELIVERIES—YES, THAT'S THE ONLY TROUBLE—we can't seem to catch up with the demand—can't promise you immediate delivery. August was the biggest month in our history. September will surpass it by 500 cars—shipping 125 Flanders "20" cars per day now and increasing our factory facilities just as fast as we can. Bought the original Ford plant last month and putting on 1,000 more men. This will increase our output 20 per cent. Trying our best to catch up—but people have come to appreciate this car and the demand still leads the supply.

ONLY WAY IS TO SEE YOUR LOCAL DEALER at once. Get your order in, pay a deposit, so the order will be sent to the factory and given its regular serial number—then you won't have to wait long. Every day's delay in placing the order makes two more days' delay in getting the car, for Flanders "20" is carrying everything before her, and the "tin cars" are losing ground fast. Flanders "20" has the call—but if you hurry you'll be "lucky."

"The Girl and the Jockey"

Will be New Bill at Teal's

Cash Knight, Principal Comedian With Raymond Teal Musical Company.

Teal's Theater this week has been the scene of packed houses to see Fritz Fields' meritorious production "In Menuda Land." Laugh and grow fat is Raymond Teal's motto and that he is more than delivering the goods is evidenced by the big crowds who are patronizing his new play house. The chorus work that Mr. Teal makes a feature of is especially good and the various numbers take encore after encore. Today's matinee and tonight will be the last production of "In Menuda Land" and for next week's offering commencing with tomorrow night Mr. Teal will offer "The Girl and the Jockey." This show promises to eclipse anything yet produced at this popular play house.

The play deals with the passing of the anti-race track bill in this state one year ago and the attempts of some horsemen to pull off a race after the bill became law. The scheme is laid at the farm house of an old justice of the peace and the characters

CHARGE SALESMAN WITH BEATING BILL

PORTERVILLE, Sept. 30.—W. D. Barclay, a district salesman for the Bearborough Company, publishers of maps of San Francisco, was arrested last night on a warrant from Santa Rosa, charged with having neglected to pay a \$200 bill in that city.

Barclay maintains that he was made the scapegoat for misdeeds of a subordinate by the name of Richardson. He claims that Richardson, one of his

S.S.S. FOR SUMMER SKIN DISEASES

During the summer most persons are annoyed with pimples, boils, rashes or eruptions, while others suffer more severely with Eczema, Acne, Tetter, Salt Rheum, or some kindred skin disease. All skin affections come from humors and acids in the circulation. The blood, as it circulates through the system, deposits these humors and acids in the sensitive membranous flesh which lies just beneath the outer skin. This acid matter causes inflammation and a discharge which breaks through the delicate cuticle, and skin diseases are the result. To cure any skin trouble the blood must be freed from all acids and humors, and for this purpose nothing equals S.S.S. This great blood purifier completely removes every particle of the impurity, enriches the blood, and in this way permanently cures skin diseases. S.S.S. cures because it purifies the blood and thus does away with the cause. Book on skin diseases and any medical advice you may desire sent free. S.S.S. is for sale at drug stores.

Sousa and his Band, Monday, October 9.

EMPIRE THEATER—
This afternoon and evening, "The Poisoned Book."
All next week, "Graft."

TEAL'S THEATER—
This afternoon and evening, "In Menuda Land."
All next week, "The Girl and the Jockey."

"OOGIE" AND "GLOOMY GLOOMY" DANCES WILL BE GREAT FEATURES IN "THE FLIRTING PRINCESS"

SOME OF THE PRETTY GIRLS IN THAT CATCHY MUSICAL COMEDY, "THE FLIRTING PRINCESS" AT THE BARTON NEXT THURSDAY NIGHT.

Mort H. Singer, who has sent us all the "Princess" Theater, Chicago, successes, will send the greatest hit of them all this week to the Barton Thursday night, Oct. 5. Harry Bulger in "The Flirting Princess," with a superior cast containing such names as Dale Fuller, Helen Hastings, Helen Sheridan, Billy Kent, and Harry Dickerson, not forgetting the "Thru Dozen American Beauties," including the now famous Egyptian Turkey Trot, and two features which, while highly dramatic, have been of the very largest help in promoting the successful run of one year in Chicago of the show, namely the "Oogie and Gloomy Gloomy" dances. The seat sale opens tomorrow morning.

HISTORY OF THE "OOGIE" DANCE

Its earliest movements, as in the cadenced swiftings of the dancer, rocked the shrines of the gods. Its first steps were guided by High Priests before the idols of worship, the colossal statues in the monstrous solemnity of their temples.

In China, a woman who marries clandestinely beneath her station is publicly flogged being given one hundred lashes with the bamboo. She is then an outcast, and sold by the Quong (High Magistrate) to the highest bidder as his slave. Women obtained in this manner are often ill treated by their brute masters, and if they offer resistance, are sometimes killed by them.

The laws of China give a woman no higher standing than a swine or any other domestic animal of a man's household so that her appeals for aid, if indeed she has opportunity to make them, are passed unheeded. Parents in China have almost unlimited legal power over their children (first boys and obedience being the highest of Chinese virtues) they may sell them as slaves and in some instances kill them so that a girl who disregards the wishes of her parents may be visited with dire vengeance by them without fear of interference from the authorities.

In submitting this dance, Miss Ellen Sheridan will portray the outcast, combining the picture of motion with the sympathetic hysteria of a frenzied woman. Her changes of facial expression denoting confidence, then fear and terror have electrified her audiences wherever she has appeared in this dance marvel of the hour.

COMMERCE CHAMBER GROWING RAPIDLY

PORTERVILLE, Sept. 30.—Eleven new names were added to the roster of the Chamber of Commerce at its meeting last evening, making a total of 32 new members since the campaign for a Greater Chamber of Commerce.

According to the report of the secretary, there are nearly 100 applications yet to be filed. The total of 32 active members originally set, will be reached without serious difficulty.

The ladies of the First Congregational church will continue their rummage sale at the Chinese Mission building, 318 E. 7th, throughout the coming week. All friends of the church are requested to call up Mrs. M. C. Johnson or Miss Isabelle Conn in regard to donations.

Stop! Listen! Something new for the fall. Marquess Hotel, Best located house in the city, with new management and thoroughly renovated. Try our 25c meal.

What is Puncta?

"Graft" Powerful Political Play Will be Seen at the Empire

Miss Lizetta Holdsworth with Frank Thorne Company at Empire Theater.

"Graft" The play to be presented by the Thorne Co. at the Empire theater beginning tomorrow night is one of the most powerful plays of recent date. It is essentially a political play and deals with politics and graft as practiced in the larger cities. The characters are all good and the plot of the play well-worked out. "Graft" is a companion play to the well-known "Man of the Hour." This is the most pretentious bill the company has so far attempted and will no doubt be a revelation as well as a sensation to the patrons of the Empire.

Mr. Thorne will be seen in a heavy character leading role, and C. Rae Berger as a ward boss. Clifford Thompson has a good part and will, no doubt, give a good account of himself. The story, shortly drawn deals with a young man of rich parentage but absolutely without ambition (played by Clifford Thompson). He seems so easy to the ward bosses and is per-

suaded to run for office and through the influence of these same is elected Mayor. His sweetheart spurs him on to great things, he shows himself true blue, and a great disappointment to the grafting politicians. He upholds the cause of the people and in the end makes an everlasting friend of the political bosses.

Miss Myrtle Langford as Dolores Blackwood has that personality about her which promises a first class interpretation of the heroine. Max Hough, her brother, is exceptionally suited to the part. C. Rae Berger, Miss Houghton, Mr. Edmundson, L. H. Holdsworth, Max Walzmann, Miss Fowler, and the rest of the cast are as suitable to the characters as it is possible to cast in a modern stock company. Patrons of the Empire may be assured of one of the best performances ever seen in that theater. Only two more performances of the "Poisoned Book" this week's play at today's matinee and tonight's performance.

CARPETS AND RUGS

Of the Better Sort Temptingly Low Priced

On Monday morning, October the second, we start our first Annual Fall Carpet and Rug Sale. Our immense stock is made up of many patterns in all weaves, comprising three hundred and fifty patterns of large sized Rugs, as many small Rugs, the most complete line of Carpets of all grades to be seen in the valley, and at least seventy-five patterns of Linoleums and Matting. Here is an opportunity to provide new floor coverings at substantial savings over our usual prices, already the lowest.

FAIR ATTRACTIONS ARRIVING BY CAR FOR BIG OPENING ON NEXT TUESDAY

San Francisco Delegation to Be Joined By P. H. McCarthy; Selma Coming With Special Train and 300 People; List of Entries for Races.

Fresno's big annual show, the Fresno County Fair, is beginning to arrive by the railroad for the opening next Tuesday, of a big series of events that will keep things busy until Saturday night. The show is in reality what the circus is always advertised to be—bigger and better than ever, and in some departments fully twice the size of the previous state fair held at Sacramento. This is true in the automobile show department, to which \$300 square feet of floor space will be devoted this week. Then it is expected the full capacity of the barn will be tested, in spite of the fact that three new ones have come up this year and all the old ones have been repaired, and these new ones have accommodated all the stock that was at the fair last year.

A sort of state-fair, it is believed, is given the fair here by reason of the fact that a representative delegation of San Francisco will be here on Friday and Saturday, and Panama Pacific and Labor days. While receiving guests, Mayor P. H. McCarthy of San Francisco will attend and will speak at the fair grounds on Labor Union day. Further, Mayor-elect James Rolph, while unable to attend in person, will have a representative body, and members of the Panama Pacific Exposition, commission will make the pilgrimage to help add color to Panama Pacific day.

The following telegram received yesterday from the representative fair people here in San Francisco tells of what is being done to boost interest in the fair here:

"In honor of Panama Pacific day, Friday, the Southern Pacific and the Santa Fe have put in a special rate for Thursday, Friday and Sunday. Will address the Oakland Chamber of Commerce tonight. Expect a big crowd down from the Bay."

WEDNESDAY BIG DAY.

Selling committees yesterday telephoned that they have 400 people signed up for a special train which will be run from there to the fair on Wednesday. Owing to the fact that the schools will be closed for the occasion, and this made the big day for Selma people at the fair, it was yesterday officially made "Fresno-Selma" day. The Selma band of twelve pieces will also be brought along, and added to the large band and orchestra which will be in service on the grounds at all times that they are open to the public. Selma people will wear boost badges bearing the legend, "Selma, the Home of the Peach."

Kerman is also coming in with a special train, and a large rivalry promises to develop in the contest for prizes on exhibits put in by the various wide-awake communities that are participating actively in the fair. These include Selma, Kerman, Clovis, Laton and the Fresno County Chamber of Commerce, though the latter is competing against none of the community exhibits.

Wednesday promises to be a hammer day at the fair, as it is to see a fine program, as well as the opening night of the big fireworks display, one of the most elaborate yet seen on the coast.

It was announced yesterday that all stores in this city with possibly two exceptions will close on Wednesday. Fresno day, to allow everyone of this city to attend the fair. The banks agreed several days ago to close.

CARLOADS OF FIREWORKS.

The first of the apparatus for the fireworks was shunted onto a siding in the yard here yesterday, for immediate delivery at the fair grounds, as it will require the time between now and Wednesday to get the apparatus set up. This is to be something distinctly new in its line—a series of big motion pictures done in fire, put together on a scale not heretofore attempted in any show in this valley, any only a few times in this coast. The display is to be of the same size as that shown through the week at the state fair, with the difference that here the display will be run off in two

KEY ROUTE RUSHES LINE TO RICHMOND

According to E. A. Heron, president of the Key Route and Oakland Trunk Line Company, work on the Key Route system north to Richmond will be rushed.

Trucks and trolley lines are being laid, and the double tracking of the Oakland-Richmond line along San Pablo avenue will be finished within thirty days. When completed express trains will be run to the Key Route line, connecting with the ferry for San Francisco.

The Key Route Will Run Through the Center of the

Richmond-Pullman

Townsite

The street cars are now running on San Pablo and Macdonald avenues (in front of our property), the two most important streets in Richmond.

A Lot In the

Richmond-Pullman Townsite

for which Burg Bros., Inc., are the exclusive agents.

Will Make More Money For You

than any lot you could buy for the same money anywhere within 50 miles of San Francisco.

Let Us Prove This To You.

Shew, May, 1910, we have sold over One Million Dollars' Worth of Lots. One of our purchasers is making A Profit of 700 Per Cent a Month.

Lots \$350

including unimproved streets, gutters, curbs, water mains and 4 to 6 foot wide cement sidewalks. Sold on \$5.00 monthly installments, without taxes or interest for two years.

The Richmond-Pullman Town Site is the logical business center of Richmond.

Buy there now, before the Key Route trains come, before prices go up, and get rich.

BURG BROS., Inc.

660 MARKET ST., S. F.

nights, thus giving a bigger show each evening than the fireworks figure. The subjects include battles of fleets in all and on the water; sinking and burning of great cities, and the burning of a giant skyscraper, true in the last detail, even to the escaping steam from the fire engines as they run to the rescue.

The fireworks rank with the horses as among the very biggest features of the fair. The horses will put up a show, it is declared, such as has not been seen on this coast before, and such as the world has not seen in some instances. That is, such shows as the Cape de Oro, 1:58; Del Rey, 1:59; and the fastest trotting mare anywhere on the turf, will go out against time, and some of the crack horse people who are connected with the stables here will be surprised if world records are not hung up anew on the local track.

JUST LIKE CIRCUS.

Then, the concessions. Charles E. Hoffman, in charge of the concessions, announces that he is going to have a regular Coney Island, minus the beach and an objectionable feature or two, such as sharper games. In fact, he will have more sideshows in his department at the fair this year than at any other time. The number will be about twice again as large as that secured last year.

Here is a list, so far as compiled now: Ferris wheel; merry-go-round; glass show; deep sea divers; side show of five acts; minstrel show of the coast; trained seals; vaudeville show with seven pieces; African clip; ball dodgers; cane racks; knife rack; and others. Starring among the concession people are the deep sea divers, who were busy yesterday putting up a big steel and glass tank into which they descend with the regular diving outfit, pump and all, and work about the bottom to show how the wonders of marine diving are accomplished. The whole number of concessions run over twenty-five. There will be no gambling or catch-penny games, anywhere on the grounds. Two carloads of concession stuff will arrive from the Chico fair and from San Francisco today and tomorrow, an overhauling will be in readiness for the opening on Tuesday.

These concessions do not include the various eating stands, refreshment booths, and the like, of which a greater number than usual will be distributed about the back of the grandstand and back of the pavilion. The various exhibits are now being actively placed at the grounds. There will be fourteen automobile exhibitors in the immense shed set aside for the automobile show. In the pavilion, the Fresno County Chamber of Commerce will have the central position, and the cities of the county that are coming in with exhibits will have most of the first floor. Kerman people were busy installing their exhibit yesterday, and Clovis committee-men will be in position that purpose tomorrow. In ten pavilion this year has been installed a public telephone booth, using the "pay as you enter" or "nickel in the slot" system, which will be open for use of

LOOK AFTER COMFORT.

Improvements for the greater comfort and convenience of the public are now completed. At either side of the large section set aside for exhibits and concessions is a line of hitching posts, and inside these neither automobiles nor buggies will be allowed. Then, with all this part set aside for pedestrians alone, additional care for comfort has been exercised in fitting up the new grandstand. This is covered and walled in on three sides, and has comfortable seats with backs. The old grandstand is connected with this, and will be covered with canvas, as will the old hitching posts. There will be uncovered seats on the ground. Seats stock to be exhibited will have the use of an open space in front of the grandstand, but so placed that it will not interfere with seeing all that goes on upon the track. Then, all this space inside the grandstand and along the inside fence is to be kept clear of people at all times. A hub fence on the inner side of the track, and announcing board, and entrances for the race stock removed some distance from the grandstands, are among other improvements.

Because of the fact that crowds are beginning to interfere with the progress of work at the fair grounds now, no outsiders will be allowed inside the park tomorrow.

Stock entries will not all be in until some time today, after which a complete list may be given out. A fine new barn has just been completed for exhibition of sheep and hogs. The big concrete tank used for exhibiting pumps is being resurfaced and put in shape for half a private exhibition. One exhibitor will stick a private well of his own on the ground to use in his work. The well must be put down sixty feet to tap the first water sand. The number of large exhibitors in all departments is nearly seventy.

PROGRAM OF FAIR.

Following is a complete program of the fair:

TUESDAY, OCTOBER 3RD.

(Woman Suffrage day; Kingsburg, Fowler and Malaga day.)

Wild West parade through streets of city at noon.

Miss Gail Laughlin of Denver speaks on Equal Suffrage at 1:30.

2:16 trot, purse \$500—12 entries.

2:25 pace, purse \$200—16 entries.

Ladies' race, purse \$200—5 entries.

one heat.

Exhibition half mile by Cone de Oro, 1:58.

Band and orchestra—Singers.

WEDNESDAY, OCTOBER 4TH.

(Fresno, Selma, Coalinga day.)

Wild West parade through streets of city at noon.

Miss Gail Laughlin of Denver speaks on Equal Suffrage at 1:30.

2:16 trot, purse \$500—12 entries.

2:25 pace, purse \$200—16 entries.

Ladies' race, purse \$200—5 entries.

one heat.

Exhibition half mile by Cone de Oro, 1:58.

Band and orchestra—Singers.

THURSDAY, OCTOBER 5TH.

(Kingsburg, Fowler and Malaga day.)

Wild West parade through streets of city at noon.

Miss Gail Laughlin of Denver speaks on Equal Suffrage at 1:30.

2:16 trot, purse \$500—12 entries.

2:25 pace, purse \$200—16 entries.

Ladies' race, purse \$200—5 entries.

one heat.

Exhibition half mile by Cone de Oro, 1:58.

Band and orchestra—Singers.

FRIDAY, OCTOBER 6TH.

(Kingsburg, Fowler and Malaga day.)

Wild West parade through streets of city at noon.

Miss Gail Laughlin of Denver speaks on Equal Suffrage at 1:30.

2:16 trot, purse \$500—12 entries.

2:25 pace, purse \$200—16 entries.

Ladies' race, purse \$200—5 entries.

one heat.

Exhibition half mile by Cone de Oro, 1:58.

Band and orchestra—Singers.

SATURDAY, OCTOBER 7TH.

(Kingsburg, Fowler and Malaga day.)

Wild West parade through streets of city at noon.

Miss Gail Laughlin of Denver speaks on Equal Suffrage at 1:30.

2:16 trot, purse \$500—12 entries.

2:25 pace, purse \$200—16 entries.

Ladies' race, purse \$200—5 entries.

one heat.

Exhibition half mile by Cone de Oro, 1:58.

Band and orchestra—Singers.

SUNDAY, OCTOBER 8TH.

(Kingsburg, Fowler and Malaga day.)

Wild West parade through streets of city at noon.

Miss Gail Laughlin of Denver speaks on Equal Suffrage at 1:30.

2:16 trot, purse \$500—12 entries.

2:25 pace, purse \$200—16 entries.

Ladies' race, purse \$200—5 entries.

one heat.

Exhibition half mile by Cone de Oro, 1:58.

Band and orchestra—Singers.

MONDAY, OCTOBER 9TH.

(Kingsburg, Fowler and Malaga day.)

Wild West parade through streets of city at noon.

Miss Gail Laughlin of Denver speaks on Equal Suffrage at 1:30.

2:16 trot, purse \$500—12 entries.

2:25 pace, purse \$200—16 entries.

Ladies' race, purse \$200—5 entries.

one heat.

Exhibition half mile by Cone de Oro, 1:58.

Band and orchestra—Singers.

TUESDAY, OCTOBER 10TH.

(Kingsburg, Fowler and Malaga day.)

Wild West parade through streets of city at noon.

Miss Gail Laughlin of Denver speaks on Equal Suffrage at 1:30.

2:16 trot, purse \$500—12 entries.

2:25 pace, purse \$200—16 entries.

Ladies' race, purse \$200—5 entries.

one heat.

Exhibition half mile by Cone de Oro, 1:58.

Band and orchestra—Singers.

WEDNESDAY, OCTOBER 11TH.

(Kingsburg, Fowler and Malaga day.)

Wild West parade through streets of city at noon.

Miss Gail Laughlin of Denver speaks on Equal Suffrage at 1:30.

2:16 trot, purse \$500—12 entries.

2:25 pace, purse \$200—16 entries.

Ladies' race, purse \$200—5 entries.

one heat.

Exhibition half mile by Cone de Oro, 1:58.

Band and orchestra—Singers.

THURSDAY, OCTOBER 12TH.

(Kingsburg, Fowler and Malaga day.)

Wild West parade through streets of city at noon.

Miss Gail Laughlin of Denver speaks on Equal Suffrage at 1:30.

2:16 trot, purse \$500—12 entries.

2:25 pace, purse \$200—16 entries.

Ladies' race, purse \$200—5 entries.

one heat.

Exhibition half mile by Cone de Oro, 1:58.

Band and orchestra—Singers.

FRIDAY, OCTOBER 13TH.

(Kingsburg, Fowler and Malaga day.)

Wild West parade through streets of city at noon.

Miss Gail Laughlin of Denver speaks on Equal Suffrage at 1:30.

2:16 trot, purse \$500—12 entries.

2:25 pace, purse \$200—16 entries.

Ladies' race, purse \$200—5 entries.

one heat.

Exhibition half mile by Cone de Oro, 1:58.

Band and orchestra—Singers.

SATURDAY, OCTOBER 14TH.

(Kingsburg, Fowler and Malaga day.)

Wild West parade through streets of city at noon.

Miss Gail Laughlin of Denver speaks on Equal Suffrage at 1:30.

2:16 trot, purse \$500—12 entries.

2:25 pace, purse \$200—16 entries.

Ladies' race, purse \$200—5 entries.

one heat.

Exhibition half mile by Cone de Oro, 1:58.

Band and orchestra—Singers.

SUNDAY, OCTOBER 15TH.

(Kingsburg, Fowler and Malaga day.)

Wild West parade through streets of city at noon.

Miss Gail Laughlin of Denver speaks on Equal Suffrage at 1:30.

2:16 trot, purse \$500—12 entries.

2:25 pace, purse \$200—16 entries.

Ladies' race, purse \$200—5 entries.

one heat.

Exhibition half mile by Cone de Oro, 1:58.

Band and orchestra—Singers.

MONDAY, OCTOBER 16TH.

(Kingsburg, Fowler and Malaga day.)

Wild West parade through streets of city at noon.

Miss Gail Laughlin of Denver speaks on Equal Suffrage at 1:30.

2:16 trot, purse \$500—12 entries.

2:25 pace, purse \$200—16 entries.

Ladies' race, purse \$200—5 entries.

one heat.

Exhibition half mile by Cone de Oro, 1:58.

Band and orchestra—Singers.

TUESDAY, OCTOBER 17TH.

(Kingsburg, Fowler and Malaga day.)

Wild West parade through streets of city at noon.

Miss Gail Laughlin of Denver speaks on Equal Suffrage at 1:30.

2:16 trot, purse \$500—12 entries.

2:25 pace, purse \$200—16 entries.

Ladies' race, purse \$200—5 entries.

one heat.

Exhibition half mile by Cone de Oro, 1:58.

Band and orchestra—Singers.

WEDNESDAY, OCTOBER 18TH.

(Kingsburg, Fowler and Malaga day.)

Wild West parade through streets of city at noon.

Miss Gail Laughlin of Denver speaks on Equal Suffrage at 1:30.

2:16 trot, purse \$500—12 entries.

2:25 pace, purse \$200—16 entries.

Ladies' race, purse \$200—5 entries.

one heat.

Exhibition half mile by Cone de Oro, 1:58.

Band and orchestra—Singers.

THURSDAY, OCTOBER 19TH.

(Kingsburg, Fowler and Malaga day.)

Wild West parade through streets of city at noon.

Miss Gail Laughlin of Denver speaks on Equal Suffrage at 1:30.

2:16 trot, purse \$500—12 entries.

2:25 pace, purse \$200—16 entries.

Ladies' race, purse \$200—5 entries.

one heat.

Exhibition half mile by Cone de Oro, 1:58.

Band and orchestra—Singers.

FRIDAY, OCTOBER 20TH.

Agricultural Department

(By W. G. HUMMEL.)

A SANITARY NEED ON THE FARM

For some years past, officers of the Public Health and Marine-Hospital Service of the United States have been making a special study of certain diseases which are particularly incident to farm life and of the methods by which these infections are spread. Many of the facts learned are of great importance to the farmer and some of them we shall give below.

It is already common knowledge among intelligent farmers that in many instances when livestock, such as cattle, hogs, etc., are pastured year after year in the same field, the animals do not thrive. Some or other of the young animals die, especially the young animals. This is because animals harbor parasite worms and germs in their intestines; these worms lay eggs which are passed in the droppings; and the eggs develop into young worms which in turn infect the livestock. A pasture thus becomes heavily infested with worms and other germs; and the smaller the pasture in proportion to the number of animals kept, the greater the soil pollution. It follows that the greater the soil pollution, the less the animals thrive. Practical farmers, observing this fact, move their livestock to other ground to give the old pasture a rest and allow the germs and young worms in the soil to die out.

It is as true of human beings as of animals, that they harbor parasite germs and worms which are discharged in the excreta, pollute the soil, and are again conveyed to people in various ways, thus continuing the round of infection at an increasing rate. Soil pollution by human excreta endangers the health of a family just as soil pollution of a pasture by the droppings of animals endangers the livestock.

In order to prevent the evil effects of soil pollution from extending to his livestock, the farmer must resort to more or less expensive methods, such as burning the pasture or securing additional pasture land. But since human beings, on account of their superior intelligence, frequent an appointed place to deposit excreta, it is possible by a small expenditure to prevent soil pollution by human excreta, thereby protecting the family health, enabling it to live year after year on the same premises without danger, and avoiding unnecessary sickness and death. And this may be done by the construction of a sanitary privy in place of the disagreeable, unhealthy ones now often seen. A farm house supplied with water and having a bathroom with toilet in the house is of course the most desirable condition for the farm place; but the universal use of a sanitary privy would greatly improve present conditions.

Among the diseases spread from man by soil pollution, the diseases caused by parasites of the intestine, lungs, liver, kidneys, and bladder are most noteworthy. Some of these diseases spread from human beings to human beings; others are spread from human beings to farm animals. Therefore, in preventing soil pollution by persons, the health of families and livestock are protected. Sanitarians everywhere are now recognizing the fact that the most important measure needed to prevent the spread of typhoid fever, hookworm disease, the dysentery, and certain other widely prevalent diseases, is by proper disposal of human excreta. Every person who contracts typhoid fever does so because he has recently been exposed to the germs of the disease which have been passed in the stools or urine of some other person who was either suffering from typhoid fever or was a "carrier" who was carrying the germs without showing symptoms. Flies may carry the germs from excrement to foods, such as milk, raw vegetables and fruits, bread, cake, candy, etc. Or the farm water supply may in some way be contaminated by the germs, possibly bringing them from a neighboring farm, or the infection may be spread by the fingers of the patient, nurse, or other persons. Dysentery and diarrhea spread in a similar way.

2,000,000 cases of hookworm disease, so we are told, "these worms attach themselves to the wall of the bowels, from which they suck blood. They cause lack of vitality, reduce mental ability, and in extreme cases cause death. The worms causing the disease escape from the body in the stools and urinate from the body in no other way. If the ground is polluted by human excreta the disease spreads, but if the excreta are properly disposed of the disease can easily be prevented. The hookworm eggs, after passing from the body, hatch out tiny worms within a few hours. These grow and shed their skin, much like a snake. When one or two weeks old, but still so small as to be scarcely visible to the naked eye, they may be swallowed or may burrow through the skin, especially of barefoot children, causing ground itch, toe itch, etc. And wherever this exists, it is proof that somewhere in the locality soil pollution has occurred, because there is a privy which is not properly built or taken care of, or the worms get into the blood, make their way to the bowels, and grow to adult worms, laying eggs which again pass out to pollute the soil.

Cochin-Chilid diarrhoea, networm infection, and amoebic dysentery are also diseases which are supposed to be spread almost entirely through improper disposal of human excreta. The bed-made tapeworm and pinworm tapeworm are spread from man to livestock and back to man because of the lack of sanitary privies, and both of them can be prevented by the use of sanitary privies.

The conditions of the unsanitary privy are well known. The privy that is sanitary must meet the following requirements: The excreta must not touch the ground; hence some kind of water-tight receptacle (box, vault, tub, barrel, etc.) must be used under the seat. Domesticated animals must not have access to the night soil; therefore the privy should have a trap-door in the back to exclude them. Flies and other insects must not have access to the excreta; therefore the entire privy must be made rigidly flyproof, or some substance must be used in the receptacle to protect the contents from insects.

The two types of sanitary privies are the "dry system" and the "wet system." In the "dry system" privies dry earth, road dust, wood shavings, or lime is left in the privy and is scattered on the excreta every time the privy is used. The dry system, properly managed, is cheap, desirable, and decreases the chance of infection by insects. But it is difficult to make a dry privy rigidly flyproof, since flies usually do have more or less access to the excreta, on which they feed and lay their eggs. To be efficient, there must be careful cooperation of all persons who use the privy, and it is difficult to secure this, especially with children. The use of a dry privy increases the amount of material to be removed, therefore increasing the necessary labor and frequency of cleaning. And unless dry earth or lime can be relied on to destroy all disease germs in the excreta.

In the "wet system" privies some fluid is used in the receptacle to act as an insect repellent, disinfect the excreta, or to increase the destruction of disease germs in the excreta by natural fermentation. The receptacle is usually filled about one-fourth full of water, on the surface of which a cup of petroleum is poured. Two receptacles are provided, one covered and permitted to stand so as to lengthen the period of fermentation, while the other is being used under the seat.

The advantages of the wet system are that it is cheap, decreases the offensiveness of the privy contents, decreases the chances of spread of infection by flies because they cannot breed in the excreta, and kills or renders harmless a considerable portion of certain infections contained in the excreta. Moreover its efficiency does not depend so much upon the cooperation of all persons using it. However, it is more difficult to keep clean than the dry system, because of the danger of soiling the floor when the receptacle is emptied; and unless the receptacle is very deep there is likely to be more or less splashing.

A new privy has been devised by Lumsden, Robert, and Stiles, of the Public Health Service, which has probably less disadvantages and more advantages than any style heretofore used. The apparatus designed has been in constant operation in one of the workrooms in the Hygienic laboratory at Washington during the past year, and is said to have proved very satisfactory. Tests of the device are now being made in out-of-door privies in order to determine the effect upon it of varying conditions of temperature and humidity, to bring out whatever objectionable features may arise in connection with its general use, and to determine the simplest methods of satisfactorily managing it.

The apparatus consists of the following parts: A water-tight barrel or other container to receive and liquify the excreta; a covered water-tight barrel, can, or other vessel to receive the effluent or overflow; a connecting pipe about 2 1/2 inches in diameter, about 12 inches long, and provided with an open T at one end, both openings of the T being covered with wire screens; a tight box, preferably zinc lined, which fits tightly on the top of the liquifying barrel and is provided with an opening on top for the seat, which has an automatically closing lid; an anti-splashing device consisting of a small board placed horizontally under the seat about an inch below the level of the transverse connecting pipe and held in place by a rod which passes through

the box or rings fastened to the box, and by which the board is raised and lowered.

The liquifying tank is filled with water up to the point where it begins to trickle into the effluent tank. And, as an insect repellent, a thin film of some form of petroleum may be spread on the surface of the liquid in each barrel.

When the privy is to be used, the rod is pulled up so that the anti-splashing board rises to within about 1 inch below the surface of the water. The fecal material falls into the water, but this board prevents splashing, and thus overcomes one of the greatest objections thus far raised to the wet system. After use, the person sinks the anti-splashing board by pushing down the rod, and the fecal matter then floats free into the water. Any fecal matter which floats on the surface is protected from fly feeding or breeding by the water itself, by the film of oil, by the automatically closing lid, and by having the apparatus located in a screened place.

The fecal matter becomes fermented in the water and gradually liquefies; as the excreta settles, the level of the liquid is raised and the excess flows into the effluent tank, where it is protected from insects by the cover and by a film of oil. This effluent may be allowed to collect in the tank until it reaches the level of the connecting pipe, when it may be disposed of in various ways.

A suitable metallic vessel is provided to receive the effluent, a fire may be built under the vessel and the effluent heated to 212 degrees F. or if a wooden or concrete effluent tank is used, the effluent may be transferred to some other vessel for heating. After such treatment the fluid may be safely used for fertilizing under any conditions. Burial of the contents of the effluent tank decreases the danger of spreading infection, but in the present state of knowledge this method cannot be relied upon as perfectly safe. If the burial of the effluent is practiced, the fluid should be disposed of not less than 300 feet from the house and not less than 100 feet from the water supply, and then only provided the soil itself is a good filter. Burial in a limestone region may contaminate water supplies miles away.

One of the elements of the right chemical disinfectant, such as chlorinated lime and certain coal-tar derivatives, are cheap and can be relied upon to destroy the disease causing bacteria. Their use in destroying the eggs and spores of the various animal parasites does not seem to be quite so efficient. Chemical disinfection, with subsequent burial, can probably be safely relied on as a method of reducing the danger from animal parasites.

If this type of privy is managed fairly intelligently, the indications are that the liquifying tank will rarely need cleaning, probably no other cleaning does become necessary, it can be done by taking the barrel out and burning its contents; or the contents may be dipped out or poured out and burned; or several barrels of water can be poured gradually into the liquifying tank and the slush stirred thoroughly until it runs over into the effluent tank.

This kind of privy should come up through the seat board at the side of the hole. By this arrangement the anti-splashing can be raised directly out of the water and thus used to sink toilet paper and fecal matter. Various receptacles can be used for the effluent tank. If an iron pot is used, it should be placed on stones or provided with legs so that a space is

left under it to permit the building of a fire for disinfection.

Either a barrel, iron tank, box, brick vault, or concrete vault can be used as a liquifying tank. Whatever is used for the purpose must be strictly water tight and should fit snugly under the seat. Iron or concrete will cost more than wood, but on account of greater durability will be more economical in the long run. The tank may be ventilated by a pipe extending through the rest to the roof or through the back of the house; and this ventilator should be screened. The larger the family the larger the liquifying tank must be. A 40 gallon barrel is sufficient for a family of three adults. For a larger family the size of the receptacle may be increased, or two or more barrels may be used. In the experimental privy only the regular toilet paper was used, and this liquefied promptly. If heavier paper were used, it would break up more slowly, and allowance for it might have to be made by increasing the capacity of the tank.

One advantage that this apparatus possesses is that with very little expense it can be put in the outhouses already in use, or in a barn or woodshed. But wherever put, it should be screened against flies.

From the out-of-door experiments with this privy, it is found that two factors unimportant in the case of the in-door privy must be considered, — that is, evaporation and changes of temperature. In cold weather the fermentation is not as rapid as in warm weather and on this account the contents of the liquifying tank thicken in winter in some localities. Evaporation, out-of-door varies greatly with the wind, humidity, and temperature in different regions, and the greater the evaporation the thicker the material in the liquifying tank becomes. When thickening occurs, it is necessary to add water to the liquifying tank, just as one would add water to a bathtub. How much, under different adverse conditions, has not been determined, but a bucketful once a week will probably be sufficient under ordinarily unfavorable conditions, and with a family of three or four adults.

Every farmer should not only see to it that any privies on his own farm are sanitary, but he should use every endeavor to bring about the use of sanitary privies throughout his neighborhood, — on other farms, at the local school house, or at country churches. Lack of sanitary privies on other farms or at the local school-house may be responsible for cases of typhoid fever or other infections in his own family. For disease germs may be carried for considerable distances by flies, by animals, by feet of persons, by wagon wheels, or by drainage from one farm to another.

"FLIRT-COP" FOR DENVER.

Are you tall, good looking, and magnetic—the sort of man that women will turn to look at? If you are there is a job waiting for you on the Denver police force. You won't have to wear the blue coat and brass buttons—your uniform will be the best that the tailor and haberdasher can produce—for your task will be to lead flirtatiously inclined women into the police net.

In a word, Denver is to have a "flirt cop," but this individual is to be a man—a Puritan in Don Juan guise—who is to discover when a roguish smile, a sparkling eye, and a flash of sullen anger spring from sheer feminine coquetry and when otherwise.

"The women of Denver are well protected," said a member of the fire and police board, "and how we must see about protecting the men."—Denver Dispatch to New York American.

Witte Distillate Engines

SIZES 2 TO 10 H. P.

Material, workmanship, horse-power and fuel consumption guaranteed for five years. Any engine can run for thirty days. The real test is ten or fifteen years. The guarantee is not made by us, or the coast representative, but by the manufacturers themselves. The manufacturer of a good article is never afraid to stand back of it.

All made in horizontal type, engine base full length, strong and lasting. Cylinder entirely surrounded by water. Power in line with base. No overhanging cylinder, full base rest. No valves in cylinder. Can't drop in and cause trouble.

Lever to advance spark, no back kick. Suction feed, Template system. Interchangeable parts.

Now, Mr. Farmer, a word with you. I am one of those fellows myself, so you can see I know your requirements perfectly. The water will soon be turned out of the ditches and you will need water. Let your memory drift back to last September and October, when you were very busy and you had to stop and pump water up into your tank by hand.

Get a Witte and save the labor. We carry a full line of Pumps, Belting, Jacks and Force Pumps.

Our goods are of the quality which give you satisfaction long after the price has been forgotten.

This Land Will Sell RAPIDLY

Because It Is a Proven Land Purchasers Can See What the Land Produces

Now Selling Land in the

Second Section

OF THE

"LAND OF KERMAN"

45 Minutes From Murray's

To go to the "Land of Kerman" in an automobile requires just 45 minutes. Just 45 minutes from the most progressive real estate firm in the most rapidly growing city in Central California, to the "Land of Kerman," the most fertile, the most productive agricultural section in the world. The "Land of Kerman" could as well and truthfully be called the land of plenty or the land of prosperity. It is a land of proven productivity, a land where the opportunities to become independent are the brightest to be found anywhere.

The "Land of Kerman" will produce the fruits of the tropics and the fruits of the temperate zones in equal perfection and side by side. Oranges, lemons, figs—products of warm, favored climates—ripen early and attain perfect development in the "Land of Kerman." Grapes, peaches, apricots, prunes, vegetables—all products of the temperate climates, are raised in the "Land of Kerman" in quality and quantity that can not be surpassed anywhere.

The "Land of Kerman" is already a thickly settled community. There are many schools, churches, a fast growing town, good roads, telephones, electricity, rural delivery—everything that modern communities have. Buying in the "Land of Kerman" is by no means a pioneering proposition. It is buying unimproved land in a locality already well settled. This is a condition not often met with in rural real estate. It is the case here because this is the second section of this land. The first is all sold. The second will soon all be sold.

Be Sure to See the "Kerman" Exhibit at the Fresno Fair

At \$175 an Acre

Well on Their Way to Prosperity In the First Section of the Land of Kerman

45 Reasons Why You Should Buy

The "Land of Kerman" is close to Fresno, has modern conveniences, the most fertile soil, the best of schools, churches of many different denominations and congenial neighbors. The land has first water right and there is plenty of water at a cost of only 62 1/2c an acre. The land is level, and is a splendid investment at \$175 an acre. The easy terms, \$17.50 an acre down, with payments of \$3.50 an acre a month, mean independence for many. Social conditions are ideal. Pure, soft water, free from alkali, can be found at a depth of 60 to 80 feet. All sorts of fruit can be produced in the "Land of Kerman," oranges and lemons, peaches and apricots; alfalfa also grows luxuriantly on this land and sells at \$8 a ton and up. The market is close by. This is a fine dairy country. It is on the Southern Pacific railroad and an electric road will be built. The town of Kerman is a clean, beautiful town, growing rapidly and has parks, a national bank, a creamery, an alfalfa meal factory. The climate is ideal, and unusually healthful.

The "Land of Kerman" is soil that is free from alkali, and free from sticks and stones. From \$50 to \$500 can be made on this land per acre, and the land values are increasing steadily at the rate of \$25 to \$50 an acre each year. This land is near the San Joaquin river. It pays for itself besides providing a good living for the owner. Crops are certain; there are no tree parasites, and the Kerman fruit commands highest prices.

People who bought in the First Section are making the Land support them and pay for itself

They Refuse Several Times What They Paid

AGENCY DIRECTORS PLEASED WITH MEETING

Re-election of O'Donnell
and Regua Secured By
Unanimous Vote.

President St. Clair Shows
Where Main Storage
Cost Will Lay.

Local oil men, returning from Bakersfield yesterday, were very much pleased with the results accomplished at the meeting of the directors of the Independent Oil Producers' Agency on Friday. The spirit of the meeting, as shown in the short talks given, was to have the members bury small differences and pay more attention to the real purpose of the Agency. That spirit was manifested in the vote given the storage plan. There were many who held different opinions concerning the plan, but the men who had worked upon it felt that it would solve a problem, long involved, and the other members backed their differences and voted to accept the plan. Notwithstanding the fact that there were differences of opinion on several matters before the meeting, when these matters were put to vote, the

directors were harmonious and it was this harmony of action that made the meeting such a success. In the opinion of Fresno men who were present, the most enthusiastic action taken at the meeting, in the minds of the local directors, was the re-election of Thomas A. O'Donnell and Regua to the board of directors. These men, resigned from the directorate some time ago because of criticisms aimed at them regarding their interest in companies which had so-called special contracts with the Agency. The action on Friday was taken to mean that those really interested in the welfare of the Agency, had nothing but respect for these directors.

MUST RATIFY PLAN
The adoption of the storage plan by the directors of the Agency does not put it into effect. It will now have to be adopted by the members of the Agency. In this case, the board of directors of each company holding an Agency contract, will be obliged to accept or reject the plan. Any of the boards of directors have already done so and it is expected that all will ratify it. For the benefit of company directors who are not entirely familiar with the plan, the Agency will send a number of the executive committee to meet with them, at they desire it, and explain in detail all the workings of the storage plan. This has been decided upon so that all may be fully acquainted with the project they are considering.

The proposition was made at the meeting on Friday that within six months, many companies now outside the Agency would seek admittance. In the course of the meeting a question arose as to whether the Agency really needed any storage. A reply to this was made by Stanley Morgan, head, vice president of the Agency, who said that an agent of the Agency was in London recently negotiating for a big contract and returned the contract solely because the Agency had not enough storage to handle it. It was further explained that the presence of a large amount of storage oil had been the means of securing many other contracts.

The action of the directors of the

Agency in giving the power to a committee of five to receive resignations of directors, is interpreted by local men to mean that President St. Clair and this committee of five, who have not yet been named, will select a new board of 15 directors. This committee has been given the power to accept or refuse any resignations it received, until the number has been reduced to twenty-five.

In leaving to the committee consisting of Attorney Walsh, Lane and Andrews, the question of the release of members who have sided with the Agency, the directors of the Agency did so with the understanding that if this is the least question as to the validity of the release, none will be granted.

BURDEN OF COST
"I think the injustice, if there is any, would be the other way around. We have this burden of storage in carry, and this plan is the only way in which we can better storage oil from participation in current sales. At the present time our current sales amount to about one-tenth of the total of our available oil each month. In other words, a company with a production of 10,000 barrels gets paid for about 1,000 barrels, and the remainder of it goes into storage. The man who has a big lot of oil in storage gets the big checks. We are asking this man to let his oil sit in storage, to let it rot, to let it go to waste, when he cannot touch it. You must remember, too, that the total cost under the new plan will be 25 cents per barrel less than we are now paying for storage."

Mr. St. Clair went on to explain that the final decision respecting the storage plan will rest with the directors of the several oil companies that compose the agency. These directors will have to vote on the proposition of placing their oil in the storage company and taking stock therefor. "I expect it will be necessary to do a large amount of missionary work. Some members of the executive committee will have to meet with nearly every board of directors and discuss the plan with them, because I consider that this storage plan is the most important matter that has come before the agency. I do not want any of you men to take my judgment. I want you to decide wholly for yourselves, but I will say that in all my business career I have never approached any plan with so much assurance, with so much confidence, as I feel in this."

AGENCY AT CRISIS
"I believe that the agency is at a most important crisis. We have had a hard row to hoe in the past, but the outlook is brighter. Last month's sales of oil were the largest we ever had. I believe the sales are going to increase. With the retirement of the storage oil prices will go up. If the agency members will get together, put their shoulders to the wheel and show the old enemies I believe that in six months' time a position inside this agency will be most attractive."

"I do not want to press my own opinion upon any one, but I hope that the directors will approach the consideration of this storage plan in a fair and open frame of mind, not with the

idea that something is wrong about it, although you cannot just put your finger on the defect."

"What arrangements have been made to finance the scheme?" was asked. "Our arrangements are only tentative now," said Mr. St. Clair. "At a former meeting we announced that the money was ready at any time, but we have fussed among ourselves and delayed in getting a quorum until the situation is a little changed now. We are assured, however, that the money will be forthcoming within thirty days, and we are assured that the scheme will go through."

PLAN IN BRIEF
The storage plan in brief is as follows: A corporation will be organized, capitalized at \$2,500,000. Ten year bonds bearing 7 per cent interest will be floated to build storage for 100,000 barrels of oil. Fifty-one per cent of the stock will be common and held in the control of the agency. The remaining 49 per cent is to be preferred. Members of the company are to receive storage certificates bearing 5 per cent interest on oil, on an arbitrary oil valuation of 25 cents per barrel. The money for the payment of the expenses of the company's sinking fund, interest on the bonds, insurance, etc., is to be derived from the sale of the storage oil as the needs may be, and those companies participating in the scheme are to be given preferred stock in the ratio in which they contributed to the sales oil. At the end of ten years, or at any time previously, when the bonds are redeemed, the common stock is to be distributed to those holding preferred stock in the ratio.

A board of five directors is to control the company, three of whom will be named by the Union Oil Company. The Union company agrees to purchase sufficient oil from the storage company to make up the deficiency in its obligations should ever the contingency arise.

CAMP OF STANDARD COMPANY DESERTED
BAKERSFIELD, Sept. 30.—The big main camp of the Standard Oil Company on section 24 in the Midway near Taft, where a few months ago fifteen men were in operation, is practically deserted. The Standard has several wells on the section and four pumping stations are busy, but the big body of men and machinery has disappeared. One man is attending to the four pumps and the large bunkhouses, once alive with drillers, pumpers and tool dressers, are deserted. The Standard has left the section for more promising territory. It is said that the four wells are not making over 100 to 125 barrels a day all told.

The Gundlach Tank Company is building ten large tanks for the Standard at the Gundlach's house in Taft.

DEVELOPMENT NEWS FROM KERN FIELDS

BAKERSFIELD, Sept. 30.—Between Fellows and McKittick three guishers are in operation on the American, Honolulu and Santa Fe properties. The Engineers' Oil Company near McKittick is experiencing trouble in shutting off the water in its well No. 1 well and have found it necessary to re-rement the water.

The Redlands Oil Company, operating in the Elk Hills, has leased a 20 acre tract for a new well.

Electric motors are being installed at wells Nos. 22 and 25 of the Redwood Oil Company near McKittick with Lewis Hudson, who comes from Bradford, Pa., in charge.

The Union Oil Company has decided to suspend operations on its Sheridan lease in the North Midway, having gone down 1700 feet without getting oil.

The cook-house and rig at the Belridge camp on 21 are completed.

The Wilson & Alhambra Tracts.

Fresno's Really Exclusive Residence Section

About the Improvements
The Wilson and Alhambra tracts, adjoining additions to rapidly growing Fresno, are north of the city in the direction in which Fresno is growing fastest. These districts have already a large number of beautiful residences, and the lots are in demand because this is a section that makes restrictions on the class of buildings that may be erected. All modern improvements are already there. Concrete sidewalks, gas and city water, telephone lines, electric lights, sewers—all of the things that make up a select residence district. Those who buy and build in this tract are assured of good neighbors. The restrictions guarantee that. These lots are sought by those who are particular about where they build. This is a genuinely exclusive residence section.

The New State Normal
One feature that will appeal to buyers, who are careful about where they establish homes, is the fact that these tracts are near the site chosen for the new State Normal School. After a careful canvass of the different sections of the city, it was finally decided that this part of the city was the most desirable, that it offered the greatest advantages as a site for the Normal School. This goes to show how this section is esteemed by disinterested parties. It goes to prove that this part of the city is the most desirable of the newer districts of Fresno. If you do not trust your own judgment in choosing a building lot, surely you will place confidence in the decision of the men of experience who have seen fit to select this portion of the city in preference to all others.

A Really Restricted District
Every Modern Improvement
In The Direction of the Logical Growth of Fresno

Another important feature, and one in which the Wilson and Alhambra tracts are superior to others, is the Ten Minute Car Service. Every ten minutes there is a car leaving for the center of the business part of Fresno. Persons who make their homes in the Wilson and Alhambra tracts are able to reach any part of Fresno without any irritating waits. Anyone who lives where the car service is irregular or indifferent, or where there is no car service, will be able to appreciate this feature at its full value. The many residents of these tracts will assure you that the car service is the best that can be found anywhere. In making a choice of a place to build a home, there is no one thing of greater importance than the transportation facilities. The Wilson and Alhambra tracts are superior in this respect.

One more thing that should be considered in making choice of a location for a home. Be sure to build where values are increasing. As the Wilson and Alhambra tracts offer superiority in other respects, so do they offer superior prospects in increasing values. Fresno is growing in this direction with greater rapidity than in other directions. This is the exclusive portion of Fresno, the part where values are certain to advance with greatest speed. This is not a new tract that is being exploited. It is an addition where there are already a large number of beautiful houses, an addition that has grown in popular favor because it offers more reasons why homes should be built there.

Every Man Should Own a Home—Buy One at Calwa

CONSIDERING Calwa from the view-point of the home seeker, there are many reasons why it is a desirable place to live. The lots are cheap—only \$250 and up—and they are sold on small initial payments and small monthly payments; 10 per cent down and \$15.00 a month is the rate. There are many improvements that are included in the purchase price, expenses that will be saved to investors. There will be concrete sidewalks, curbed and graded streets, and there will be city water already piped to the rear of each lot. There is already a good school, and there will probably be a reading room. These are a few of the things that make Calwa a pleasant place to live.

CALWA is going to be the greatest railroad town in the San Joaquin Valley. The Santa Fe is building a \$1,000,000 plant, one that will be model in every way. When it is completed, all of the railroad business carried on in Fresno will be transferred to Calwa. This work is under way now. All of the trainmen and shop employes will be required to live in Calwa then. This means a large population alone. Besides being a railroad town, Calwa will be a factory town. It is the ideal place for locating factories. There are raw materials on all sides in abundance and there is unlimited quantities of the best and cheapest fuel in the world within a very short distance. Many factory owners are looking for suitable sites in the San Joaquin, and there is every reason why they should locate at Calwa.

We are offering these lots for sale at a time when there is little demand for them, but at a time that immediately precedes a great demand. When we say a small demand, we mean that it is comparatively small. We say the demand will soon be great and we are able to offer pretty conclusive reasons why this is true. A large population means a large demand and a large population is assured. Therefore the demand is assured.

There comes a time in the life of each man when he wants a home of his own. Buying a home is a matter that demands thought and careful selection. There are many things to be taken into consideration. We believe that the lots we are offering will show more advantages than any others.

We want the opportunity to explain to you in detail why Calwa is the place for you to buy. We only ask to be allowed to tell you about it, to show you the lots and the work that is being carried on. We have a little booklet that tells all about Calwa. If you are interested we would like to send it to you. Then we want you to call at the office and ask any questions you will about things that are not fully clear to you.

CALWA

McCoon & Kellogg Tract

THE HEART OF THE CITRUS BELT

The Best and Lowest Priced Citrus Land Within 20 Miles of Fresno

There is a great scramble to get the citrus lands of Central California. People are awakening to the fact that while these lands are the best in the world, there is a limited quantity of them. They are advancing in price all the time. Orchards of citrus fruits command the highest prices. Fresno county has citrus lands as good as can be found and the fruits are of the first quality. They have many advantages that lands in other places have not; they have transportation, are near to a rapidly growing city and are lower in prices. The McCoon-Kellogg tract, the best of these lands, is within 10 miles of Fresno.

This Land Can Be Bought On Easy Payments

A Small Initial Payment Down the Balance in 2-3-4-5 and 6 Years at 6 Per Cent

We Also Do A General Real Estate Business

Fresno Realty Syndicate
1035 J Street, Fresno, Cal.

Chas. Teague, S. N. Griffith, O. T. McCoon and A. S. Kellogg Form Syn- dicate

Big Real Estate Firm Launched Which Means a Great Deal to Fresno Buyers As Well As New Comers

The above well known men have recently launched a new real estate firm, one that is to make a decided ripple in real estate circles. It has the financial backing to handle the biggest projects; it has plans to handle every kind of real estate, barring none. It is composed of progressive men, and means a great deal to Fresno, to Fresno buyers, and to persons who come here from other places. The men who are connected with this firm are all well known as men who want to do the right thing and to advance the interests of Fresno. They will make real estate take on new activity. This formation of this firm marks a new era in Fresno real estate, one that will do a great deal to make Fresno a great city, to hurry her on to the place of power and wealth that Destiny has assigned her.

All of the men who are connected with this new firm are men of long experience in the real estate business. They are well and favorably known to the people of Fresno, where they have long resided. They are men of sterling integrity and up-to-date honesty. That this firm will become a power in local real estate circles is a foregone conclusion. They are all energetic men, men who are accustomed to going after things and winning out from keeping constantly after what they want.

In order to get a favorable location, one that will put them in touch with the people who are in the market for real estate and to make the offices of

the Fresno Realty Syndicate easily accessible, they have found it necessary to buy out a men's clothing store, that of E. B. Prettyman, at 1035 J street.

This one incident proves the determination of the men who are at the head of this new firm, and it shows that nothing will be allowed to interfere with the plans of the company to make the Fresno Realty Syndicate a power in Fresno, a real estate firm that will make its power felt. All that aggressive business activity can do will be done.

It is the intention of this company to handle real estate of every kind. They will deal in city property and in country

property, in improved lands and in unimproved lands, in orchards and in vineyards, in dairies and in grain lands, in alfalfa lands and in grazing lands. They already have large listings and will be able to supply anyone with the kind of a place wanted. They will have the most complete listings to be found anywhere in Central California.

All of these men are men who are thoroughly conversant with the surrounding country. There is probably not an equal number of men in the country who are so thoroughly familiar with the surrounding country. This will prove a great help to buyers.

A Few of the Offerings that This Firm Has Listed

IF YOU WANT CHEAPER LAND, WE HAVE IT.

80 acres, 2 miles northeast of Reedley; fine soil and surrounded by fine homes; \$100 per acre. 160 acres near Cutler; 5 acres Tokays, 15 acres Malagas, 6 acres oranges; fine orange land. This will sure bring you \$125 per acre.

80 acres dairy, 10 acres alfalfa, 70 Bertruda; 7 room house, 2 barns, tank house, all fenced; 30 head of dairy cattle, 2 horses, hogs and machinery. Hold your breath while we quote the price—\$6500; one-half cash.

See Magee, with McCoon & Kellogg. Phone 626.

SOME CHOICE SMALL RANCHES.

20 acres, 2 1/2 miles east, 18 1/2 acres Muscats, 12 years old; 1 1/2 acres alfalfa. The very best of soil. 3000 trays and 100 sweat boxes. \$7500; terms. This is ready for subdivision.

20 acres, 4 miles west, near McKinley school; new 4-room bungalow, barn, 1000 trays; 10 acres Muscats; 5 acres Thompsons and 5 acres Elbertas, all 5 years old. Fine deep soil and the best bargain to be had anywhere.

20 acres, 5 miles northeast; 5-room house, large barn, lots of shade; 3000 trays, 85 sweat boxes and farm machinery; 8 acres seedless Sultanias; 16 Thompsons and 10 acres Muscats, all just full bearing; \$7500. Will exchange for city property.

20 acres, 6 miles north, leveled, \$1800.

25 acres, 1 1/2 miles west of Selma; 5 acres Muscats, 8 acres Muirs, 8 acres alfalfa, 4 acres pasture; 4-room house, good barn, 2000 trays and 80 sweat boxes; plenty of shade and nice

sandy soil, in the peach belt. You can't beat this one for \$7500.

See Magee, with McCoon & Kellogg. Phone 626.

MIXED RANCHES.

If you want a mixed ranch we have it and a fine one, too.

50 acres; 2 acres peaches, 4 years old; 31 acres of Muscats, 4 years old; 1 acre family orchard; 15 acres alfalfa; 4-room house and good barn; close to good school. See this one before you buy.

40 acres; 3 miles out on Jensen avenue; good 5-room house, barn, tank house and other outbuildings; 10 acres alfalfa, balance pasture; all machinery and stock. A nice close in home. \$10,500 takes it.

ALFALFA LAND.

40 acres in the famous Barstow Colony. 30 acres fine stand and 10 acres leveled; 2-room house, small barn, new wagon and other farm machinery, 2 horses, harness and 4 cows; hogs, in fact everything ready to go to work. Will take nice property on this. A sure bargain at \$7000.

60 acres. In same locality; 40 acres alfalfa; 1 1/2 acre orange trees, family orchard, balance peaches. Good 6-room house, barn and other outbuildings. An ideal home. One of the best homes in the country; \$12,000.

SOME BARGAINS IN SUBURBAN PROPERTY.

1 acre; suburban home; 4-room house, pumping plant, and mostly set to trees and vines; \$1700.

5 acres, 2 miles northwest on Belmont; new bungalow, pumping plant, tank house and barn. A bargain at \$3500; terms.

10 acres north on Blackstone, all in 4 year old apricots. Just think of it! \$4000, one-half cash.

LARGE TRACTS.

7000 acres, within 10 miles east of Fresno and fine tract for sub-division, at \$40 per acre.

1500 acres in citrus belt, northeast of Clovis, at \$40 per acre.

5000 acres just across San Joaquin river in Madera county. \$30 per acre.

520 acres on Kings river, partially improved, at \$40 per acre.

We have several good large tracts in the San Joaquin Valley suitable for subdivision and would be pleased to show them to any one interested in good large tracts for subdivision.

VACANT LOTS.

Coast Ave.—Lots \$400 each. \$100 down, \$10 per month.

Nielsen Ave.—Near Van Ness. 75x150 ft., \$3200, one-half cash.

Van Ness Ave.—North of Belmont, 115x165, \$2000, one-half cash.

Belmont Ave., near Fresno—75x150 ft., \$900; \$200 cash.

Blackstone Ave., near Van Ness, modern 6-room house, lot 45x125, for \$2500 cash.

Cor. J and Amador, 8-room house, modern, lot 50x90, price only \$4000; terms.

Forthcamp Ave.—New 7-room house, large rooms, built-in bookcases and buffet, large fireplace. An exclusive home in an exclusive neighborhood. Only \$4500, \$1500 cash.

Suburban Home, near North Park car line. 8 large rooms, high ceiling, hard finish, bath, 90 ft. veranda, cement sidewalks, lot 90x150. A cool, comfortable home. Gift at \$3700.

I Street—1800 block; 6 rooms, high ceiling, modern; lot 50x150. Bargain at \$2800; \$1000 cash.

R Street—New bungalow, 6 extra large rooms, beam ceilings, bookcases, buffet, cabinet kitchen, arrangement and finish unsurpassed. \$3000 cash; terms on balance.

O Street—700 block; 6 rooms, modern cottage, lawn, shade, good cellar; \$3500 and one-half cash.

News of Foreign Capitals

TOO MANY JUDGES IN GERMAN EMPIRE

Excessive Litigation Is a
Burden on the
People.
Court Procedure to Be
Made More Severe as
a Check.

Excessive litigation is coming to be recognized as one of the worst habits of the German people as a whole. A statistician has recently found that during the year over 2,500,000 cases at law were of the most trivial character—so-called "bagatelle" cases. As a consequence of this predilection of the people to appeal to the courts about trifling matters, the number of judges is relatively much greater in Germany than in Anglo-Saxon countries. There are not less than 8,974 judges in Germany, or about one for every 6,000 of the population. In Berlin alone there are 1,158 judges.

Just now the government is occupied with a bill for the reform of judicial procedure, which is in part designed to check excessive litigation.

One cause for the pressure of work at the courts is to be found in the fact that mayors of cities and police officials have no judicial functions in Germany. Litigation is also encouraged by the reasonableness of lawyers' charges, as well as the costs collected by the courts themselves. Lawyers' fees are strictly regulated in civil cases according to a scale based upon the amount of money involved.

GOSSIP OF FORMER PRINCESSES

The publication of the gossip autobiography of Madame Tseu, former crown princess of Saxony, has been much discussed in Germany, where the book has made a painful impression and has been generally condemned by the newspapers as a grave breach of common loyalty to old friends and relatives. Much curiosity was felt as to what action the Saxony court would take in view of the publication since the contract between it and the former crown princess, under which

she receives an annuity of nearly \$10,000 from the court, contains a clause restraining her from publishing anything against her former husband. It is understood, however, from Dresden sources that the king decided at once to take no notice of the book, believing that the best course toward his former wife would be to let her choose her own way to destroy the remnants of popularity that she enjoys with the Saxon people.

TRANSPLANTING BONES.

The remarkable success of American surgeons in transplanting organs of the human body have awakened much interest among German surgeons who are doing similar work. Professor Hermann Kuttner, of Breslau University has recently succeeded in giving a patient a new shoulder joint through transplantation. The patient was suffering from a tuberculous shoulder joint, which it was found impossible to treat by the usual method of cutting away the diseased tissue. The surgeon therefore decided to transplant a joint from a man who had just died from water on the brain. The joint was removed six hours after death and kept in a certain solution sixteen hours at a temperature just above freezing, then, after a bacteriological examination, it was inserted in the place of the tuberculous shoulder joint, both ball and socket of which had been removed. The wound healed without any inflammation developing.

SEEKS CURE IN CLOUDS

The strangest proposal of several hundred made to Melvin Vaniman to obtain a berth on the dirigible Alcon during the attempt to fly across the Atlantic from this city next month was made by A. J. Matthey, of New York. Matthey wants a chance to get off the earth, even for a brief period, and believes it will cure an ailment from which he has suffered long years. "I am afflicted with chronic neuritis of both eyes," he writes. "The suffering I have been forced to stand from my ailments for many years qualifies me for the hardships and privations that are apt to be the lot of the Alcon's crew. I can stand it without a murmur and be useful, no matter what happens."

"I believe that I have undergone more than my full share of pain in this world, and although I wish you every success in the expedition, I'm not afraid to pass in my checks if disaster should overtake the ship. In fact, I'd welcome a chance to get off the earth, even if the period be brief. It may be a trip through the air over the ocean would effect a cure to my eyes, a thing that has baffled specialists."—Atlantic City Dispatch to New York Herald.

RUPTURE CURED

A complete and permanent cure guaranteed. No time lost; no cutting; no danger. Dr. Hunt, 350 Forsyth Bldg.

PROTECTING FRENCH WORKS OF ART IN LOUVRE

Baron de Constant Writes
His Impressions of
America.

Belgian Princess Gives Life
to Bonapartist Propaganda.

PARIS, Sept. 30.—M. Pujollet, the administrative expert, whom the government has entrusted with the task of reorganizing the Louvre Museum, has lost no time in setting about his by no means easy undertaking.

A very brief examination revealed to him the appalling manner in which the nation's art treasures were left unguarded, and his first step was to immediately close a number of rooms for which no guardians were available. These rooms will in the future be opened to the public only in turn on one or two days of each week. The museum henceforth will be opened at 11 o'clock in the morning instead of at 9.

To prevent the recurrence of a theft like that of the Mona Lisa a rule has been made that no picture may be removed from the wall without a written order signed by the Curator and which must be left with the guardian in charge of the rooms who keeps it until the picture is returned to its place.

M. Pujollet decided to furnish the staff of night watchmen with two watch dogs, and selected them at the police kennels at Charenton. The animals, who combine ferocity with sagacity, answer to the names of "Jack" and "Mollie"; the first being of Greenishland origin and the second hailing from Belgium. The dogs will accompany the night watchmen on their rounds.

"I AM LA JOCONDE."

The theft of the Mona Lisa has developed some curious incidents. Among the horde of sordid beggars who importune the faithful on the steps of the old church of St. Eustache in Paris' Central Market square was a woman of 35 years, decently dressed in black, who stopped the passersby, requesting to be taken to the Louvre.

"I am the 'Joconde,'" she said, "and the person who carried me off has abandoned me. I have no home."

The unfortunate woman was taken by policemen to the Police Infirmary, where officials communicated with her family. She had been missing from her home for two days.

NOVEL MONOPLANE.

The aviator, Latham, has just concluded the trials of a novel monoplane, the invention of the engineer, Levasseur. Designed for the military service, it is of exceptional strength. It has a lifting surface of 160 square feet and weighs the surprising weight of 1,700 pounds. Its most vulnerable parts are armored with aluminum plates which, while they would not be very effective against a Lebel bullet and will lose against a shell, nevertheless constitute a certain protection for the engine, the levers and the aviator.

FRENCH "IMPRESSIONS."

Baron d'Estournelles de Constant has finished writing a series of impressions of the United States. His object has been to make the French people better acquainted with the United States, especially with the South and West. Fifteen chapters have appeared in Le Temps. Some of them are on Kansas City, Lincoln, Denver, Colorado Springs, Salt Lake City, Seattle, Port-

land, St. Louis, St. Paul, New Orleans, Minneapolis, Madison, Milwaukee, Chicago, Urbana, Cincinnati, Pittsburgh, Philadelphia, Baltimore, Boston, Buffalo, Lake Mohonk, Vassar College and New York. He has chapters also upon the states of California, Arizona and Texas.

Baron d'Estournelles looks upon the American, what sort of folk they are and what they are doing through the eyes of a Frenchman with plenty of amusing incident and keen criticism but without an unkind word.

BONAPARTIST CAMPAIGN.

Since Prince Victor Napoleon and princess of Belgium were married last year the Bonapartist party has been unusually active. The princess has taken an intense personal interest in the party's plans and is willing to use a large part of her fortune. A committee works mysteriously in France spreading Bonapartist "feelings" in the army and among members of parliament. A fund has been started which it is claimed shall amount to \$2,000,000 to finance the movement.

The French government has given little heed to the conspiracy except to keep informed. No objection has been made to the Belgian government on account of the meetings that are held in the residence of Prince and Princess Bonapartist at Brussels.

INTOXICATED SH.

An unusual sight was witnessed this week at Fontenay. The ponds of Eau de Blanches and the Mill Canal were covered with fish floating about on the surface in a helpless and altogether inexplicable manner. The custom officials were the unwitting cause of the phenomenon. They had seized 60,000 gallons of "doctored" Spanish wine at the frontier station and disposed of it by emptying it into the canal, with disastrous effects on the fish. The fish could be easily caught with the hand and the local fishermen were quick to take advantage of their helpless state.

DEVICE DEFIES SMOKE

Fireman's Invention Carries Air to Fighters Through a Hose. An opportunity to try out a new smoke protector came when a little blaze started in a cellar at 62 West Houston street.

The smoke defier was invented by James D. Halloran, of Engine Company No. 26, who temporarily attached to Engine Company No. 40. It consists of a length of garden hose, reinforced by spiral wire, and is stretched from the street with the fire hose. The outside end of this small hose contains a screen to prevent foreign objects from being sucked into it while in use. The other end is held by a fireman at the nozzle.

Attached to the inside of the small hose are several small tubes leading to a device resembling the nose guard used by football players. It fits securely over the nose, and is held in position by the pressure of the teeth. The operation depends on a simple principle of physics. The higher pressure of the air as it leaves the nozzle of the fire hose creates a temporary vacuum at that point and fresh air from the outside is drawn in through the garden hose to fill it. This air is carried immediately to the fireman through the little tubes having their origin in the end of the small hose, supplying him with fresh air, no matter how smoke-filled the room.

Battalion Chief Helm, witnessed the test, which was made by Capt. Biggers and Fireman Saunders and McGrath. They agreed that the device was a success, saying that, though the cellar was filled with smoke, they experienced no difficulty in breathing. Fire Commissioner Johnson, it is said, has assured Mr. Halloran that if further experiments prove the invention a success it will be adopted throughout the city. Mr. Halloran will be kept with Engine Company No. 26 for some time yet, because the district covered by that company is productive of cellar fires, which lend themselves particularly to experiments with the helmet. Cellar fires are usually smoky, and on that account difficult to fight.

Halloran's invention was something of a surprise to his fellow firemen. For months he had been working on something, but they could not guess what. He would shut himself up in his locker room during much of his leisure time, and tinkered and draw, but just what he was doing no one could learn. Some of his colleagues thought he must be studying to take the examination for assistant fireman, and the mass of papers about his room was supposed to represent his work on possible examination problems.—From the New York Tribune.

PHOTOS TO "SIGHT" GUNS

Naval Officer Invents "Spotting" Camera for Use in Range Finding. Lieut. Comdr. Cleland Davis, executive officer of the battleship Mississippi and the inventor of the Davis torpedo, is also the inventor of an apparatus to be used on the big guns used by the navy which promises to revolutionize the art of warfare as applied to the navy. It is a camera attachment which will aid in the placing of shots, taking the place of the human eye, and practically eliminating the "personal equation" in range finding.

In the firing of the eight and twelve-inch rifles everything depends upon "spotting." This is done by the officer from the forward or bracketette contrivance on top of the military mast in the forward part of the battleship. These officers, as the shells fall, mentally note the apparent distance between the point where the falling projectile splashes to the target, whether a ship of the enemy or a target raft. What the eye appears an inch would denote that the distance was many yards short of or beyond the target.

Lieut. Comdr. Davis' invention does something that almost taxes credulity. After the gun has been fired and at the instant that the geyser of water caused by the falling shell is seen to shoot high into the air the camera attachment is snapped and the picture is taken. It is developed in fourteen seconds. The negative which is made on a plate practically an inch square, is then used by the spotters to determine whether the gun should be elevated or lowered or aimed to the right or left of the target on the next shot in order to make a hit.

The object of the invention of Lieut. Comdr. Davis is to supersede the eye and brain, which are quite likely to prove untrustworthy. An actual photograph of the apparent distance of the splash from the target will furnish information that cannot be disputed. Whether this invention will prove practically remains to be demonstrated. It was hoped to test this at the target practice of the Atlantic battleship fleet just completed on the southern drill grounds, but the apparatus, which was made under the direction of the inventor in Paris was not quite completed.—Old Point Comfort Dispatch to the New York Herald.

GERMAN POPULACE FACES SHORTAGE OF FOOD

Drought Causes Failure of
Potato and Other
Crops.

Duty on Indian Corn
May Be Suspended
This Winter.

BERLIN, Sept. 30.—The situation confronting the laboring population and all persons living on small incomes is grave, and it is feared that there will be unusual suffering among the poor during the coming winter.

The summer's unparalleled drought has not yet been followed by the limited sections of the northeastern and northern provinces of Prussia; and even there the rains were not of such volume as to recover the serious damage already inflicted upon the growing crops.

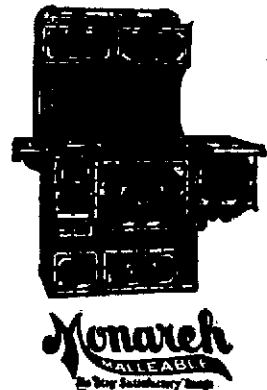

The potato crop, representing the chief food of the poorer classes, is in a most precarious condition. The Prussian government has just issued its first estimate of the probable yield of this crop, indicating a total of 22,567,000 tons, which compares with 32,730 tons actually harvested last year. Potato prices have already advanced 50 to 100 per cent. in various parts of the country. Other vegetable prices are at a phenomenally high level.

The clover and lucerne crops were so damaged by the drought that a second mowing was not even attempted in most parts of the country, while even the first mowings were generally very unsatisfactory.

RELIEF PROPOSALS.

The damage to the crops has now proceeded to such a point that it is looked upon as irreparable; the semi-official newspaper has just said that no substantial improvement is to be looked for. The Chambers of Commerce and other business organizations are appealing to the government to suspend the duty on Indian corn and ordinary barley not fitted

Buy and Build In
Boyd's Addition

The
Lots
Sell at
Moderate
Prices
The
Payments
Are
Allowed
In One
Two and
Three
Years
Values
Will
Increase
Rapidly

Boyd's Addition is the place to build a home for many reasons. It is on two car lines—Sunnyside and Recreation Park. This makes it twice as easily reached as districts having but one car line, and adds materially to its value. It is in a section of Fresno that is destined to grow rapidly, one that has a particularly bright future. These lots are being sold at moderate prices, \$150 a lot, and the terms allowed are so easy that these lots are within the reach of all. Pay one-fourth cash and the balance in three payments, covering three years. By the time the payments are all made the lots will be worth far more than the cost.

**On Ventura Avenue
Close to County Fair
Grounds and
Recreation Park**

Boyd's Addition is situated close to Recreation Park and close to the County Fair grounds. It is on Ventura Avenue, one of the most traveled roads in Fresno county, and one that is kept in good repair. Persons who live in Boyd's Addition will be in a suburb that will not be lonely. They will have a pleasant park in which to spend leisure hours, and in which to spend summer afternoons. They will be close enough to the Fair Grounds to be able to enjoy everything that goes on there, but not near enough to be annoyed by the noise.

Boyd's Addition is the ideal place in which to build a home, and we want to be allowed to tell you all about these lots, and to take you out to see them.

Boyd's
Addition
Has an
Assured
Future

 the trimming and the bodice

Jaume H. Paris

A COLLAR ON THE HOOD

On the herringbone weave in gray tweed there is applied light blue cloth.

This lines the pointed hood, which folds out into a rounded collar on each side. A broad circular collar decorates the front. The light blue cloth is used on this in an effective way.

The hood on the other mixed suitings is lined with gray.

A DRAPED EFFECT

POINTED WITH WINGS

More shape is crimped up at the center of the back and over the shoulders—a new idea.

Some hoods are made useful, especially on motor coats, by having ribbons. They are made to cover the head and a button securely around the throat. Ribbons are convenient and the coat stays both.

Hoods will be worn as evening caps and wraps on short cloth jackets of peluche, velvet and the like. Separate caps, too, will be applied with fine

Longer Skirts

THE afternoon frock shown is just a little longer than we have in the summer. The innovation to be greeted with joy, for the gown is attractively styled and of the latest proportions to withstand the show of the Cape skirt that will slide into the wearer's skirt.

So, longer skirts, and longer hems.

[illegible]

Longer Skirts

THE afternoon frock shows skirts just a little longer than we had in the summer. The innovation is to be greeted with joy, for the form must be attractively plump and the daintiest proportions to withstand the shortness of the season when it will ride up when the weather is cooled.

Skirts longer than last year's are better if they are not too full, for a little fuller is just what is needed for the maintenance of the new waistline.

Kilbane Gets Decision Over Frankie Conley

JOHNNY KILBANE IS TOO FAST; WINS ON POINTS

Conley Is Bewildered By Rain of Blows From Cleveland.

LOS ANGELES, Sept. 26.—Johnny Kilbane, of Cleveland, defeated Frankie Conley, of New York, in a ten-round fight here today. Kilbane, who was expected to have a very close fight, won by a knockout in the tenth round. Conley was badly hurt by a series of blows from Kilbane's left hand.

Kilbane had a margin in every round. Conley's best round was the third, when he hit Kilbane with a right hand. Kilbane, who was expected to have a very close fight, won by a knockout in the tenth round. Conley was badly hurt by a series of blows from Kilbane's left hand.

To Fight McFarland Soon

Matt Wells, the crack 125-pounder who is to meet Paddy McFarland in a ten-round fight at Madison Square Garden on the night of October 10th, is expected to have a very close fight. Wells is a former champion and is expected to win by a knockout.

HUNT LOSES BATTLE TO GREGORY OF OAKLAND

Commuters Pole Five Hits in One Round But Fail to Get a Run.

SAN FRANCISCO, Sept. 30.—Oakland defeated Sacramento here today by a score of 1 to 3. Sacramento made its runs in the second inning on two hits. Oakland failed to get a run until the sixth when three men crossed the plate.

FRESNO BOY WORKS BEHIND BAT FOR LOS ANGELES

Clarence Brooks Receives Halla and Delhi, Vernon Wins, as Usual.

LOS ANGELES, Sept. 30.—Halla, the Los Angeles pitcher, played in hard luck today. Vernon hammered him all over the lot and won the game by scoring five runs in the third inning. In the fifth, he ran into Moore while trying to lead an infield hit and was knocked unconsiously. Delhi, who succeeded him, held the Hogans to two hits.

PRECIADO'S COYOTES IN NEED OF MATERIAL; PLAYERS GONE

MADERA, Sept. 30.—There will be nothing doing in the baseball line here tomorrow, as the opening of St. Mary's college has partly disorganized the Coyote lineup. "Heine" Preciado, the clever short stop, has taken his departure for Oakland, to enroll in the college for his second year's work. "Spider" Leggett has also gone to the college where bright men and baseball artists are turned out and this will leave the team somewhat handicapped for the present but Manager

Make Up Your Mind To Be Entertained This Winter

Complete stock of Records for both the Edison and Victor Phonographs.

No Home Is Quite Complete Without A Talking Machine

On the long winter evenings there is no entertainer like the phonograph. You need not leave your home to have the best singers in the world do their best for you, and ensure as often as you like. You hear the richest voices in the world and the cost is nothing. It is amusement for young and old; it trains children to appreciate the best music. You can hear the old favorites of years ago and you can hear the latest popular music.

\$10.00 to \$200.00.

Splendid Display of New Bicycles

We have the finest stock of bicycles that can be found in Fresno. We have them for men, women and children. They are bicycles that have the strongest of guarantees. Besides the higher priced wheels, we have a very satisfactory bicycle that we are selling at \$25 and used bicycles that are priced even lower. These used wheels have been repaired and broken parts replaced. All they are practically as good as new wheels.

We Offer the Appeal \$40.00 Bicycle for

The Appeal bicycle at \$40 is the popular wheel. It is strong and light running and is made on beautiful lines. The Appeal never fails to give satisfaction; it is made right and it does what is required of it.

Yale and Pierce Bicycles Also Shown Here

We also have the Yale, the old time favorite with the long reputation, and the aristocratic Pierce, the highest priced bicycle made. The Pierce costs more because it is worth more. The Yale is priced at from \$30 to \$40. The Pierce is worth from \$15 to \$60.

Clovis Meets Bittels; McAfees After Tigers

CHARLEY KLEIN IS AFTER SECOND PLACE

McAfees Will Go After the Tigers Today; Clovis Hopes to Climb.

TODAY'S GAMES

Clovis vs. Bittels, 2 p. m.
McAfees vs. Tigers, 3:30 p. m.

Charley Klein's McAfees will try to get into second place before the season closes and the manager hopes to start his upward climb today at the expense of Roscoe Ford's Tigers. In the second game of the double header at Recreation Park, Klein's proteges will clash with the jungle chumps and a warm game is expected. Harry Johnson will oppose Stalling like Tuffs.

In the first game, Clovis will try to get out of the cellar and hopes to make Bill Budd's Bittels its first victim. Carl Merriman will pitch for Clovis with Ben Hill on the mound for the Bittels. At present the Tigers are leading the league by a good margin and if they win today's game from the McAfees, the pennant will be within their grasp. The Bittels are in second place and hope to keep it. However, the McAfees and Clovis still claim they are entitled to the position next to the Tigers. Today's games will probably tell the tale.

Coach Stagg Busy on Football Team

Coach A. A. Stagg, University of Chicago, and Captain Rademacher

CHICAGO, Sept. 30.—Coach Stagg of the University of Chicago football team is devoting a great part of his efforts to the developing of the kicking department in his squad. He is also beginning to develop formations which he will try out against the opponents later on this season. Secret practice will be maintained throughout the year. Capt. Rademacher is in fine shape for the strenuous work of the next two months. Clark Sauer and "Red" Paine are showing up to fine advantage in running back punts. Paine is spoken of as a quarterback possibility.

DIABLO B. WINNER OF 2:14 PACE AT HANFORD

Don Pronto Wins 2:15 Pace; Harness Meet Comes to a Close.

HANFORD, Sept. 30.—The program at the Kings county fair grounds race track today was a good one. The attendance, though not so large as yesterday, was large for the closing day of the meeting, and with several special events known in between the heats, the afternoon was a pleasant one for all. The races consisted of a "special" 2:14 pace; a 2:15 pace and a running event—a half mile dash.

The race results follow:
First race, 2:15 pace, purse \$1000: First heat, Princess G. first; Don Pronto second; Chancellor Jr. third. Time 2:13.
Second heat, Don Pronto first; Princess G. second; Chancellor Jr. third. Time 2:15.
Third heat, Don Pronto first; Princess G. second; Chancellor Jr. third. Time 2:15.

HOME RUN SWAT BY DOYLE DEFEATS CHICAGO

Ames Outthaws Brown and Giants Climb; Score Is Three to One.

CHICAGO, Sept. 30.—New York triumphed over Chicago today in the third game of the crucial series, 3 to 1, thereby regaining part of its loss of the two previous games. Larry Doyle's home run drove in the opening inning was responsible for the early lead of the visitors. Doyle, who had singled, scored ahead of him.

Chicago's lone tally came in the fifth inning on a base on balls, a single and an error. Score:
Chicago 1
New York 3
Batteries—Brown and Archer; Ames and Myers.
Umpires—Brennan and O'Day.

ST. LOUIS, Sept. 30.—The locals tied the score in a ninth inning rally today and battled with Brooklyn to a 6 to 6 tie at the end of the eleventh inning, the game being called an account of darkness. Score:
Brooklyn 6
St. Louis 6
Batteries—E. Steele, Schardt and O'Miller; Harmon, Dale and Bliss.
Umpires—Klein and Emelio.

NEEDHAM COMMENDS WORK FOR RIVER OPENING; REVIEWS LAST CONGRESS

Says 1910 Election Not Expression of Confidence in Democrats; Democratic Congress Failed; Says People Want San Joaquin Improved.

Congressman J. C. Needham of Modesto spent a day in Fresno yesterday, during which he spoke before a luncheon at the Commonwealth Club on the subject of the work of the last Congress, and also met with the joint river improvement committee of the Fresno Traffic Association and the Fresno County Chamber of Commerce. He declared that the people of this valley will never rest until they have secured a comprehensive survey of the river, and intimated that even an adverse report from Major Cheney, the government engineer in charge of river work in this district, will not stop the movement for the improvement of the San Joaquin river and ultimate opening of the stream to navigation.

At the committee meeting, Needham went over much of the ground that he covered in a reference to the river improvement question at the luncheon. However, he went into more details, declaring that the committee had taken the matter nearer to a consummation than any previous committee, and outlining the process the matter will go through in the immediate future. He said Cheney's report, which is expected in the near future, will go to the board of engineers at Washington, through them to the chief of engineers, and from him to the secretary of war, who will transmit it to Congress.

PEAKS AT BANQUET

Congressman J. C. Needham addressed the luncheon of the Commonwealth Club at the Hughes hotel yesterday on "The Work of the Last Congress," speaking of the rules of the House of Representatives, reciprocity, the wool and cotton bills, the campaign publicity bill, the direct election of senators, Arizona statehood, the lemon tariff and the improvement of the San Joaquin river. Mr. Needham stated that he spoke so frankly from the standpoint of a Republican representative.

Needham said that he understood that there would be opportunity later to hear the Democratic side. At the close of the meeting, A. M. Drew, secretary of the club, announced that Congressman Baker would address the club on the same subject from the Democratic view some time in October. The result of the election of 1910, Mr. Needham said, which thought defied to the Republican party, was due more to a desire to punish the Republican party than to any expression of confidence in the Democratic party. Many people believed that the Republican party had failed to come entirely up to the position necessary to the true progress of the people, and the vote was rather a rebuke to the Republican party than an approval of the Democratic party. Mr. Needham then proceeded to show how, in his view, the Democratic party had failed to meet the responsibility thus incidentally thrust on it.

One of the issues that determined that election was the change of the rules of the House of Representatives. The people voted, or thought they voted, to have a committee on committees assume the power hitherto exercised by the speaker. But the Democrats, instead, chose by caucus four members of the committee on ways and means, and another six Democrats named all the other committees of the House. They increased the number of committees, and increased the size of each committee, but gave all the added places to Democrats, thus making the Democratic party a majority in each committee. It was known that this extra session was to be devoted almost entirely to tariff matters. That gave the ways and means committee dominant influence. To give it, in addition to the power of shaping all the revenue legislation of the country, also the power of naming the committees which shape all other legislation, is to make a power too dangerous to be entrusted to any one committee. Part of the reciprocal reciprocity bill, which was passed by the House, was due to the fact that the Democratic side in the last session was due to this dependence of all the members and committees on one committee. The rest was due to the fact that the whole session was ruled by secret caucuses. Instead of throwing out their party differences in the open, as the Republicans had done, to their harm, they settled them behind closed doors.

As to reciprocity, Congressman Needham failed to see how those who opposed reciprocity could take any consolation from the fact that it was defeated by Canada. Their argument had been that Canada had got the best of the bargain. Canada's rejection, though, to be sure, the Canadian vote was based largely on the bugaboo of annexation, rather than on the merits of the treaty. Mr. Needham regretted exceedingly the defeat of reciprocity. It will tend now to develop trade on unnatural rather than on natural lines. It is likely to result in misunderstandings between the two countries, and it is doubtful if the efforts can be renewed in this generation. Reciprocity would have been beneficial to the nation, and especially to California.

EXPLAINS HIS VOTES

Mr. Needham voted against the wool bill, the cotton bill and the farmers' free list on the ground that the poss-

age of any legislation on these subjects at this time would be fatal to the whole tariff board system. By legislative direction of the last Congress, the tariff board was to report on the wool schedule by the opening of the first regular session of this Congress, and on the cotton schedule during that session. There was no thought then of an extra session, and to use that session to precipitate legislation on these subjects which the tariff board was instructed to be ready for the regular session would be to reflect and repudiate the whole tariff board system. Mr. Needham quoted Representative Cooper, of Wisconsin, the insurgent candidate for speaker, endorsing this view. "What we need," said Needham, "is accurate information, kept up to date. As a legislator I would not consent to eliminate any legislative function, but if I had the facts I could exercise discretion in making the law. We need a disinterested government agency, composed of parties and experts, to give us a glossary of the facts, to ascertain how a given tariff rate has actually worked, and what would be the elements affected by a change. The wool schedule kept continuously up to date, and not got up hastily in three or four months when a general revision is impending. Those who truly favor a tariff board should have been willing to wait until the system could be put in operation. The result will justify those who voted to postpone action."

The campaign publicity bill, as it passed the House, did not include expenses before the primaries. As, over the whole South, a nomination is equivalent to election, and the whole campaign is before the primaries, the bill in this form was partisan and unequal. Fortunately, the bill was amended in the Senate, on motion of Senator Kenyon of Iowa, to include primary as well as election expenses, and the amendment was concurred in before Congress adjourned.

Congressman Needham has voted three times in different congresses for the direct election of senators, but this was the first time that question was ever complicated in the House of Representatives, by the injection of representatives. The Democrats insisted on adding to the measures for the direct legislation of senators another measure, taking away from the national government the power to buy land, and has had from the beginning, to regulate those elections. Congress still has that power, with respect to the election of representatives, and there can be no excuse for making senators an exception, and depriving them of their position, and with respect to them, of a power which, though rarely used, might in an emergency become essential to the very life of the nation.

In regard to statehood for Arizona, Congressman Needham desired, in justice to President Taft, to correct the popular impression that the President had refused to approve the constitution of Arizona. The enabling act had provided that if the constitution should not be approved or disapproved, by the President or Congress, at the next regular session of Congress, then the states should come in anyway. The President did not take any action under that law, and the time had not arrived for such action. Instead, the extra session presented a new and legislative issue, by passing a new law admitting the states now. Whatever the President might have done, in his more ministerial position, in approving the constitution under the enabling law, as being republican in form, this new bill presented him a new and legislative responsibility, in his constitutional capacity as a member of the legislative department of the government, and, whatever we may think of the merits of the issue itself, the President, entertaining a view that the would have been cowardly if he had not vetoed this new law, presented to him for his legislative approval.

ON LEMON TARIFF.

Mr. Needham had been requested to speak also on the lemon tariff, and the improvement of the river. The lemon tariff is interesting to us, if similar action would be required in regard to other products. There were two amendments offered in the House to put amendments on the free list, both of which were ruled out on points of order made by Chairman Underwood himself. So the defense in the House was not on the merits, but on a point of order. In the Senate, a similar amendment was defeated in a vote. Then the lemons got shifted into conference consideration, by a curious device of Chairman Underwood. The Senate had passed an amendment putting lemons and lime on the free list. In moving the reference to conference, Chairman Underwood slipped in the words "and lemons" after "lemons and lime." This was part of an apparently merely formal motion made ten minutes before the House adjourned, on a day when Mr. Needham was at home sick, and without the ordinary courtesy of a notice to him, that such a motion was contemplated. The lemon tariff was used as a trading proposition in conference, and was finally dropped. But less than a week afterward, Chairman Underwood was banqueting by the Italian Chamber of Commerce of New York, and he practically promised them that he had only just begun to fight for free lemons.

If a great industry like lemons can be subjected to absolute free trade, without notice or hearing, what industry is safe? This, Mr. Needham said, is the strongest possible argument for the tariff board. "With our few votes, against the many votes of the sections, which cannot do so much for their products, how can we protect California by the old system of trade and tariff? Our only safety is in a tariff board, and a hearing on the merits."

TALKS ON SULPHUR

On the question of sulphur and dried fruits, Congressman Needham faced the President's engineer, then sent to the Chamber of Commerce, as a "horrible example of special interests." When the pure food bill passed, Mr. Wiley, for whom Mr. Needham expressed the greatest regard for his wonderful work as a scientist and his valuable help said that only a com-

BOOSTERS AT BANQUET TALK GREATER SELMA

Fire Fighting Facilities Urged to Reduce Rates on Insurance.

SELMA, Sept. 30.—Thirty enthusiastic Selma boosters were seated at the table last night for the first Friday of the Selma Merchants' Association, which was held in the banquet hall at Hotel Griffin last night. The entire evening was marked with enthusiasm, boasting of a grander and more glorious Selma than has been known in its history, and expressing interest in the betterment of the town.

President Anderson, after the request, briefly outlined the duties before Selma and announced that the principal topic of the meeting would be the consideration of better fire-fighting facilities in the town. Mr. W. H. Todd, who had been requested to look into the matter at a former meeting, gave a comprehensive report from the board of Fire Underwriters setting forth the items that would require fire insurance premiums, and intimated that a sum approaching \$200,000 would be spent by the town for an auto driven combination hose wagon and chemical truck. If the entire sum were raised by special taxation, it was shown that the rate would be only 1 cent would raise about \$700 for the town. J. C. Rorden also spoke of his interviews recently with firms supplying such apparatus and the systems used in other places.

Mayor W. C. Freeman said that he favored making the town a bond issue to equip the city with a fire alarm system at the same time. It was pointed out also that the saving in insurance rates would pay for the equipment in a few years. It was decided to continue Mr. Todd on the committee and to take up the matter with the town trustees for their recommendation to the voters.

J. C. Rorden, Sam Gill and Mark Savary, who are on the committee having the Selma exhibit at the county fair in charge, presented their report of the work done, and indicated the lines on which the exhibit was to be carried out. Owing to the fact that it is difficult at this season to get farm products in the prime state, the Selma fruit exhibit will be largely pictorial.

Attention was called to the lack of attention being given to Fresno county's display in the San Francisco ferry building, and particularly at the Oakland hotel, and a communication will be addressed to the Chamber of Commerce regarding the matter. As this was the first meeting of the nature for the association, the question of holding further meetings of a similar nature was brought up and it was unanimously decided to make them a regular feature. Before adjourning, the banqueters gave a vote of thanks and raising cheers to L. J. Price, the host, who had provided the banquet in such a sumptuous manner, and also requested Mr. Price to serve them on the following occasion.

Ain amount of sulphur could be used—an amount less than was permitted in any other nation, and an amount which would be sufficient to do all said was impossible to make any use of. The question of a revolving tribunal came up and was referred to President Roosevelt. The three issues were sulphur, phosphate of soda and saccharine. It happened that President Roosevelt was himself a regular user of saccharine. The referee board was appointed. Curiously enough, it has determined after full investigation that saccharine is harmful. "The sulphur report is absolutely ready," said Mr. Needham, "that it is favorable. But I am afraid it will be suppressed and we will not get the benefit of it."

FOR RIVER WORK

As to the river, the people of Fresno county feel that their cooperation in this investigation, it is the first time in twelve years that I have found any real cooperation in the San Joaquin river. These resolutions have passed Congress authorizing a survey of the river, but they have been turned down by the army engineers on the ground of no commerce. Now for the first time, we are in a position to present real evidence to them. I don't know the attitude Major Cheney will take. Like all army officers, he is careful about committing himself. But when I talked to him, I tried to leave the impression that if he should find it necessary from the mere standpoint of navigation to make a preliminary survey, this time such an adverse report would mark the beginning, not the end, of the negotiation. The people of the San Joaquin valley will never rest until a comprehensive survey of the river is made, so we can understand the whole question, from the standpoints of navigation, irrigation and flood protection, and if Major Cheney's report should be adverse, on the question of navigation alone, it will be up to us, by co-operation, through the state or by local institutions, to work for a more comprehensive survey. The experience of Montgomery Ward is in point. We are twice as good as the conservative army engineers on the ground of no commerce. Then a Santa Cruz proposition and then a proposition for anywhere in the bay and all the big objections. But the report of the engineer, then sent to the Chamber of Commerce, as a "horrible example of special interests." When the pure food bill passed, Mr. Wiley, for whom Mr. Needham expressed the greatest regard for his wonderful work as a scientist and his valuable help said that only a com-

Monday Morning Specials
9:30 to 10:30
10c Outings at 7c
—10 yards limit to each customer.
—No phone or C. O. D. orders.

95c White Waists 49c
—Includes a lot of low neck and kimono sleeves.

\$1.25 Corsets 98c
—Royal Worcester, the kind you have always had at regular \$1.25, now for 98c.

Kutner's
The House That Saves You Money
1119-1123-I Street
1801-1819-Marysopa Street

Attractive Garments
Arriving by Every Express

—The woman who is looking for stylish but inexpensive fall clothes can come to Kutner's with the assurance that she will save money whatever the price she pays. For instance, we charge only \$18.75 for a fine blue serge that we have seen priced about town for a great deal more. Women who have already been shopping come back and tell us how much less Kutner's prices are. We want you to judge us also.

And Now For The Best Opportunity To Purchase Blankets

—The Kutner store with its branch connections in Hanford, Selma, Madera and Sanger, buy their blankets direct from the mills. Figure to yourself what the purchasing power of these combined stores would amount to. Isn't it natural to believe that with the big outlet we possess that buying for less is a logical result of large orders. So we come to you with this big blanket exposition showing our ability to under buy and to under sell all other all the time. Look over this list, make a memorandum of the item you want, then come to the store and select yours while the opportunity is offered you.

Sheet Blankets 49c Extra Blankets 3.50 Plaid Blankets 8.00
—We sell the best in Fresno at this low price.—We will also show you a great assortment up to \$1.75.

Cotton Blankets 1.25
—Cotton Sheet Blankets for double bed, nice quality and nice weights; you'll find it a bargain at \$1.25.

Good Blankets 2.25
—Here's a large sized wool finished blanket that will surprise you for its closeness to wool, \$2.25.

Fine Dress Goods Here
—Soft clinging fabrics are being used in great variety this season for evening wear. We are showing a very interesting assortment of these materials.
—Silk poplins in 40 inch, in several colors, pretty and serviceable, priced at—\$1.75.
—French Serges in the light evening shades for open capes and gowns, 52 inches wide, at—\$2.00.
—24 in. Messaline in plain colors for dresses and evening gowns, priced here at—\$9c.

We Are Known For Good Linens
—Kutner's are now, as in seasons past, headquarters for linens. We are showing this season bigger and better stocks than ever before. It will be to your interest to see them before buying.
—Plain Satin Damask, full two yards wide, heavy weight, beautiful lustre, priced at—\$1.75 and \$2.50 the yard.
—Two yard Irish Damask, new line of patterns, good heavy quality, priced at—\$1.25 the yard.
—Napkins to match at \$1.00 doz.
—The Kutner Quality Damask, all linen, pretty patterns, a quality to interest all housekeepers and only \$1.00 per yard.
—Napkins to match, \$2.25.

News from the Men's Store
—Buy your next suit at Kutner's and buy a Frankel Fifteen, especially so if you are thinking of spending \$20.00 and have your store picked. We feel so confident about the saving you'll effect that we want you to share in our enthusiasm as well.
—All the new fall styles are ready. Will you select your's Monday?

Interesting Story About Boys' Hats
—People who have been visiting our store are very much surprised to see such a wonderful line of Boys' Fall Hats as shown here. All the new ideas are included as well as the popular shades of mode, red, white, gray, brown, navy, tan, Scotch mixtures and brown mixtures, \$5c to \$1.50.

Varnish the Woodwork

The woodwork is bound to become scratched, discolored and otherwise marred. You can restore it to its former brightness or you can give a new color by using varnish. We have varnishes in every shade and you are sure to find what will please you. They are the best of varnishes and stains.
